AFL Demands MWEB Restore Bonus

!! Washington Flash!!

WASHINGTON, D. C., May 25-The Maritime War Emergency Board has wired all signatories to the Statement of Principle that the Seafarers International Union has challenged their authority and wants to call another meeting and leave it up to all signatories. The meeting is to convene at 2:30 on June 6, 1944.

In the wire which is printed below this text matter the MWEB attempts to make it appear that the Seafarers International Union is trying to create trouble. They set forth as an agenda for the meeting two points:

- 1. Shall the present Maritime War Emergency Board be continued?
- 2. If so, what shall be the jurisdiction and authority of the Board?

In the interests of keeping the record clear the SIU states its position as it has time and time again in past issues of the SEAFAR-ERS LOG, in the WEST COAST SAILOR, and in countless briefs filed with the Maritime War Emergency Board and in the minutes of the Board itself.

The main reason that the representatives of the SIU have worked on the issue of the bonus and kept fighting, is because the seamen are involved. That is the reason that the SIU is still in there punching, for a cut such as the MWEB recently pulled in the bonuses in the Pacific meant a cut in the round earnings to a seaman sailing there of some \$70.00 per month.

It is noticable that the SIU took this position and carried it through without the cooperation of most of the other Unlicensed Unions in Marine; specifically without the officials of the NMU, the officials of the ACA, and the officials of the MFOW-which have been scheming under cover to sell the seamen down the river; for at the last meeting of the MWEB's Advisory Committee Myers and Mc-Kenzie of the NMU and their henchmen took the position that the bonus was " a dead issue and there was no use of beating a dead horse to death."

We further take the position:

- 1. That the bonus cuts must be restored to the pre-April 1st rates immediately.
- 2. We want assurance that the MWEB shall call not meetings as they have in the past without an agenda, and these proposals already submitted to all Unions' represen-

AFL President Wm. Green And Jos. Padway, Chief Counsel For Federation, Back SIU **Demands For Bonus Increases**

WASHINGTON, D. C., May 24-Biting comment was delivered before a specially called meeting of the Maritime War Emergency Board here last night by President Wm. Green of the American Federation of Labor, with Joseph Padway, chief counsel for the Federation, and Mr. Wilson of his staff, as well as Harry Lundeberg, President of the Seafarers International Union of North America and Sec'y-Treasurer of the SUP,

Joseph Padway, Chief Counsel Wm. Green, President of the for the American Federation of AFofL, who represented the Fed-Labor, supported the Seafarers eration's Executive Board before International Union of NA before MWEB; they ask bonus cuts be the MWEB on the bonus issue.

John Hawk, and Morris Weisberger, both Vice-Presidents of the SIU, together with Matthew Dushane, the Union's Washington Representative.

No. 13

The members of the MWEB were challenged by the Union in a brief that outlined all the complaints that the seamen are now voicing on the issue of the recent bonus cuts.

The fallacy of the position taken by the Maritime War Emergency Board was shown and the right to make decisions was challenged-for it was charged, in essence, that they have usurped power to which they have no claim and are not entitled to under the statement of principles, which specifically provides that the Board shall make no decisions or call any meetings unless such are made on the basis of an existing dispute.

The Union flatly declares that no dispute between the shipowners existed on the question of the bonus and therefore the Board acted illegally in calling a meeting to cut the rates being paid prior to April 1st. The meeting convened at 5 P.M. The full Board was present; Capt. E. Macauley, Dr. Frank P. Graham, and John R. Steelman. Following is the statement of the Union and the Executive Board of the American Federation of Labor. BEFORE THE MARITIME WAR **EMERGENCY BOARD** AND WAR RISK INSURANCE Statement of Seafarers International Union in Protest Against the Maritime War **Emergency Board's Reduction** of Bonuses.

tatives in sufficient time for consideration. Further, that they shall take no such arbitrary actions as they have in the past, as exhibited in the recent bonus cuts. Following is the text of the wire:

John Hawk, Seafarers International Union of North America 2 Stone Street, New York, N. Y.

To All Signatories to the Statement of Principles:

The authority and jurisdiction of the Maritime War Emergency Board under the Statement of Principles to make adjustments in war risk compensation have been challenged by representatives of the Seafarers' International Union of North America and Sailors' Union of the Pacific at a meeting of the Board held on May 23, 1944. The Board takes the position that all of its actions since its inception have been within its authority as prescribed in the Statement of Principles and as recognized by the signatories. The Board is unwilling to continue to exercise its functions unless and until its authority and jurisdiction are clarified to the satisfaction of all parties signatory and the members of the Board. The Board hereby calls a meeting of the parties signatory to be held at 2:30 P.M. on June 6, 1944, Commerce Building, Washington, D.C., for the purpose of discussing the following questions:

- Shall the present Maritime War Emergency Board be (1) **Continued?**
- If so, what shall be the jurisdiction and authority of the (2) Board?

Joe Squires Launching **Reveals Story Of SIU** Hero Under Hazards

At 12 noon on May 22 in the yards of the New England Shipbuilding Corporation at Portland, Maine, the widow of an SIU hero broke the traditional bottle of champagne across the bow of a new merchant ship, and with the In the Matter of simple benediction "I christian thee Joseph Squires," sent WAR RISK COMPENSATION

the freighter on its way to the seven seas.

The widow was Mrs. Joseph Squires of Brooklyn, New York, and just prior to the launching

representative McGinnes of the Maritime Commission had made the posthumous award to her husband of the Merchant Marine Distinguished Service Medal. Representing the SIU at the ceremony were James Coyne, an active seaman and special SIU Representative, and John Mogan, a Vice President of the SIU and

Boston Agent. Also participating was President Sides of the New England Shipbuilding Corporation.

Said Mr. Mogan: "This is the first ship named for one of the men who sail these ships . . . and this vessel will always carry the tributes of the seamen of the Seafarers International Union as well as the high praise of all American seamen sailing in the mer- the Board to voice the protest of chant marine,"

Tribute To George W. Alther

AN EDITORIAL

It isn't strange that the George W. Alther should be named for a man who was a member of the Seafarers International Union of North America. For he did what he thought was the right thing to do under fire.

His deed was perhaps multifold that of some of the members of our Union who are day in and day out sailing the ships which deliver the goods, the arms, the ammunition and equipment necessary to win in a modern war-but his deed was a symbol of what all seamen today sailing the merchant marine go through to perform that mighty service for our armed forces.

Most of them are just ordinary men-just men by the common standards of the seamen themselves; but each one

This Port is still busy as all you. hell. We have paid off 25 ships everything has been squared up ship-shape.

It appears that some of our members do not know their contracts. Some fellows put in overtime claims that are absolutely uncollectable under the contracts, whereas, they did not put in for claims that were good.

This Port, in the last two weeks, has collected a total of \$1500 for members of this Organization on beefs that were not even put in for on some of the ships paying off in outports.

Remember, fellows, that the company crimps we run into on board ships who handle the com-

Yours for less free-loaders, PAUL HALL, Agent

The hot air of the gas-bags blatting the wind about aboard the American Seaman, training ship of the U.S. Maritime Service, at Pier 1, North River, New York, Monday of this week, was responsible for tiring out a barrage balloon anchored some 300 feet above the vessel, seamen are asserting.

However, witnesses of the incident declare that the big gas bag didn't deflate when it got tired. It bucked about some more in a stirring wind during the Maritime Day ceremonies and ship-owners' speech-making and snapped its cable.

With typical disgust of a gasbag for other gas-bags, the balloon, perhaps one of the biggest of them all, started on a tour of its own and stopped first over Battery Park, with some of the boys in their uniforms chasing it in a station wagon. When they tried to drag its cable down the big gas-bag tossed discretion to the winds and took off some more. It then took a little jaunt along South Street, looking over the winos, with the station wagon in hot pursuit. It flirted around there a bit and then kicked its tail skirts around just as the boys in the wagon were about to catch it and headed out over the harbor. Not being an amphibious jeep, (commonly and better known as a "duck"), the station - wagon group was, foiled and they returned the commandeered vehicle to its owners and went back to their ship irritated. With the contempt of its kind the balloon took a peek at the ferry boats at South Ferry and gleefully danced off toward Staten Island to see what was going on over there. All aircraft were warned of its being on the loose and out for horse-play; the Army was asked to have some of its fliers take target practice on it if it couldn't be headed home.

Union Supports New War Bond Drive

With the fifth War Loan Drive getting into full swing throughout the nation, the Atlantic and Gulf District of the SIU has thrown its full support behind this important phase of the war effort in a determined drive for the sale of bonds among the Union's Membership.

Confident that the more than chased during previous drives, 25,000 members of the SIU of chased during previous drives, NA would move solidly behind gave the Union \$177,000 worth of the Union in its effort to go over the top in War Bond sales, Sec'y-Treas. John Hawk emphasized the vital need at this time for allout support of the war effort. "We went all-out on the seas in the most critical period of the war. We've moved the ships. Now let's help to keep the money flowing behind the Big Push."

With the approval of the quarrly finance committee an addi tional \$11,00 from the Hospital and Burial Fund and \$5,900 from the General Fund has been used to purchase bonds with a matured value of \$23,000. This makes a grand total of bonds purchased this year of \$98,000. During the Fourth War Loan drive \$75,000 worth of bonds pur-

a man apart, a separate individual in his own right—yet all are ready to sacrifice their lives courageously for their fellow men.

George Alther was such a man!

Although George Alther was sailing as a Second Mate, he was still a member of the Seafarers International Union for he had just prior up-graded to become an officer.

And he not only proved that he was an officer, but a gentleman—even though it cost him his life!

Because, while aboard the SS "Timothy Pickering" he sped through a flaming hell to help a Naval gunnery officer after the ship had been bombed on July 13, 1943. That ship was loaded with TNT, munitions, and high octane gasoline.

Though he could have chosen safety, George Alther chose not-all that mattered to him was that a fellow human being's life was in danger in this war.

To such he surrendered his own life. In this act of courage, typical of the merchant seamen, the Seafarers International Union renders him high tribute in the spirit Lewis, 4 hours: the 12-4 Oiler, 3 S. Cambridge, 38 hours, \$34.20; of a Brother-for he had what it takes.

He gave his all in the fight for Liberty for all the at Waterman Office, New York. \$77.59: T. Dean. 3 days' pay. 8 peoples of this World.

It is well that a ship is named for him!

THE SEAFARERS LOG

AFL Demands MWEB | Ten Victory Ships **Delivered In April Restore Bonus**

(Continued from Page 1) erican Federation of Labor against the decision of April 1st. This decision of April 1st is not only arbitrary and unjust in that it denies to seamen the war risk compensation to which they are entitled, but it is unauthorized and goes beyond the purposes for which this Board was created.

The Maritime War Emergency Board was created for the purpose of insuring stable labor relations in the all-important shipping industry after this country had been treacherously attacked by the Japanese and had entered into war against the Axis nations. The President of the United States named its members and approved the principles defining the purposes and authority of the Board, which were drafted and unanimously signed by ship operators and representatives of the various seamen's unions. This statement of principles definitely established this Board to act in a mediatory capacity to settle labor disputes involving war risk compensation and limited its authority to the settlement of such disputes. This Board then was not established as a triumvirate to determine war risk compensation for seamen in such amounts and in such a manner as the members of the Board felt were proper, but was established for the sole purpose of settling labor disputes between seamen and ship operators involving questions of war risk compensation. Yet, over the protest of the Seafarers International Union, the hit. All are subjected to the same Board has constantly assumed fear. Seamen on a vessel that has this authority to set war risk been hit underwent no greater compensation.

Can Not Go Unchallenged

The Board's decision of April 1 ignores the statement of principles which created it and it is exercising authority that was never given to it. This decision goes further than any of the **Board's** previous enlargements of its authority and can not go unchallenged and free from protest.

In this decision of April 1

bounds the combat areas in which additional or premium bonuses are paid in such a manner as to discriminate against the seamen of the Pacific.

I shall speak first of the manner in which the April 1st decision changes the standard for paying attack bonuses. Prior to 1944 tonnage. the decision of April 1st seamen received additional bonus pay if bonus was paid to all seamen subjected to the attack, whether first four months of 1943, the banand damaged, or a particular ships of 5,360,712 deadweight seaman was injured or killed. tons were delivered. The compensation was paid because the seamen had been subjected to the hazards and risk of an enemy attack.

changes the payment of this attack bonus, so that it is payable only to those seamen on a ship that has been hit and damaged, or on which a seaman has been wounded or killed by enemy action. The basis for the payment of the attack bonus prior to April 1st was the risks and hazards of personal injury while under enemy attack. The basis subsequent to April 1st is the misfortune of a fellow seaman, or of a ship, and this is a false, absurd and unrealistic basis upon which to pay such a bonus.

Same Risk To All

Each seaman in port, while an enemy attack is going on, is subjected to the same risk of being risks than those seamen on a vessel lying nearby which, fortunately, was not hit. The purpose of the attack bonus was to compensate seamen for this risk they had been subjected to under enemy attack; not to compensate them because one of their fellowseamen might meet with misfortune. How unsatisfactorily and unwanted the bonus when it is forthcoming only because a fel-

WASHINGTON - Ten of the 154 ships delivered during April were of the fast, new Victory cargo type, the Maritime Commission announces. The swing to fast ships is proceeding as fast as

possible, the commission said, and it is anticipated that a ratio of 11 of the fast type to 8 of the slower type will make up the

West Coast yards delivered 62 of the 154 ships, and East Coast yards delivered 55. Gulf Coast yards delivered 36 and the Great The decision of April 1st Lakes area delivered one. The West Coast yards built 639.823 deadweight tons, 40.1 percent of the total tonnage in April. Eastern yards built 606,511 deadweight tons, or 38.1 percent. The Gulf Coast yards produced 346.-357 deadweight tons, 21.7 percent, and the Great Lakes area, 1,000 deadweight tons, 0.1 percent.

The largest number of ships, 22, was delivered by the Permanente Metals Corp., Richmond, Calif., (Metal Trades-AFL). The Bethlehem - Fairfield Shipyard, Inc., Baltimore, Md., (IUMSWA-CIO) delivered the next largest number, 15. The third largest number was delivered by the New England Shipbuilding Corp., South Portland, Maine, (IUM-SWA-CIO), 10.

Joe Squires Launching **Reveals Story Of SIU Hero Under Hazards**

(Continued from Page 1) Commemorating the heroism of SS Joseph Squires is now being launched as a new addition to America's great merchant fleet.

Squires and another seeman, Harold E. Whitney, volunteered to stay aboard the foundering Maiden Creek on New Year's Eve, 1942, to tend the falls and get the boats away. In so doing they were unable to get away themselves.

The end of the Maiden Creek and the heroism of these two seamen was witnessed by SIU Brother Aaron McAlpin, 54-yearold member of the vessel's steward department. McAlpin was one of the 31 survivors and one of three out of the steward's department to survive.

Bound for New York with a load of ore, the Maiden Creek ran into a severe Atlantic storm about 20 miles off Block Island. For twenty-four hours she was pounded by the seas and on the afternoon of January 31, after losing one of her boats and all of her rafts, she sent out an urgent SOS. Seas were breaking over her decks, according to McAlpin, and the ship was settling fast.

Another vessel hove near late in the afternoon and signalled, telling them to abandon ship. But the Captain delayed, hoping to bring the Maiden Creek in, and the other ship, after circling them

several times, departed. Later it was learned that officers of the an SIU seaman who died so that ship thought the Maiden Creek his crew mates might live, the had been torpedoed; it didn't want to endanger itself by "hanging around."

Says McAlpin: "Just about dark she started to go down by the head and the skipper gave the order to abandon ship. The waves were terrific, thudding against the deck houses and giving the ship a terrible pounding. Worst of all, it was cold and all of us were soaked by the spray.

"We used the starboard boats. Number one got away first. It hit a big sea but the crew knocked the blocks out in a hurry and pulled away without smashing. It was mighty good seamanship. We wondered if we could do as well.

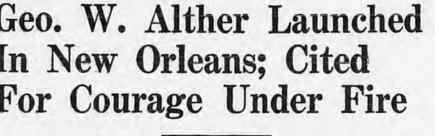

"Our number three boat was next, but it was evident that someone would have to stay on board and handle the lines if we were to get away.

"Squires and Harold Whitney, the Deck Engineer, volunteered. They lowered us away very carefully, timing it so we'd hit the water at the right moment. No one seemed a bit nervous or excited. A wave broke over us but we didn't swamp.

"We had to fend the boat off to keep from being smashed against the hull and a few seconds later a sea carried us away from the side of the ship. When Squires and Whitney slid down the falls we were too far away and they had to drop into the water. Whitney disappeared.

Squires started swimming with all his might but he couldn't reach us. The Captain threw him a line and tried to maneuver the boat over to him, but the waves were too strong. After a few minutes we lost sight of him."

Widow Says Joe Squire's **Name Will Live**

be more useful to his country in the merchant marine than in a shipyard, Joseph Squires gave up a safe defense job ashore and answered his country's call for experienced seamen.

That was in 1942. He wanted a Liberty, but he was so anxious to get to sea he took the first ship to come along-an old Hog Islander called the Maiden Creek.

ran into a terrific winter storm. Seas pounded her fore and aft and when it became evident she was going down, the skipper ordered her abandoned!

Chances of getting the boats away looked hopeless. But if any men were to get off the sinking ship volunteers would have to stay on board and tend the falls. Then it was that Joseph Squires found his much-desired chance to be useful to his country. With a shipmate, Harold E. Whitney, he stayed on the Maiden Creek to get the boats safely overside.

In doing so he gave his life-in

Because he thought he would away it was impossible for Squires and Whitney to be saved. But it wasn't a death that Joe Squires would have minded.

In her home at Bay Ridge, Brooklyn, Mrs. Minnie Squires said, "Joe always said that when his time came to die he wanted it to be at sea. He was a real

sailor." Both from Newfoundland, they met and were married in Brook-On that voyage, his first trip lyn in 1940. Since settling down to sea in nine years, Squires' ship ashore in 1937 Squires was a dock operator for the Bethlehem Shipyards and before that had spent ten years at sea in sail and steam. For a long time he was on the

Queen of Bermuda; and had also spent some time on the wellknown sailing yacht Intrepid. Says Mrs. Squires: "I can't think of him as being gone. When you're the wife of a sailor you never say good-bye. Somehow I think he'll be strolling in the door again one of these days." Ironically, Joseph Squires was

a champion oarsman and won a medal in the Bermuda Lifeboat Races of 1937. But he gave up

AFL Demands MWEB Seamen Improvise Mattrees Liferafts-Restore Bonus

(Continued from Page 3) rates into the ever changing rate of ship sinkings is a false basis bonuses.

Danger At All Times

When a ship puts out to sea in these war times, it is hunted by the enemy. The hunt is no less vigorously pursued, now, than it was prior to April 1st. The hunter might not have been as successful in the past few months as he has been in some previuos months, but, nevertheless, the hunt continues and there is just as great a desire on the part of the enemy to sink ships now as there ever was. Perhaps next

month ship sinkings will increase, perhaps not, but, nevertheless, since April 1st the seaman is still subjected to the fears and the risk of enemy action. He does not assume only the ordinary risk of the sea and the elements merely because the rate of ship sinkings is down. His ship is still blacked out at night. He still wears his life preserver at all times and he is under as great a fear since April 1st of torpedoes crashing through the thin steel hulk of the merchant vessel or of an aerial bomb diving through its thin decks as he was prior to April 1st. The kind and degree of risk is the same. The odds that the seaman will come through alive might be a little better now than they were formerly, but the lives of seamen are a poor thing to gamble on. The Board seems to reason that if formerly one ship out of 20 was sunk, and now only one ship out of 40 is being sunk, the war risk compensation should be cut. But such reasoning is not sound because the seamen, who are the principal parties involved, are interested in tralian ports that the great bulk SIU Crew Members the particular ship upon which of war materials, food, etc., is they are sailing and this ship shipped, and by excluding these might just as well be the one ports from the combat area bonus ship out of 40 that is sunk, as it area, but a very few ports to moving the ships, but is manning might be the ship out of the 20 that was formerly sunk. The materials is shipped remain in their business, is shown in many

Coast and West Coast insofar as sinkings might have dropped, and coast-wise shipping is concerned, therefore to tie voyage bonus as there is justification for the cutting of the bonuses on either Coast and there is even less justiupon which to determine such fication for the extension of the low bonus area for West Coast shipping to include half of the South Pacific.

"Inexcusable Injustice"

As we stated heretofore, the hunt for American shipping continues and so long as it does so, the war risk of seamen shall continue on both coasts equally. The war risk compensation in effect prior to April 1st should continue in effect and the discrimination between shipping on the East Coast and West Coast should be eliminated.

In no way is the arbitrariness and inexcusable injustice of the April 1st decision more clearly demonstrated than in the manner in which the combat bonus areas have been changed by that decision. Insofar as the Asiatic combat theater of war is concerned, the decision cuts off but seven degrees from the southern boundary of the area and extends the area thirty degrees westward, ten degrees eastward and eighty degrees northward. On the face of the enlargement of this combat area, it would seem that seamen sailing into this theater of war have greatly benefited from this aspect of the decision. However, a glance at the map will reveal that this Asiatic combat bonus area has been rebounded in a deceptive manner. By moving the southern boundary northward seven degrees, the New Hebrides, the largest United States naval base in the South Pacific, and all of the important northern ports of Australia are excluded from Chief Mate Lauds the combat area. It is to the New Hebrides, and the Northern Auswhich any appreciable amount of the ships with men who know

Resourcefulness in improvising liferafts from mattresses, hatch covers, tables and other furniture resulted in the rescue of 30 men from the Liberty Ship William B. Woods, operated for the War Shiping Administration by A. H. Bull & Co.

The ship was sunk by a torpedo a few weeks ago, the WSA has disclosed. Under the command of Capt. Edward A. Clark, of Baltimore, the ship was carrying military supplies in the Mediterranean when the attack was made.

The single exploding torpedo apparently tore off the propeller, because engines began racing. Three liferafts were lost in the explosion and a number of soldiers were lost or wounded.

By the time the ship was ordered abandoned, some of the wounded soliders were being lowered into lifeboats, according to the report.

The stern of the vessel was under water and officers and soldiers lashed mattresses together, three to a bundle. These bundles were then thrown overboard and four soldiers were allowed to cling to each until help could arrive.

One of the deck cadets told of unning out on deck to find parts of a hatch and liferafts still falling after splintering by explosion. He helped lower a lifeboat and stow wounded soldiers in that and additional liferaft.

With other rescuers he cruised about in the master's power lifeboat, picking up survivors and transporting them to an Italian destroyer that was standing by. This was continued until no more life jacket lights could be seen.

Proof that the SIU not only is number of ships sunk has noth- the combat area. The southern letters received by the Union

Mrs. Minnie Squires is shown above with her late husband before he sailed on the MAIDEN CREEK.

ing to do with the risk taken. The only material fact is that a concerted and vigorous effort is being made by the enemy to sink ships and seamen must undergo the resulting risks and hazards.

Foreign Seamen Not Cut

This fact is evidently the controlling fact insofar as war risk is concerned, for all but American seamen. Seamen on ships sailing the flags of our allies and whose wages and war risk compensation are paid by lend-lease, have not had their war risk compensation reduced because the number of ship sinkings might have fallen off. Nor have payments by the Government to ship operators been reduced because the record of ship sinkings has improved for the Allies.

The war risk compensation for the seamen of the Pacific has been twice reduced because the April 1st decision, not only cuts the already low bonus rates for West Coast - wise shipping, but this low bonus area has been extended by the decision to include half of the South Pacific. There is no more justification for discrimination between the East

boundary of this combat area should remain as it was prior to the April 1st decision.

Extended Areas Asked

Then consider the westward extension of the area by the April 1st decision; what benefit is that extension to the merchant seaman? The only area included within this extension is an area completely dominated by the Japanese and into which the Allied fleet has ventured but once. Merchant ships do not sail east of 90 degrees west longitude, the new western boundary of the combat area.

But consider the new western boundary a bit more extensively. It will be observed that Calcutta, a most important port, especially now that the campaign in Burma has been opened, lies but two degrees west of this western boundary and Ceylon, Mountbatten's headquarters is also excluded What the decision does in fact is to place the western boundary of the combat area just at that trouble in the entire trip. Keep point where all shipping to the India-Burma theater of war will be excluded from the combat (Continued on Page 8)

from masters, mates, engineers and shipowners, lauding the work of Union brothers under their command.

Typical of many is this letter from Chief Mate Frank Torre. It was his first trip with an SIU crew and it appears they showed up well in comparison to the crews he had sailed with on other ships.

New York, May 22, 1944 Mr. John Hawk, Secy-Treas.,

2 Stone Street New York, N.Y. Dear Mr. Hawk:

Now that I am out of the hospital I take this opportunity to thank the SIU for the fine deck crew sent me while I was Chief Mate on the SS William Sturgis.

I sailed for many years on tankers and NMU ships, but this was my first experience with an SIU crew and I can assure you that your men are A-1 quality.

From the Bos'n to the last OS, I never had the least bit of up the good work.

Truly yours, FRANK TORRE, Chief Mate

Friday, May 26, 1944

THE SEAFARERS LOC

In New Orleans, Cited For Courage Under Fire

(Continued from Page 3) it was that Alther gave up his life to save a gunnery officer on the lower deck, which by that time was enveloped in flames.

Following presentation of the medal Admiral Vickery awarded the pennant to the Delta Company. In so doing he congratulated the men and women workers for a job well done.

Shortly after Pearl Harbor, Admiral Vickery said, the President handed the merchant shipyards of this country one of the greatest challenges in history - the construction of 8,000,000 tons of shipping during 1943 and 16,000,-000 tons during 1944.

Transportation Vital

war production than your assignment," the Admiral told the workmen. "For battles are won by men, equipment and supplies and yet all three of these would be of little use without transportation to deliver them to the battlefronts.

"American shipyards met the commander - in - chief's 1942 goal and his 1943 objective they exceeded by 20 per cent.

"The Delta yard has played an important part in the tremendous accomplishment.

"The award you are receiving today places you in a class with the leading yards in the country. Truly you have made the all-American team of merchant shipbuilding."

Urges Greater Efforts

E. B. Williams, vice-president of Delta, who served as masterof - ceremonies, said more than 5500 men lost their lives in the merchant marine during this war and he urged the workers to greater efforts.

Also making pleas for increased achievement were W. H. Gerhauser, president of Delta, who accepted the pennant and James Dalzell, general superintendent of the shipyards.

Others termed the shipbuilding program the "backbone of the whole war program."

declared, and "only suddenly have we become aware of the iner's Medal which is said to be meaning of ships."

Victory Ships

Later Admiral Vickery contrasted the desperate marine transportation problem which confronted the United States just after Pearl Harbor with the situation today, when 34,000,000 tons have been added to the nation's merchant marine, Admiral Vickery stressed the issues which will arise in peacetime and said "we are endeavoring to make sure that our postwar merchant marine will be capable of doing its share in the job of making victory permanent."

Praising the shipyards for the "There is no more vital part of record-breaking construction jobs they have turned out, Admiral Vickery said:

> "I am sure, that as taxpayers, you will be pleased to know that they have kept costs far below those of the last war's program. And they have done this, notwithstanding that today's ships are larger and better and despite the fact that shipyard wage rates are much higher."

> Admiral Vickery emphasized the accelerated production of Victory ships, larger and faster than the old Liberty vessels, as a definite contribution to postwar maritime progress.

> "But the best ships in the world," Admiral Vickery said, "are no better than the men who sail them, and we can all be proud of the courageous performance of our merchant seamen at war. During the height of the U-boat campaign, when the merchant marine was suffering an even higher percentage of casualties than our armed forces proper, not a single American ship missed its sailing for want of a crew.

include three SIU members from New Orleans who were aboard the same vessel as Alther.

They were awarded the Marequivalent to the Purple Heart for members of the armed forces. Today's recipients are:

Saul Howard Berman, first cfficer, whose four-year-old daughter, Sari Earlyn Berman, will re-

daughter of Mrs. Ethel Berman. Frank James Miller, SIU mem- will receive his medal. ber, a boatswain, whose sister, Mrs. Agnes Grazala, 1027 St.

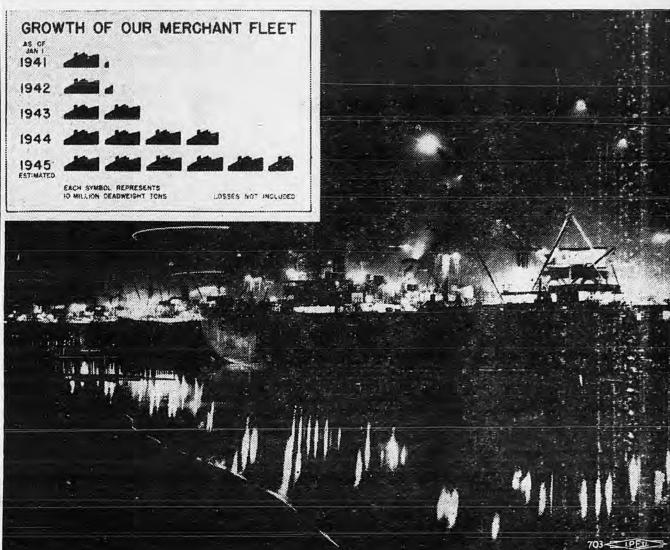

Philip St., will receive his medal. Wren Joseph Reagan, SIU member, an able seaman, whose mother, Mrs. F. Reagan, 913 Dublin St., will receive his medal.

Others decorated posthumously ceive the medal. She is the whose wife, Mrs. H. P. Smith. 668 First St., Orleans Parkway,

Page Five

Andrew Asp, SIU member, able seaman, whose wife, Mrs. Tule Asp, 2311 Baronne St., will receive his medal.

Lewis Dewayne Jarvis, first assistant engineer, whose wife, Mrs. Lewis Jarvis, 4422 S. Liberty St., Henry Peter Smith, master, will receive his medal.

Building ships around the clock for the WSA cargo fleet: "Ships-more ships" to smash the Axis and to create the greatest merchant fleet in history! Graph shows the phenomenal growth of the WSA cargo fleet from 1941. The early months of 1942 were a very critical period when sinking exceeded construction. But thousands of ships now building will survive this war to carry our cargoes for peace.

Liberty Ship **Program Ending**

Additional contracts for awards

Pointing out the impossibility of conducting a war "with the fleet we had at the end of 1941," one official said, "before Pearl Harbor the American people had a strange disregard for their merchant marine."

Although the United States was a leading maritime nation, during the days of the famous clipper-ships it began to turn its mind inland in later years," he

SIU MEMBER DIES FROM STAB WOUNDS

Just a few hours after the seagoing tug "Point Judith" arrived back in San Francisco, after a three months' trip, the body of Joseph Reha, 27, oiler, was found on deck, slashed by five deep stab wounds. He was dead when discovered.

Reha, police said, was one of a group of crew members that had gone ashore to "celebrate" immeliately after the vessel docked.

He is survived by a sister, Mrs. Road, Essex, Maryland.

Principals at launching-Admiral Howard L. Vickery, vice-chairman of the U. S. Maritime Commission, holds 4-year-old Sari Earlyn Berman, sponsor of the Liberty ship, "George W. Alther," launched at the Delta Shipbuilding Co. yard today. Little Miss Berman was assisted by her mother, Mrs. Ethel Berman, in smashing the bottle. At right, George W. Alther, Sr., the ship's namesake's Raymond Bateman, 15 Warren father, holds the Merchant Marine Distinguished Service Medal and citation, presented to him by Admiral Vickery as a posthumous award to his dead hero son.

on construction of Liberty ships are not contemplated, but the future program calls for the production of standard type vessels. Rear Admiral Howard L. Vickery said last week.

The Maritime Commission vice chairman said that the production program was at present about evenly balanced between Liberty ship production and that of the standard types, with about 75 building ways producing the slow moving emergency vessel.

Although the Merchant Marine Act of 1936 called for the construction of 500 ships, 50 a year over a ten-year period, the most recent figures available reveal that American shipyards from 1938, up to and including the first three months of this year, have delivered into service 362 tankers and 366 standard C-type cargo vessels.

The increase in the long range program has been achieved exclusive of the 2,008 Liberty ships which have been constructed over the same period.

The lifeboats' crew, to clear, The wild winds sound his requiem, The restless deep's his bier.

Alther: who faced the Nazi bombs, The terror from the skies; To save his ship and lives of crew This hero had to die; His face still turned towards the foe, While he on deck did lie.

Thus died in line of duty These sailors of the sea Courageous, fighting merchantmen Who keep our Nation free, The selfless Souls of Courage True to Man's Dignity.

No speech nor blare of trumpets, Nor praise on printed page, Nor witness of a spoken word But only wild seas rage, And hell of Nazi fury; This was their lonely stage.

These ships shall live, in Seamen's hearts Through the deeds that won their names, The floating Shrines of our Golden Age, To their eternal fames! Proudly! Sail On! these SIU shipt-Upon the world's sea lanes.

AFL Demands MWEB Widow Savs **Restore Bonus**

(Continued from Page 4) bonus area, and only that portion of the Sea of Bengal where no merchant vessels go will be included in the combat bonus area. It is our contention that the western boundary of the combat bonus area should embrace the whole of the Sea of Bengal and a sufficient portion of the Arabian Sea to include the the mouth of the Persian Gulf. We request that the mouth of the Persian Gulf be included in the combat bonus areas because of the large shipments of oil and gasoline from Iran, Iraq, etc. It lantic, ships not only travel in is an exceedingly dangerous cnovoys with the best possible area.

Aleutians

Insofar as the northward extension of this combat bonus area is concerned, in addition to bringing Japan itself into the combat area, and other territory just as barren of Allied Merchant ships, the western tip of the Aleutians is included. The Aleutians should have been included in a combat bonus area at the the April 1st decision. This is the details involved. time merchant ships sailed into that area carrying supplies to help regain those islands from the Japanese. Although the islands have now been regained they should be in the combat area, but the area should be extended to include the whole Aleutian area instead of the mere tip of the Aleutians for there is ever present dangers of enemy action in these waters.

The West Coast seaman has been treated much the same way in the extensions of the combat area eastward as he has been in the northward extension of the area. Most of the Gilbert and Marshall Islands were excluded from the combat area prior to April 1st; now they have been included. We contend that they should have been included at all times, and they should continue to remain in the combat area, but not at the expense of excluding the New Hebrides and the North Australian ports. So long as those ports in the South Pacific remain outside the combat area few seamen shipping into the Pacific will receive combat area bonuses, because as large as the combat area might have been made by the April 1st decision, the important ports, and those areas in which ships sail to supply the armies aligned against the Japa have been carefully and seems to be deliberately excl from the combat bonus area

Theater has been extended by the April 1st decision to include all of the English ports. These ports should have been included in the combat area long ago, but we can conceive of no reason why the English ports at this date should be included in a combat area, while the ports of the South Pacific should be excluded.

In closing I want to emphasize that seamen shipping into the Pacific move without convoys, that there is little chance of survival if sunk in the Pacific, because of its size, while in the Atprotection from sea and air at-

tack, but they travel on well defined sea lanes. Chances of survival if sunk in the Atlantic are good. Chances of survival if sunk in the Pacific are virtually nil.

The discrimination against the seamen of the Pacific must in jus-

(Continued from Page 4) perienced men and chose to remain on the sinking ship.

Proud and surprised when she learned that her husband's heroism was being remembered in the naming of a Liberty ship, Mrs. Squires said, "I still can't believe there is going to be a ship named after him. He talked a lot about Liberty ships and said he'd like to sail in one. He never got the chance-but now one is named after him; at least his name will sail one!"

Since her husband's death Mrs. Squires has been in war work and is now employed by the Vulcan Proofing Company, makers of rubber life rafts.

Through arrangements just completed the Atlantic and Gulf District of the SIU will now be able to send cigarettes and tobacco to Union brothers who are prisoners of war in German camps. Shipments will be made periodically and each brother will receive 1,000 cigarettes. That

this will be a welcome gift is evident by the letter just received from Brother William E. Weaver, No. 21579, German prisoner of war in Germany.

Brothers Weaver's letter folows:

Germany, March 30, 1944 Seafarers International Union Dear Brothers:

A few lines to let you know we are doing OK under these conditions. Would you let me know whether the bonus is still going on for us prisoners of war and do we still get our wages. I know you can't send me cigarettes from the U.S.A. You can send 1000 cigarettes

from Canada for \$2.00 through

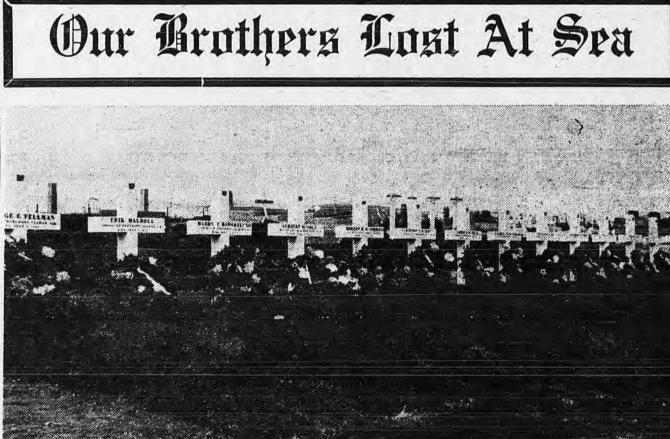

Imperial Tobacco Co., Montreal.

I would appreciate them very much. So keep them sailing. Thank you, as ever yours,

WILLIAM WEAVER, No. 21579

If you know of any Union brothers now in enemy prison camps send their names and addresses to John Hawk, Atlantic & Gulf District Sec'y-Treasurer.

Include the man's regimental number, his prisoner of war number, name of the camp, and any other particulars he may have given relative to the receipt of mail and packages.

Comic Strip Praises Seamen

The comic strips have extolled the virtues of the Navy, the Coast Guard, the Army and the Marines: the nurses, paratroopers, pilots, bombardiers, see-bees and doughboys. They've glorified everybody in a uniform, including the women's auxiliaries, air raid wardens and Boy Scouts.

In fact the only branch of the services they've overlooked is probably the most important of all-the branch that saved England, kept the Russians supplied during the most critical period of the war, carried the goods to Mc-Arthur and participated in every invasion made so far in the warthe Merchant Marine.

Not that it's really important, but we couldn't help but feel a little proud at the belated tribute paid the merchant marine in Wash Tubbs, a syndicated comic

strip appearing in many news-

In addition to a couple of in-

telligent ship-board scenes, the

strip's hero, Captain Easy says:

papers.

Combat Areas

The Board will probably tend that ship sinkings have reduced, in these areas and the newly bounded combat h area in the Pacific is prope the basis of ship sinkings. shall not repeat our argun made heretofore on the fa of setting war risk compens on the basis of ship sinkings if that is the basis for the bounding of combat areas in Pacific, have ship sinkings ar England increased materi While most of the important of the Pacific area have been cluded from the combat area combat area in the Euro

SIU members give lives: Above are the graves of many SIU members. Over 5,500 gallant merchant seamen have made the supreme sacrifice since Pearl Harbor. Close to 2,000 of these were lost in the unequal Battle of the Atlantic in 1942. Some of their bodies were brought to the shores of Iceland and occupy this modest cemetery cared for by the Army.
