On The Board. Marine Firemen's Union jobs go up on shipping board in SIU Baltimore hall as MFOW agent Tom Meyer readies job call. MFOW moved port offices into SIU hall, joining several other unions, including the Masters, Mates and Pilots, AFL Marine Engineers and Baltimore Federation of Labor.

All Saved. First boatload of passengers from grounded Philippine steamer Neptuno comes aboard SIU-manned Steel Admiral. SIU ship rescued 186 passengers from stricken ship without injury or loss of life. (Story on Page 7).

AFL Maritime Unions Vow New Waterfront Drive

Representatives of over 100,000 AFL maritime workers, in the AFL Maritime Trades Department, including the SIU A&G District, have pledged "full physical, financial and moral support" to the drive to unite all longshoremen in the US and Canada under the AFL

banner. Expressing the belief that the AFL-expelled In- pledge" to give the IBL "full and tinuing objective of bringing all Association is crumbling, the dele- of over 100,000 trade unionists. gates declared that a stepped-up MTD campaign under the banner of the International Brotherhood of Longshoremen, AFL, would ity free of mob domination . . . successfully conclude the organizing job in short order.

The MTD meeting, held in New York on June 30, set the stage for a full-scale MTD convention to be held later in the year. Representatives elected new MTD top officials to administer the affairs of the organization prior to the convention. They also undertook preliminary discussions on possible merger problems and pledged mutual aid to member unions on contract disputes and other matters of importance.

Two Expellees

While pledging MTD support to the IBL, delegates noted that there were two unions in the longshore field which had been expelled from major labor federations; the ILA on the East Coast and the ILWU (formerly CIO) on the Pacific Coast. They said accordingly that AFL unionization of waterfront workers would be a "continuing objective" in which they would give full backing to the IBL to win genuine unionism for all longshoremen.

MTD had originally been organized as a separate AFL waterfront department representing seamen, teamsters, longshoremen, operating engineers and other waterfront crafts. With the AFL's expulsion of the ILA, there no longer was an operating longshoreman's section in the organization.

However, the International AFL, received its full autonomy last year and has been successful in firmly establishing itself in the industry, paving the way for its direct participation in MTD.

Officers Named

IBL's key role in future MTD planning was indicated by the election of E. L. Slaughter, secretary of the IBL, as secretary-treasurer of the MTD to serve under Harry Lundeberg of the Sailors Union, who was elected MTD president. Jack MacDonald of the International Union of Operating Engineers, will continue as vicepresident of the organization.

In its statement on the longshore problem the MTD meeting said it was the group's "unanimous

Published biweekly of the headquarters of the Seafarers International Union, Atlantic & Gulf District, AFL, 675 Fourth Avenue, Brooklyn 32, NY. Tel. Hyacinth 9-6600. Entered as second class matter at the Post Office in Brooklyn, NY, under the Act of Aug. 24, 1912.

"Longshoremen," they added, 'must be given the right to genuine trade unionism and job secur-To this end we are instructing our affiliates and our port councils in the United States and Canada to work on all levels toward the con-

Position On

WASHINGTON-With the start of open hearings by the House Merchant Marine Committee on the Bonner proposals for US rule of seamen's contracts SIU representatives are now prepared to testify to set the record straight. SIU of NA president, Harry Lundeberg, will appear at the open hearings as well as Paul Hall, A&G Secretary-Treasurer.

To Testify

Lundeberg and Hall are going in to testify solely in order to counteract the distorted picture given at the hearings by shipowner representatives.

Under tentative plans submitted by committee chairman, Representative Herbert Bonner, wages in the maritime industry would be frozen, and any contract matters affecting wages, manning scales, Brotherhood of Longshoremen, overtime and other items would be subject to the rule of a new Government board.

> In effect the proposals would deprive seaman of the right to bargain on wages and conditions through their unions.

Shipowners Seek Bill

Shipowner representatives have enthusiastically welcomed the Bonner proposals and in the course of the hearings have taken the opportunity to blame all the woes of the industry on seamen and their unions. The shipowners were conspicuous in their silence over inmerchant marine in some Government quarters, competition from American-owned shipping under runaway flags, direct competition from Government-operated MSTS ships and their own failure to explore and exploit new areas of business, such as the St. Lawrence

Propose New

WASHINGTON - Another proposal for study of the maritime industry is in the Congressional hopper with Administration support. The bill calls for Government research into all operating phases of the industry. It has been submitted to the House Merchant Marine Committee.

The purpose of the proposal would be to aim for more efficient and economical operation of merthe field.

her taken a fewer palaritary, end a ce smoother, of well applies a need area bluew

ternational Longshoremen's complete support as a solid group longshoremen in the nation under one banner-the AFL.

> "We therefore pledge as a body, physical, financial and moral aid to our affiliate, the IBL, until this goal is realized."

> Delegates also invited the International Brotherhood of Teamsters to participate actively and assist the IBL in its drive.

> Attending the meeting were representatives of the AFL Radio Officers Union, Masters Mates and Pilots of America, Sailors Union of the Pacific, Brotherhood of Marine Engineers, the International Brotherhood of Longshoremen, the Sailors Union of the Pacific, the Marine Firemen's Union, Marine Cooks and Stewards, AFL, the Staff Officers Union and the Seafarers Union, A&G District.

Glenn David Burke, 3, waits patiently as dad, Billy Burke, bosun, fills out family benefits enrollment card under SIU Welfare Plan. Burke has another son, Patrick, 2, and lives near SIU headquarters in New York. He was last on Iberville.

One of first to receive benefit of new SIU family surgical and hospital benefits is Mrs. Remberto Duo of Miami Beach. She is shown here in Victoria Hospital with her husband and Dr. J. A. Sperepoulos. Mrs. Duo's claim has been paid by the Welfare Plan.

1st SIU Family Benefits spicuous in their silence over industry shortcomings deriving from indifference and hostility to the merchant marine in some Govern-

Five claims totaling \$1,225 have already been paid and ten more are pending in the first month's operation of the new dependent benefits under the SIU Welfare Plan. Of the five claims, one was a minor one, with the averages of the other claims payments being about about \$300 each.

The new dependents' benefits covering Seafarers' wives and nmarried children under 19 years of age went into effect on June 1 and the five claims already handled represent payments to Seafarers for hospitalization expenses and surgery for family members. The other claims are now being processed by the SIU Welfare Plan.

Seafarers who have any questions about the new dependents' benefits, or who expect one of their dependents to be hospitalized or undergo surgery in the near future are urged to get in touch with the nearest SIU port agent.

Contacting the agent beforehand will be of considerable aid in expediting claims since the agent will chant ships through research, de- be able to get the claims procedure sign and developmental work in started immediately. It's also the best way for a Seafarer or a mem-

complete information on this phase of the Welfare Plan.

Under the dependents' benefits, the Welfare Plan covers hospital room and board at the rate of \$10

Eligibility

Under the SIU Welfare Plan, the following are the eligibility requirements for dependents' benefits:

• The Seafarer needs 90 days' sea time on SIU-contracted ships in the previous calendar year plus one day's seatime in the previous 90.

• Dependents who are eligible include the wives of Seafarers and unmarried children of Seafarers under 19 years of age. Get any further details from your nearest port agent.

ber of his family to get full and a day for a maximum of 31 days, plus additional hospital expenses up to \$100. The Seafarer pays the first \$50 of these bills and the Welfare Plan picks up the tab for the rest up to the indicated limits.

The Plan also covers surgical costs according to a surgical schedule up to a maximum of \$300 and doctor's visits to the hospital in non-surgical cases up to \$4 daily for 31 days.

an the minber

Certificates Speed Welfare \$ \$

Payment of cash benefits to Seafarers under the SIU's hospital and surgical benefit plan for Seafarers' families will be speeded up considerably if the Welfare Plan has copies of Seafarers' marriage certificates and birth certificates for their children.

The marriage certificates and children's birth certificates are needed to establish proof of eligibility under the Plan. If Seafarers have photostats of these documents made and turn them in to the nearest Union office, it will eliminate delays in payment of benefits.

All documents will go into the Seafarer's personal file at the office of the Welfare Plan and are strictly confidential.

Crew Restricted, SIU Wins \$8,000 Overtime Claim

NEW YORK-Thirty seven Seafarers who were aboard the San Mateo Victory on a trip to Newfoundland last year will come in for a share of \$8,000 in overtime as a result of recent Union action on a restriction

to ship beef.

The bonanza, now payable by the Eastern Steamship Co., stems from an agreement involving the SIU, the company and Government shipping officials on the "restriction" issue. Payment has been held up pending a final okay by the Maritime Administration on the legality of the beef.

A recent settlement also provided for the setting up of machinery for collecting on this type of beef in the future, SIU Assistant Secretary-Treasurer Claude Simmons reported.

In the future, when the company and the Union agree that overtime is payable for a restriction on a Government-chartered vessel, the company can now pay the men and will in turn be reimbursed by the Government.

The restriction here involved concerned the stay of the San Mateo at St. George's Bay, Newfoundland. The Seafarers were not allowed to enter the military reservation there although the ship lay at anchor for some time.

Shipping Still Booming

Shipping continued moving at a fast pace for all ratings here during the past two weeks, with only chief stewards feeling a pinch, Stewards have been moving out very slowly.

However, the boom for rated engine department men continues as before, with pumpmen still at a premium. Simmons again urged all Seafarers who can qualify for this rating to go up for pumpmen's

SEATTLE - Two more ships were added to the SIU roster when Seafarers in this port signed aboard the Ampac Idaho and the Mojave under a contract recently signed by headquarters with Trans Oceanic Marine Company. The new ships were just so much gravy on a very favorable shipping picture in this port which has been consistently one of the best spots on both coasts for Seafarers anxious to get out in a hurry.

Outlook Good

The two new ships were among five sign ons handled by this port along with a very heavy load of intransits, ten in all. Two payoffs and more vessels due add to the desirable outlook.

for all the action here, in addition been increased 15 cents daily in to the regular Calmar in-transits the Union's most recent negotia-on the lumber run.

endorsements so that they can throw in for these jobs.

He pointed out that the Union has signed several new tankers lately, so that the need for this rating is even greater than before.

5 Years Of

Just five years old this month, the SIU Welfare Plan has paid out nearly \$21/2 million to Seafarers and their families to help them over the rough spots. Of that total about \$11/2 million has been paid out in the last two years of the Plan because of the addition of many new benefits and a number of increases in old ones.

The figures on cash benefits paid do not cover all the Welfare Plan's services. Additional benefits have gone to Seafarers in the form of recreation and dormitory facilities, the meal book plan and the recentlaunched Andrew Furuseth training school in Mobile.

Healthy Backlog

All benefits paid under the Plan are financed by shipowner contributions at no cost to Seafarers. Benefits paid to date include the following:

· Hospital benefits, paid since July 1, 1950 (rate of payment originally \$7 weekly; increased to \$21)

\$693,131.50. Death benefits, paid since July 1, 1950 (originally \$500, increased to \$3,500) \$1,244,978.81

· Disability benefits, paid since May 1, 1952 (originally \$20, increased to \$35 a week) \$107,030 · Maternity benefits paid since

May 1, 1952 at \$200, \$385,400 · Scholarship awards worth \$6,000 per scholarship for four years, since September, 1953: \$72,000

While doing all this, the Plan has built up a healthy backlog of assets in the form of \$1.7 millions in Government bonds while keeping about \$450,000 cash on hand.

The astonishing growth of the Welfare Plan from its modest beginnings in 1950 and its current financial soundness are due in large part to direct Union administration of funds. Self-administration eliminated the normal insurance company take and red tape, reducing operating costs accordingly.

esirable outlook. Shipowner contributions now stand at 75 cents a day, having

American Seamen Win Cargo Fight, '50-50' Law Saved

WASHINGTON-American seamen and the maritime industry won a major pork-chops victory when the House of Representatives crushed a repeal move against the "50-50" law by a vote of 181 to 51. The key vote came in the course of debate on the Government's foreign aid program for the 1955-56 fiscal year.

The vote represented a stunning defeat for foreign shipping lobbyists aided and abetted by elements in the State Department. The for- the jobs of thousands of American problem of agricultural surplus. eign lobbyists had attempted to line up an Administration-farm bloc coalition to upset "50-50." Since the law requires that at least half of Âmerican aid cargoes go in US ships, repeal would have

forced the lay-up of scores of

ships and caused heavy unem-

ployment among seamen.

This is the eighth year in a row that foreign shipowners joined with anti-merchant marine forces to force a floor fight on "50-50". The first fight began with the passage of Marshall Plan legislation back in 1948 and it has continued year by year every time a foreign aid bill came up.

Squeeze On Farm Bloc

Since Congress passed a permanent "50-50" law last year, foreign maritime nations adopted a new tack. Some of them had been refusing to accept shipments of agricultural surpluses in order to put the squeeze on the farm bloc. With farm bloc votes they hoped to kill "50-50" and then monopolize all US aid shipments.

In their anxiety to weaken or repeal this law, anti-merchant marine elements have even gone to the chairman of the House Merchant Marine Committee, Representative Herbert Bonner, to try to persuade him to spearhead a move against "50-50." Members of the Merchant Marine Committee traditionally have been the strongest supporters of the legislation.'

The House vote indicates that the move to kill "50-50" in agricultural shipments or in any other area will meet with short shrift in Congress.

Cost Differences Small

had suffered a severe setback in hearings before the vote when Department of Agriculture spokesmen admitted "50-50" would not add materially to the cost of disposing agricultural surplus. The bulk of such cargo is carried on cargo liners and in this area, freight rates are exactly the same on both American and foreign flag ships,

The rate differences would show up in the estimated 20 percent of surplus cargoes that would be carried on American tramps, total costs of the program involving hundreds of millions in surpluses would be about \$2 million more under "50-50."

Further, should "50-50" be defeated, foreign ships would soon drive many American operators out of business and then would be in a position to charge what the traffic would bear.

With foreign ships carrying over 80 percent of US commercial carseamen. Moreover it would have

As such, maritime observers indicated Congressional willingness | consider the "50-50" vote a tipoff to dump the US merchant marine on Congress' favorable attitude in order to solve a short-range toward a strong US Merchant fleet.

MFOW Welcomed To Baltimore Hall

Baltimore agent, Earl Sheppard (left), gives hearty welcome to Tom Meyer, Marine Firemen's Union representative, as the MFOW in Baltimore officially took up residence in the SIU hall there. MFOW joined several other unions in SIU hall which is fast becoming trade union center of city.

Longshoremen Hail SIU

The leading role played by Seafarers and their Union in aiding the International Brotherhood of Longshoremen's drive on the New York waterfront was commemorated in the

form of a plaque accepted for the SIU by Secretary-Treas- it not for the invaluable assistance urer Paul Hall. Larry Long, the presentation at the headquarters membership meeting of June 29. The plaque was presented because of the SIU's vigorous aid in behalf of IBL-AFL in that union's 1953-1954 waterfront election campaign, as well as for the SIU's continued friendship and support for IBL since then.

Invaluable Aid

In making the presentation, would have been a serious blow to nor come as close to winning were received full autonomy.

given by hundreds of rank and president of the IBL-AFL made file Seafarers and by the SIU organization at large. He thanked the SIU for its steadfast support of IBL since it was first organized

The SIU membership has gone on record on several occasions to assist and support the IBL in the Port of New York and elsewhere. This is still the officially-stated policy of the Union as approved by the membership.

IBL-AFL was originally formed in September, 1953, after the expulsion of the International Longshoremen's Association from the goes, even in the face of US oper- Long declared that the IBL could AFL. It operated under a trusteeating subsidies, abolition of "50-50" not have put up the fight it did ship until last summer, when it

ILA Masquerade Stars Alsop, Higgs

Although it has failed to make any headway as a union in the past nine months, former behind-the-scenes operators of the ILA's disguised crimp rig, the "United International Sea-

men's Union" Local 1824, have + officially taken over and are take complementary ads at anyattempting a new money raising g.mmick. Replacing Louis Le Doulx and Captain George Belibasakas -- the former front men -are Keith Alsop, former SIU Galveston port agent and Bill US ships and harass the SIU. Its Higgs, former Seafarer expelled from the Union last year for working with the ILA to block the AFL drive on the waterfront despite the SIU's membership-adopted policy to the contrary.

Both Alsop and Higgs were active in the attempt to unseat SIU nence to assertions by ILA Presi-Secretary-Treasurer Paul Hall in the last SIU election, an attempt in which the ILA and its president, Captain Bradley, took a hand they were acting as shipping in the form of direct cash contributions to anti-Hall elements.

Cobb Sentenced

The election was climaxed by an attempt to assassinate Hall for which one man, James Cobb, confessed triggerman in the plot has now been sentenced to a prison term, and others, including Ray White, Hall's opponent in the election, are under indictment.

White, Higgs, Alsop and attorney Benjamin Sterling were active in concert during the election campaign with Higgs handling ILA funds and Sterling acting as an intermediary in these financial transactions.

As reported by the Bergen County district attorney's office, Sterling was named by Cobb as the man who was to pay him the balance of his fee for the assassination. Sterling has also been identified with the ILA "seamen's union."

The new fund-raising device Alsop is using is a "souvenir" journal in which "friends" in the mari- out drive in this field, which the time industry are being asked to ILA is attempting to harass.

where from \$7.50 to \$100, depending on which order blank they get. Local 1824 was originally chartered last fall by ILA Captain

Bradley with the intent to raid leaders boasted at the time that they would sign contracts with anybody, anywhere.

Despite these boasts, the new 'union" was difended in the NMU's official newspaper, The Pilot. The publication gave promident Bradley that the "union" would go out to raise standards on foreign-flag operations. Actually crimps by supplying AB's at \$95 per month to foreign-flag vessels without any contract protection to

Actually the record of performance of Local 1824 in the past nine months bears out SIU charges that it was nothing more than a crimp operation. It has no contracts with any American or foreign-flag shipping companies. Instead it has collected "dues" and "initiation fees" from crewmembers of runaway flag ships on the promise of handling their beefs, but has then turned around and shipped new crews to these very same vessels without taking any action on wages, manning scales and working conditions.

The practices of the crimping have brought about its official condemnation by the International Transport Workers Federation, a world-wide organization which includes seamen of major nations. The ITF is now undertaking an all-

The A&G District's shipping

Here is copy of "touch" letter sent out by ILA crimp outfit over signatures of Keith Alsop, ex-SIU Galveston agent, and expelled Seafarer Bill Higgs.

level in the past two-week period available. although falling off an even 100 jobs from the extra-good figure of very favorably with the registration figure of 1,270. Once again, the number of class C men shipped rose, this time to a record high of 120 jobs, showing the lack of

Class A and B men in those ports where shipping was hot.

Outlook Good Further, the future outlook for the District as a whole is favorable although individual ports may do better than others.

The biggest shipping increase was in Norfolk which found itself hard put to find men to put full crews aboard three ships. West Coast ports also did extremely well with two new SIU-contracted vessels coming out of Seattle. The West Coast ports all report that class A men can get out at will

Congress O

WASHINGTON-After restoring many cuts originally made in the House of Representatives, Congress has passed bills providing maritime funds for the coming year. The bills cover operating and construction subsidies, expenses of the Maritime Administration, maritime training and other items.

The key provision on operating subsidies calls for \$110 million against the \$115 million requested and voted by the Senate. It is \$20 million more than was originally voted by the House.

Other funds provided are \$861/2 million for ship construction including \$10 million for a prototype tanker ship and \$23 million for the tanker trade in program. The bulk of the rest goes for passenger ship replacement.

Kings Point and the state maritime schools received their regular appropriations, under the bill.

totals continued to hold to a high with very few in this category

Major ports on this coast held up nicely with Mobile showing conthe previous two weeks. Still, total siderable improvement. Smaller shipping of 1,203 jobs compares East Coast ports with the exception of Norfolk had slow going with few men moving off the beach.

> Class A shipping held very closely to the last two weeks and increased its relative share of all shipping to better than 61 percent. Class B shipping dropped off to 29 percent with class C men getting 10 percent of the available

BOSTON: In summer doldrums; little future prospects...NEW YORK: still doing very well except for chief stewards, tops for pumpmen and other engine ratings... PHILADELPHIA doing well and future looks satisfactory ... BAL-TIMORE: Had very good two weeks and more of the same is due ... NORFOLK: Crewing of three ships cleaned this port out. Set to crew Catherine and expecting two payoffs.

SAVANNAH: Has been slow. Crewing one ship and two others scheduled for payoff ... MIAMI: Shipping holding pace with registration...TAMPA: No change in picture here. Little action expected...MOBILE: Improved from previous status. Outlook is fair with Topa Topa due to take crew and seven payoffs in offing. NEW ORLEANS:-Outlook is fairly good with six payoffs scheduled.

LAKE CHARLES: Holding to fair shipping pace. Enough A and B men available to handle needs for next period ... HOUSTON: Slowing down and outlook is poor. Shipping in past period was almost all deck department ... WILMING-TON: Beach clean of class A men. Outlook is fine ... SAN FRAN-CISCO: Some drop-off expected from very good shipping level. Class A men getting out with ease. SEATTLE: Still a very hot port with a fine shipping outlook. This port has been hopping for weeks now.

bile Workers presented its de- different circumstances, the probmand for what is called the Guaranteed Annual Wage, it touched off a precedent that make their decisions on whether is bound to become a pattern or not to follow UAW without in many sections of our eco- regard to the relationship between nomy. Walter Reuther, UAW their own and UAW's problem. president and head of the CIO, is attempting through GAW to solve a problem which has been confronting his people for years-the problem of the employer pulling auto workers on and off the job to meet the upand-down pattern of production that has always been characteristic of auto manufacturing and to some degree, other mass-production industries.

In Guaranteed Annual Wage, Reuther hopes to find the solution to the unstable nature of employment in auto, by forcing the manufacturers to level off their produc- indications are that the NMU wants tion over the year. Current production methods in the car business, caused by peculiar marketing ment benefit, tied to existing state patterns, involves periods of heavy overtime hours. When the industry is going full blast, the manufacturers not only rely on the regular work force, but, in order to

meet schedules, call in workers from distant areas. When the production schedule is realized, these people are discharged and production goes into low again-the extras generally migrating and the regular worker getting only short work weeks or none at all.

Hopes To Change

Reuther's plan aims at modifylong-time concern over the emity of the auto industry and auto tinued to dry up. In auto, the workers' general welfare. He is seeking to establish that the employer must treat the production worker in the same fashion as the office worker, who is on annual salary and who is not hired or fired according to the fluctuations of manufacturing.

> The National Maritime Union, for example, was the first CIO union to enter negotiations after the UAW plan was laid before Ford, and the NMU settled for a 25 cent per day contribution to a supplemental unemployment insurance fund.

> > Nothing Spelled Out

The NMU agreement provides for working out details within the coming year. Nothing is spelled out as to who will be eligible under the plan, other than that the employer will make the 25-cent payment into the fund. However, to set up something like this: The fund to establish a \$40 unemploybenefit systems. Where NMU men are eligible for state unemployment insurance, the fund would make up the difference between the state payment and the \$40. For example, in New York, where the payment is \$36 a week for unemployment insurance, a man would get an additional \$4 a week from the fund. There is nothing in the plan suggesting payments like a substantial portion of his regular wages, as in the case of UAW.

The problems in the maritime industry are peculiar to the industry alone: In auto factories and in other manufacturing industries, production, sales and income enjoy all-time highs despite the regeneration and growth of foreign competitive products. The US maritime indusing or changing a characteristic of try, though, is shrinking at an the economy and it stems from a alarming rate. Since the end of the Korean hostilities, the US fleet ployers' indifference to the stabil- and the number of jobs have con-

.Insofar as the unemployment in-

At the regular membership meeting of June 29, the Secretary-Treasurer asked for and received membership authorization to reopen the SIU contracts-under terms of the wage reopening clause. The Secretary-Treasurer also asked for authority to seek increased Vacation payments to be paid directly to Seafarers. In addition to these requests, the Secretary-Treasurer reported on the Supplemental Unemployment Insurance Fund negotiated by the NMU, its relationship to the Auto Worker's guaranteed annual wage plan, and its applicability to the maritime industry.

The membership went on record to accept the report and recommendations and further to instruct the editor of the SEAFARERS LOG to publish the details of the report so that it will be available to all of the membership—both at sea and ashore.

states while they are unemployed. In the Class B seniority group, 8 percent of the unemployed men in this category get unem-

ployment benefits.

These two

groups within the SIU comprise the bulk of the regular, professionaly seamen. The Class C man is generally the casual seaman and has no equity which qualifies him as a responsibility of the industry while he is in that seniority status.

SIU Seniority Protection

The very low percentages of men with Class A and Class B seniority ratings who take state unemployment insurance, despite the cut-back in shipping, indicates that in our Union seamen with seniority continue to enjoy job security, with the loss of ships having had its greatest effect on the Class C, or so-called casual group. The job possibilities for these people get slimmer during industry decline. And experience also shows that under such circumstances the casual seaman will leave the industry to try his luck at employment elsewhere.

To provide supplemental unemployment insurance benefits for these men would be somewhat unrealistic, because it would have seniority in the industry and, confund for every SIU man who works, the majority of these would be the men with seniority-the Class A and Class B men. But the principal beneficiaries of the sowould be the casual or Class C seamen, while the Class A and B men would, as our experience indicates, not even be in a position to receive any benefits from the plan.

No Production Control

Moreover, the maritime industry cannot control its production in

keting patterns. In still other given period receive unemploy- other industries for a flow of And in GAW the UAW has effec-

ment insurance payments from the goods. Shipping is a service, as contrasted to manufacturing, and vessels must be ready to move with cargoes dropped on the piers.

Shippers cannot be told that two American flag vessels have already sailed this week and that they must hold off till-next week so that sailings can be evened out-not with Foreign Flag shipping in the field-and tied up right alongside US ships. There is an ever-present pressure of foreign competition which the American maritime control. US auto has no such fears of foreign competition. Americans buy cars, not solely because of the production schedules, but because of their ability and desire to buy.

And, finally, the question of guaranteed annual employment has not yet been found palatable to professional seamen across the board. Our industry has problems for the individual unlike those of

the shoreside worker. The extended periods away from home, in relatively confined quarters on an around-the-clock basis, make it difficult to equate the seamen with the shoreside workers. Outside of the always-existing exceptions, professional seamen have not found it desirable to stay at sea for 50 weeks out of 52 aboard one ship, year in and year out, particularly as they are more and more raising families and establishing homes. That is why the SIU instituted the first industry wide vacation plan, so as to guarantee to every man the money coming to him that he ordinarily would be entitled to in the form of vacation, to be taken at his own timing and convenience.

There are exceptions of course, to be found particularly aboard passenger ships, where personnel will stick to a ship because of the generally short period the vessel is away from its home port.\

As in all cases in attacking a the particular needs of those involved. In auto, the problem was production to assure the regular worker with proper seniority in the auto industry of his fair share of prevent the employer from using the worker as a commodity to be tively made this point. But this is not the type of problem that prevails in the maritime industry. The big problem is to increase the number of vessels sailing under the American flag, and thus swell the number of jobs available to sea-

No Relation To GAW

It appears that, at this moment, the idea of assigning funds to give to relatively few men who may get unemployment insurance payments from the states, a couple of extra dollars, in no way represents the same accomplishment for all seamen, in the manner that guaranteed annual employment does for all auto workers.

This leads to the obvious question which many have asked: Why has the NMU jumped behind the idea of supplemental unemployment insurance? Actually, the NMU did not originally call for this type of unemployment set-up. When CIO president Reuther some time back announced his plans for a guaranteed annual employment and wage plan for auto workers, the NMU took a similar position. When Reuther accepted supplemental unemployment insurance as a stepping stone toward his ultimate objective, the NMU then accepted establishment of a supple-

mental unemployment insurance industry is unable to govern or fund, financed by operator's contributions.

The NMU was the first CIO union to enter negotiations for contract renewal after the CIO Auto Workers concluded its bargaining with the Ford Company for the guaranteed annual wage. Topmost in the mind of Reuther was the winning of acceptance by the auto industry of that concept. Curran obviously wanted to use the NMU bargaining sessions to show his acceptance of the CIO leader's principles, irrespective of their particular relationship to maritime conditions and seamen's problems, and jumped on the bandwagon, so

Curran's ability to follow a line which he feels is politic for him made it comparatively easy for him to endorse the policy adopted by top CIO. He obviously did not make his decision on the basis of the issue involved but rather on the practicality of the politics. Thus it was just as simple for him to hail Walter Reuther and the Reuther plan and push it in his own organization as it was for him to blast Walter Reuther and Reuther's brand of union activities not too long ago when Curran and

some of his Commie Pals followed a line of denouncing Reuther. On May 28, 1943, for example, Curran who at that particular time was religiously following the CP line and was courting for position with the party leaderproblem, the tactics are shaped by ship, found it politic to castigate Reuther in this fashion when he stated: "The Reuther forces in one of smoothing out controllable working alliance with the Trotskyites are instigating strikes ... The Reuthers, Trotskyites, ACTU'ers, are also bent on destroying surance aspect is concerned, our the same manner that auto and the industry's employment and to the war effort . . . They are now trying to cause division in the ranks of the United Auto Workers . . It is our job . . . to denounce

CS Now Building Biggest US Tanker

BALTIMORE-The biggest news as far as the American Merchant Marine is concerned around here is that the Bethlehem-Sparrows Point Shipyard is enlarging its ways so that it can build tankers and ore+-

carriers of at least 50,000 tons capacity.

are hardly any facilities available

Actually the keel for the largest cargo ship yet to sail under the Stars and Stripes was laid on one of these ways only two weeks ago.

The largest single cargo of grain ever loaded in the port of Baltimore went out last week on an SIU-manned ship, the Robin Trent. The ship sailed for Rijeka, Yugoslavia.

It will be the first supertanker built under the tanker-trade-inand-build program, which was passed by Congress last year.

That tanker of 32,750 tons capacity is one of three ordered un-SIU-contracted Cities Service Oil Corporation. All will operate had ended. coastwise between Lake Charles and North Atlantic ports.

All three of the 720-foot tankers are to be built at Sparrows Point. For each of the supertankers Cities Service is trading in two T-2 types.

Laying of the keel on the first of these on the new way was an elaborate ceremony, said to be the most elaborate held for any keellaying in the nation.

across into position by the giant available manpower. cranes, seven "godfathers" stood He cautioned again, however, by with white gloves to help push that there are enough class A and it firmly in place by means of class B men registered at the hall seven specially-attached stanchions, to handle all expected jobs, so that on which were fitted special brass no one should get a mistaken idea knobs inscribed with the data conas souvenirs.

This is important because there Lake Chas. for commercial ship construction in the giant class in the United States **New Pact**

LAKE CHARLES - AFL painters here marked an extra celebration over the July 4th holiday weekend, as the threat of a possible lockout vanished with the signing of a new contract last Friday, July 1.

Speculation up to the pact deadline had indicated a probable lockout by industrial contractors with whom the painter had been locked in a dispute for some time.

Painters Union spokesmen reported the new settlement agreeable with all hands, ending the der this special program by the chance of a full-scale work stoppage this week after the holiday

In another labor development, the AFL Metal Trades Council is tions with the Firestone Rubber Company.

Port Smooth

Affairs of the port, meanwhile, continue to run smoothly. SIU Port Agent Leroy Clarke pointed out that a fair amount of ships paid visits here during the past As the flag-bedecked section of two weeks, each taking a few rekeel-40 by 44 feet-was moved placements and cutting down the

of the present shipping picture.

Ala. AFL Leaders Visit SIU

While touring SIU Mobile hall, Ala. AFL leaders Carl Griffin (left) and W. L. Huffaker hear about SIU training school plans from Cal Tanner, port agent. Griffin and Huffaker recently were elected president and first vice-president of Ala. State Federation of Labor.

Gov't, Operators Settle Lawsuit For 23 Ships

New Law To Cargo Biz

MOBILE—All segments of the shipping industry here are hoping that the longawaited upsurge in activity for this port may come about soon as the result of a bill just passed by the State Legislature giving control of the State Docks back to the Gov-

The measure was bitterly opposed by the anti-labor group here, headed by ex-State Sen. Tom Johnson, who was defeated for reelection by a large labor vote last year. Johnson is the author of the state's controversial "right-to-work" law.

Backing the bill, Governor Folsom announced that one of the first steps he would take under his new powers would be to open up shipping terminals as far away as Jackson, Ala, This would extend the Mobile waterfront some 75 miles and help to provide greater service to shippers at less cost. Shipping Up

Shipping during the past two weeks showed a marked improvement over past periods, although the relief was considered only temporary at this time. The dispatcher shipped 123 men to regular jobs and another 112 to relief jobs around the harbor.

However, the good shipping can only be attributed to that fact that three ships, the Ames Victory, Topa Topa and Claiborne, came out of the shipyard and took full crews. Prospects for the coming two weeks are expected to be slim once again.

Port Agent Cal Tanner also suggested that Seafarers should note the change in the location of the USPHS outpatient clinic, starting this week. The new clinic is at the Custom House on St. Joseph St., cerning the keel-laying to be kept No sudden boom is in prospect violation of the Ship Sales Act. cates that a similar arrangement in the downtown area close to the

YOUR DOLLAR'S WORTH SEAFARERS GUIDE TO BETTER BUYING

Written for The Seafarers Log by Sidney Margolius,

leading expert on buying

Buying Calendar For July

Your living costs will be a bit easier for this month if you take advantage of the many July sales and clearances, especially of clothing, to anticipate your needs.

cut-price sales are only the prelude to a new boost in living expenses in late summer as pork, eggs, milk and other important staples embark on their seasonal price climb. All that the recent "remarkable stable" period of living costs, as the U S Bureau of Labor Statistics described it, has meant to moderate-income families is that retail prices leveled off at record highs while prices of wholesale commodities went down.

Used-car seekers will also find price cuts in July as tags on second-hand vehicles get the traditional post-July 4 trimming. In new cars, current inventories are reported to be close to the heaviest in history, so shop for the best deal. The '56 models will be moving into dealer's hands in the second half of the year, with a little improvement over the '55 cars, especially in torque (forward thrust). The '55 models themselves have been acclaimed by experts as showing a noticeable improvement in roadability and handling over previous years.

Sales On Shoes

Perhaps the most useful July sales are the semi-annual shoe sales, with most stores and brands offering 10-20 per cent off on staple styles. Shoes are the only clothing item which have not dropped in price these past two years, and even actually rose further this year. So it's valuable policy to time the family's shoe buying for July and January when possible. Here are buying tips on shoes and other goods:

Shoes: Proper shape and fit are pretty nearly as important as quality in determining how much wear you'll get from shoes, as well as their comfort. Do you know

how to tell whether the last is right for you? According to experts, the heel seat should grip your heel firmly but without binding. The shoe should also conform to the nauural shape of your foot, and be as straight along the inner edge as possible. If you put your feet together, your shoes should touch at the heel, and from a point just in back of the joints of the big toes up to the end of these toes.

Manufacturers' sizes vary. Always try on both shoes with your weight on them, making sure there is a halfinch of space beyond your toes and that the big joint of your big toe comes just where the sole rounds in on the inside edge.

Welt Construction

Shoes made with a "Goodyear Welt" are generally most durable and comfortable, and can be repaired most neatly. In this construction, the upper is not attached right to the sole, but both upper and sole are sewn to a thin strip of leather called a welt. You can run your hand inside a welted shoe and find the insole is smooth with no signs of tacks or stitches.

A good many women's and children's shoes are not made with the welt construction, however. Lower-quality shoes often have upper and sole stitched directly together. Such shoes cannot be as neatly repaired as welt shoes. Some better-quality women's shoes are made without welt, but with insole held together with tiny staples and a lockstitch. You can see the lockstitch if you lift the thin lining over the insole, but in well-made women's shoes, you won't see any signs of staples or tacks.

Home Appliances: Another combination washer and dryer, by Westinghouse, has come on the market. Like the Bendix combination already out, the machine goes through the entire cycle of washing and completely dry- subjected to sharp price-cutting.

ing clothes without you touching them. The only laborsaving you get from a single wash-and-dry unit over a separate washer and dryer, is that you don't have to lift the damp clothing from one machine to the other. Nor is there any price advantage. Both the older and new combination washer-dryer have make-believe list prices of \$525 and \$530 (actual selling prices run 20-30 per cent less depending on the competitive discount situation in your locality). At the same cost you can buy a team of top-quality separate machines. But there is a noticeable space-saving advantage in the single washer-dryer units. The older model, by Bendix, is 36 inches and the new Westinghouse unit it 32. In contrast, a separate washer and dryer are usually 29 inches apiece-58 for the team.

Repairs Sometimes Costly

But there is a concern over the matter of repairs. Owners' and repairmen's experience with the washerdryer already on the market has been quite uneven. Some have operated all right, perhaps because owners gave them good care, while others have needed frequent repairs at heavy cost. Motors and heating elements are all noticeably more costly to replace than for separate washers and dryers.

Rugs: Families seeking to buy carpets in the midsummer sales will find them more expensive this year. Mills raised wholesale prices as much as six per cent this spring. Some retailers have inventories purchased at lower prices on which they have not raised tags, so comparisonshop for these better values.

Foods: Pork prices have been going up. Beef is still in heavy supply and reasonable. Look for specials on beef to stock up your freezer, too. Another money-saver at this time is canned tuna fish, in heavy supply and being

ALCOA RANGER (Alcoa), May 29—Chairman, H. Franklin; Secretary, R. Brein. Explanation of new Welfare Plan benefits was given by headquarters. SIU Crew Rescues 186 From Storm-Stricken Philippine Ship

Philippine passenger ship Neptuna (left) sits high on the rocks as lifeboats loaded with passengers leave her for trip back to Steel Admiral. At right, yacht Altair comes alongside for provisions in first of two rescue operations.

A masterful rescue operation in which 186 passengers were saved was performed by the SIU-manned Steel Admiral in stormy Philippine waters. Despite darkness, heavy rains and high seas, crewmembers of the Admiral carried out a difficult rescue of passengers from

the beached Philippine+ steamer Neptuno in which all were taken off safely with their baggage.

This was the second rescue of with fresh provisions.

Spotted Lights

The Admiral was headed for Manila during the darkness of early morning when it spotted the blinking lights of the Neptuno, which had run aground high on a rocky beach on Marinduque Island. Coming in as close as possible to the rock-strewn shore, the Admiral undertook rescue operations at 6 AM and in the next three hours succeeded in getting everybody off the ship unharmed, making use of both ship's lifeboats.

All of the rescued passengers were then taken to Manila which sas their original destination.

The Neptuno, a 560-ton interisland steamer, had run completely up on a reef and torn a gaping hole in the bottom. Philippine newspaper accounts described the rescue operation as an heroic one.

Previously while six days out of Honolulu the Admiral had come across the yacht Altair with four passengers aboard. The Altair had run out of food and was flying distress signals when the Admiral

Philipine newspapers were lavish in their praise of the Admiral's crewmembers, calling the rescue work "heroic."

Take Gear If **Going Aboard**

NORFOLK — Seafarers reporting to work aboard ship are reminded that they are required to bring their gear with them.

Norfolk SIU agent Ben Rees reminded Seafarers that the membershipadopted shipping rules clearly defined this requirement. He reported that a number of problems had arisen in the Norfolk port area as a result of Seafarers reporting aboard and then taking time off to go get their gear.

SIU Co. Plans Revival weeks before, it had given aid to a yacht in distress, and supplied it Of Intercoastal Trade

BOSTON-This port is keeping its eye peeled for future business with the announcement that the Pan Atlantic Steamship Company plans to revive Waterman's old intercoastal run under a temporary ICC

cerfificate. The old Arrow Line run was given up by Waterman when it was sold to the C. Lee Company representing Malcolm McLean's interests. Now Pan Atlantic has announced it will renew the run late in July.

At present Boston is not on the schedule but chances are fair that it may be added at a later date.

Pan-Atlantic also has plans for including Boston on its trailership coastwise service, but that is a long way off.

There was an unfortunate accident aboard the Government Camp | days.

here when chief pumpman J. L. Fontenot died, apparently of gas fumes, in the tanker's pumproom. Fontenot had entered the pumproom to make some repairs. When he didn't show up, other crewmembers found him in the pumproom and were unable to revive him.

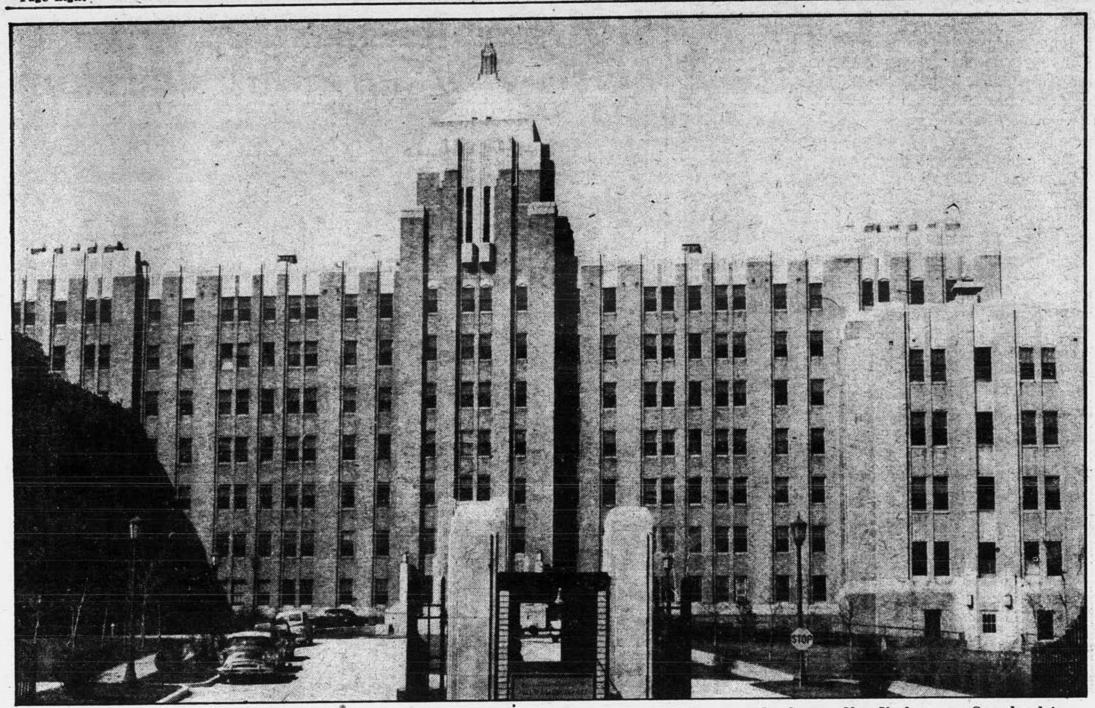

Another Seafarer, Brother George N. Clarke passed away in the Brighton Marine hospital on June

Not much action is in sight on the shipping front, port agent James Sheehan report's, as Boston is largely a tanker port these

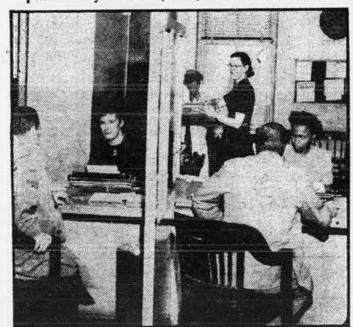

That Pleasant Feeling At Payoff

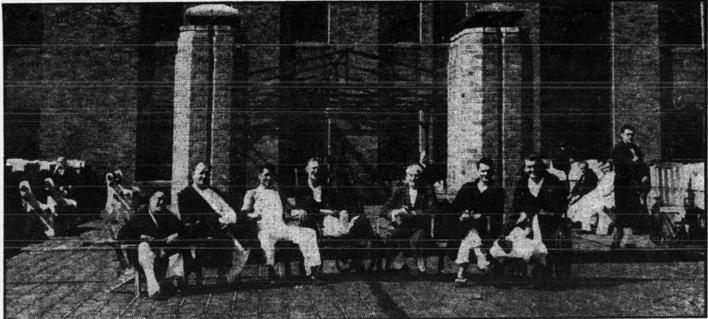

G.J. Bozec, oiler, (left) and John Hartman, utility messman, on the Alcoa Ranger count up the cash after the ship was paid off in New York recently. Ranger is on East Coast to

Largest of the USPHS hospitals with a 1,000 bed capacity is the one above at Staten Island which serves the Greater New York area. Completed in 1935 the Staten Island institution is the successor to a previous marine hospital on the same site. In an average year the hospital offers 250,000 patient days of care, and, as Seafarers can testify, does it extremely well.

Busy outpatient department at Staten Island handles 86,000 visits a year on average. Outpatients register here.

Favorite spot with patients on mild, sunny days is this open sundeck, one of two, which offers a fine view of harbor bustle. Hospital also has glass-enclosed solarium, canteen and other recreation spots where Seafarers can relax while convalescing.

Hospital's large pharmacy compounds thousands of prescriptions for both inpatients and outpatients.

Well-equipped physical therapy room is key treatment center. Shown here are group of Seafarers undergoing treatment. That's Charles "Whitey" Oglesby in center. Physical therapy is key to restoration of full muscular function after an injury.

AY back in the administration of John Adams, the 2nd president of the United States, Congress passed legislation providing for the establishment of marine hospitals to care for sick and injured seamen. At that time, over a century and a half ago, it was believed that the special circumstances under which seamen worked-the high accident rate on ships, the contact with a wide variety of infectious diseases in foreign ports, the long distances between ports and the seaman's home town-made establishment of hospitals to care for them an obligation of the Federal government.

Today the same reasons which impelled Congress to establish these hospitals in the first place are still as valid as ever.

Aside from caring for thousands of sea-

men yearly and taking a huge burden off local port hospitals, the USPHS institutions treat Coast Guardsmen, veterans and other Federal employees who are eligible for hospitalization.

In the course of their work, USPHS hospitals have pioneered new avenues of treatment in cancer, tuberculosis, heart diseases and other ailments, making a notable contribution to the nation's fund of medical knowledge.

As far as the public is concerned, the investment in USPHS through the years has been repaid many times over. For the Seafarer, USPHS has meant a place where he can get first-class treatment in friendly surroundings so that he can get back to the business of being self-supporting in jig time.

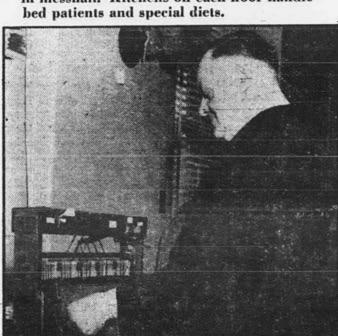

Library boasts 7,000 volumes and peaceful reading room in hospital basement. H. R. Hansen enjoys a new book.

Dental clinic and adjoining dental tech-

Mike Michalek gets some lunchtime chow in messhall. Kitchens on each floor handle bed patients and special diets.

Voskian is a New Jersey native who lives in Newark. He joined the SIU in 1947 and sails in the engine department.

Getting Shaggy? Use Meal Book

Seafarers on the beach in New York, Baltimore and Mobile can now get hair trims in the style of their choice simply by presenting their meal books in the SIU-operated barbershops in those ports.

Arrangements have been made through the Welfare Plan so that the meal tickets, which are extended on credit to Seafarers waiting to ship out, could also be used for spruce-up purposes where there are barbershops operating in Union halls.

DO YOU KNOW -BENEFITS? YOUR WIFE'S BENEFITS? YOUR FAMILY'S BENEFIE

The CIO Women's Trade Union League was headway on labor relations with voted at a special membership the authority-type of administrameeting of the organization. The tion.

Transit troubles beset another major city as AFL Transit Workers in Washington tied up the city's trolleys and buses in a contract dispute. The union has been asking for a 25-cent hourly increase and requested arbitration on the issue. Company officials said an increase would call for a corresponding fare rise. The strike caused a stupendous traffic jam in the nation's capital.

Struck steel plants stayed closed for just one day as the CIO Steel Workers Union and major steel producers reached an agreement for a general 15-cents-an-hour wage increase. Other contract provisions were not at issue since the steel negotiations were a reopener on wages only.

'50-50' Wins Again

Good news for American seamen came this week as an overwhelming Congressional vote crushed an attempt to scuttle the "50-50" law. Foreign shipping lobbyists who had lined up an anti-"50-50" bloc with the support of the US State Department have retired temporarily to lick their wounds.

While Seafarers can be pleased with the outcome which preserves large numbers of jobs that might otherwise be lost, this vote proves that the SIU can never af-

ford to relax on the "50-50" issue.

For six straight years, beginning in 1948, American seamen and US ship operators had to fight in Congress to preserve "50-50". Finally, last year, Congress passed a separate bill making "50-50" the law for all foreign aid shipments, not just a statement of intent that had to be repeated with every aid bill.

It was thought then that "50-50" was secure for the future. Instead, foreign shipping lobbyists lined up a potentially dangerous combination of farm-bloc legislators and Administration forces. The tactics of these lobbyists added up to political blackmail, since the farm bloc Congressmen were told that unless "50-50" was thrown out foreign maritime nations would boycott US agricultural surpluses.

Fortunately maritime interests were alert to the move and the good sense of Congress prevailed. But the foreign lobbyists will obviously bear watching in the future.

Award To Seafarers

The outstanding efforts of Seafarers in last years' waterfront drive were recognized last week when the International Brotherhood of Longshoremen, AFL, presented a plaque to the Union thanking the SIU for its aid. The role of hundreds of rank and file Seafarers in that drive was certainly one which reflects credit on them and their Union. The SIU was a key unit in that campaign and still remains a staunch ally of the IBL-AFL.

The plaque award comes at an appropriate time. Despite the outcome of the last waterfront election the AFL-outlawed International Longshoremen's Association has muffed its grand opportunity and is faced with growing internal difficulties. The SIU membership has pledged that it will continue to assist IBL-AFL in its efforts to see that New York longshoremen get a

real union.

MTD's Plans

Along these lines it should be noted that the AFL Maritime Trades Department has important plans affecting longshoremen on both coasts. The recent meeting of the New York Harbor Council of MTD took note of the chaotic situation within the ILA and indicated renewed organizing efforts in support of IBL-AFL. Later this year MTD intends to hold a convention at which the first order of business will no doubt be an appropriate move to put the skids under the ILA in New York. on June 12, 1955,

-- And Still Growing

Just five years old, the SIU Welfare Plan certainly belies its age. In that short period the Plan has instituted a wide variety of superior benefits and has paid out \$21/2 million in cash to Seafarers and their families, the bulk of it in the last two years, to say nothing of other benefits-recreation facilities, and low-cost food and lodging for Seafarers on the beach.

With the new family benefits now in effect and the significant increases in benefits previously existing, the amount of direct cash benefits to Seafarers seems cer-

tain to go up year by year.

In a sense the Welfare Plan is still young and hasn't reached full growth. Once the impact of recent benefit increases has been assessed, Seafarers can look forward to further gains in the future. Addies some some sentital

Award On 2d7

The news that he won a \$6,000 SIU scholars hip award for 1955 hasn't made much of a dent just yet in the plans of Lembhard "Lem" Howell, 19, of New York City. Announced on June 21, the awards to two working Seafarers and the children of three

others provides for four years of study at the college or university of their choice and in any field of study.

But Howell, the son of Seafarer Cleveland A. Howell, who's now

aboard the Beatrice (Bull), will have to wait a little while before he can sit back and really what he wants to do for the next four years.

Uncle Sam ex-C. A. Howell ercised a prior claim on him on June 27, when Howell reported to the Naval

Training Center at Newport, RI, for six weeks of training as a Naval Reservist.

This is the first of a series featuring the winners of the 1955 SIU scholarships, each worth \$6,000.

Interviewed at home two days earlier, the lanky youngster was happy over his good fortune at winning four years of pre-paid schooling. "But where I'll go is still up in the air. Thanks to the SIU, lots of places are open to and I think I can make the grade," me now that I couldn't shoot for before," he explained.

A graduate of Charles Evans Hughes High School (formerly Staubenmuller Textile HS) with a number of honors last June, he something like that eventually."

All set with \$6,000 SIU s c h o l a rship award, Lembhard Howell, son of Seafarer Cleveland Howell, catches up on some advanced study at home. He intends to study

lege of New York for the past year followed on his miss in 1954, when lor of Arts degree.

"Now I'm going to try for law. It's a good background in any field he said. He's hoping he'll be accepted at American University in Washington, DC, for the fall. "I think I might like to wind up in the Government service or

has been attending the City Col- | The youngster's win this year

working toward a straight Bache- he originally applied for the SIU scholarship. "I had to take the College Entrance Exam again, but it was worth it, especially the way things worked out," he noted. "I guess I was luckier this time,"

Fine Record

Holder of an enviable high record, Howell was president of his school's general organization in his senior year, a member of the Arista honor society and a staffer on the school newspaper as well as a couple of departmental publications.

Among other honors, he walked off with five separate awards at graduation, including the school's' coveted "Dooley Award" for scholarship, character and ability, and separate citations in science, social studies and school service.

One of five children, Howell, two older brothers, and a younger brother and sister were all born in Jamaica, BWI, where he took his early schooling. Their father first came to the US during the war in 1942 when he worked in a shipyard. By 1945 the family had moved here and Lem, at the age of 10, entered the fifth grade of Public School 186 in upper Manhattan.

Howell Senior didn't start going to sea until 1947, when he began sailing in the steward department with the SIU, and he's been providing for his family with his earnings as a Seafarer since that time. The two older boys, Roosevelt and Cleveland, Jr., are in the Army and Navy right now; the two younger kids are still at school.

FINAL DISPATCH

farers have been reported to the Burial took place at St. Ann's Cem-Seafarers Welfare Plan and the etery in Mamou, La. He is survived \$3,500 death benefits are being by his wife, Mrs. Alice Fontenot, paid to their beneficiaries:

Pioneer's Scoops Mean **Curtains To Mosquitoes**

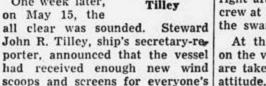

Lady Luck smiled on the Seafarers aboard the Alcoa Pioneer recently enabling SIU crewmembers to outwit the mosquitoes that lie in wait along the Mississippi on the way to

New Orleans, itching for a

Beginning on May 8, the ship's crew meeting minutes record a request that porthole screens and scoops be provided for the crew, due to the warm weather. It was also noted at the same meeting that the chief engineer was to be contacted and asked to check the

fans, get needed spares and repairs, oscillators, etc., to "put out a good amount of air." The Pioneermen abviously do not take t h i s summer lightly.

nibble at unsuspecting travel- porthole, as well as for the messhall, pantry and recreation room. These were due to be put out, he said, as soon as they got to sea after New Orleans, and they (the screens) were painted.

Lone Voice

However, one lone Seafarer voice raised in the wilderness held firm. The unnamed Seafarer, unwilling to face another onslaught of mosquitoes on the trip to New Orleans, said he and others would gladly pass up having their scoops and screens fashionably decorated, if the gear could otherwise be put to work immediately.

This proposal met with favor on all sides and was put into effect right after the meeting, giving the crew at least a 50-50 chance against

the swamp marauders. At this writing, all seems well on the vessel. Only the mosquitoes had received enough new wind are taken aback by the unfriendly

Tribute To 'Moon' Kouns

To the Editor:

These are just a few lines in memory of one of our departed brothers, Martin "Moon" Kouns, who passed away July 17, 1954, due to a heart ailment.

Brother Kouns was wellknown throughout the SIU-A&G District and even throughout the world. He was well-liked, and had a kind word for everyone. Those few brothers who don't recall him may remember

Letters to the Editor

him as the doorman at the New Orleans SIU for several years.

I've run across many Seafarers who didn't even know that Brother Kouns had passed away. In fact, some of them even asked about him last month. He was so well-liked, nobody could figure he would be gone sometime.

I hope all Seafarers will join with me in saying a prayer for him. "May the souls of the faithful departed, through the mercy of God, rest in peace."

Duska "Spider" Korolia

Air-Conditioned Ships Proposed

To the Editor:

As ship's secretary-reporter on the Steel Traveler (Isthmian), want to report that the trip so far has been fine, with good chow and no major beefs. \

However, when we were lying in Bombay, with the temperature around 100 degrees and our rupees had run too short to allow us to sleep ashore, things were pretty miserable.

Then, as if to make matters worse, along comes a foreignflag Liberty ship all air-conditioned. We know we have the best working conditions in the industry, but it looks like somebody is getting ahead of us on this deal.

At our last general meeting on board here, a resolution was drawn up and sent to the negotiating committee asking it to see what could be done to remedy the situation.

It was also suggested that this matter of air-conditioning be brought out in the LOG so as to get the membership's reaction on it, and that is one of the main purposes of this letter.

> J. A. "Blackie" King 本

Cheers Program Of Welfare Aids To the Editor:

I want to give a sincere vote of thanks to our negotiating committee for the new welfare benefits for which we became eligible recently.

I am referring to the increase in hospital benefits and the opportunity to provide our wives and children with proper medical care. In addition, the new disability benefits will enable our retiring seafaring brothers to make ends meet much easier, thanks to the \$15 weekly increase provided for

Another big gain is the welfare program for unemployed Seafarers waiting to ship. These things are a welcome benefit

for all of us, and they are a wonderful idea. It was not too long ago that we couldn't even dream of such benefits.

For these reasons, "hats off" to our welfare representatives and Union officials. I known all-SIU men join me in this.

Pete Villabol

* * * Alcoa Clipper Runs Smooth

To the Editor:

Everything here on the Alcoa Clipper is running smooth.

We haven't seen our ship's minutes in the LOG yet and wonder when they'll be printed. We also didn't receive any LOGs on arrival in Port-of-Spain, Trinidad, on June 13.

Our ship's committee is handling everything as it comes along. This includes Harris H. Patterson, ship's delegate; Russell M. Grantham, deck delegate; Lee A. Smith, engine delegate; Paul E. Read, steward delegate; (galley); Rueben Belletty, steward delegate (topside): James W. Barnett, treasurer, and myself.

All the brothers aboard were glad to receive the news about the Welfare Plan and the new family benefits, and wish to give our secretary-treasurer and our Union officers at headquarters a vote of thanks for a job

Joseph A. Rusheed Ship's reporter

(Ed. note: Ship's minutes are published in the LOG as they are received. Your ship's minutes will appear in a future issue. Issues of the LOG are sent to all vessels, according to itineraries furnished by the companies. The LOG dated June 10 probably got to Port-of-Spain after your arrival there June

t t t Hamill Heading **East These Days**

To the Editor:

Here's another missive-missile from the SS Marie Hamill, the galloping tub of the seven seas, now headed for a few more Asiatic countries as we depart from the fair village of Yoko-

A few hearts seem to have been broken when this vessel was taken off the Northern European run and, in fact, quite a few of the boys quit the ship in order to get one headed back that way. But we hope that of the ones that did stay for this voyage that the belles of Nippon can mend their aching hearts in a hurry.

There are no squawks to neak of at the present writing but one brother says they put too much milk on these ships. Well, that's one for Westbrook ("I don't agree with anyone") Pegler to juggle around awhile before starting a blast, for it was not too many years ago that he stated that the men of the US merchant marine were being served too much soft, rich food and too many delicacies.

To him we say: We earn them and we have the SIU to see that we get them.

Trick On Steward

Some of the boys aboard this ship have requested that I extend their sympathy to the steward for playing a mean trick on him a few nights ago. When he walked into the crew messhall, someone told him that they were using coffee beans in lieu of poker chips.

Well, he took one look and stepped outside, dropping a tear from each eye. However, since

we don't want our good man "Coffee Bean" Jones to worry about it, the truth is that those were red pinto beans the boys were using.

I'd like to use this medium to thank Brother C. V. ("The Bull") Berg, ship's delegate for the past two voyages, for doing such a good job, and also for assisting me in fearning the score after being elected delegate for this trip. He was a great help in explaining the duties of the job.

It would probably be a great help on all ships if the outgoing delegate would do the same for his successor, whether he's getting off or staying on the ship.

Benefits Please Alcoa Pennant

To the Editor:

We, the crew of the Alcoa Pennant, would like to go on record as being very grateful to our headquarters negotiating committee and welfare officials for obtaining the welfare plan for our families.

We think this deserves a vote of thanks for a job well done.

H. G. Sanford Ship's delegate 1 1

SIU Payoffs Put **Him In Business**

To the Editor:

This is sort of a farewell note to all my shipmates and the friends I've had the pleasure of sailing with under the SIU

I've retired my book because I am now operating my own tavern in Perth Amboy, NJ, thanks to the wages and conditions made possible by our SIU contracts. I wouldn't have been able to do it winout those SIU payoffs.

If any of my friends are around Perth Amboy, stop in at the "Seven Seas Cafe," 170 New Brunswick Ave., and say hello. There'll always be the latest LOGs, good information and a square deal for all hands. I'm situated only a block from the main stem.

Incidentally, congratulations to everyone responsible for obtaining the best welfare plan in the industry. Keep up the good work and, above all, keep up our fine record.

Joseph Fidalgo

Old-Timer Passes Away To the Editor:

An otherwise smooth voyage by tragedy in the port of Ciudad Trujillo, Dominican Republic.

One of the older members of the Union, Elmer J. Shipp. passed away of natural causes in that port. Shipp joined the SIU in the Port of New York on January 6, 1939. "Blackie" as he was also known, sailed in the engine department mostly out of Baltimore and Norfolk. He was oiler on the Frances.

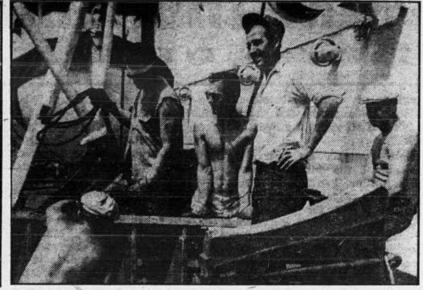

His remains are interred in Ciudad Trujillo. The captain of the Frances, M. G. Fleming, conducted services aboard which were attended by all.

Shipp was popular with all and disliked by none on this ship which is about as good an epitaph as any of us could want. We all miss him and we're sure his many former shipmates and friends ashore will also.

> V. Janssons Ship's delegate and crew, SS Frances

Work And Play On The Cecil Bean

Ever Try 'Neapolitan Fish Stew'?

When we think of Italian-style cooking, many of us are all too apt to think exclusively of meatballs and spaghetti drenched in tomato sauce. How wrong we are, comments Seafarer Ben Grice.

have a way with all food. for "Neapolitan Fish Stew." Take a fish stew, for example, American fishermen of Italian descent have popularized this dish in the localities in which they live and it has become famous among gourmets the world over.

"More people should try this delectable dish, gently seasoned with oregano and basil—it's a main dish in itself, with the possible addition of a crisp green salad and a long crusty loaf of Italian bread such as our good Brothers Harvey Lee and Richard Geiling make."

For those who have read this far

Somewhere in the black of night, A ship is crashing through the seas:

Its bow dipping, scissor-cutting water.

To the insatiable hungering darkness,

The captain, in his cabin sitting,

Sounds flat, and unattended to."

And whistles with the wind.

Listens to the tune; no musician he.

Ripping and tearing up the liquid form

And tossing flecks of phosphorescent foam

The weird shrieking of the wind whistles

A mournful dirge to the Captain's bridge.

But a great critic listening to the melody.

There is the stomping of boots on the deck,

Lonely in the highest, smiles contentedly

Many hands batten down the canvas; the critic

While 'round the booms and through the rigging,

He speaks, "The flapping of tarpaulins over empty hold

Schedule Impossible

Security Plan mean to us?' It by scheduling his ships? The sheer | Where it is not in practice, as in

These attempts by Curran to take almost the identical words which Walter Reuther in effect uttered with respect to auto manufacturers makes for a muddled picture and no small degree of confusion as to just what Curran is talking about other than that pushing a Reuther project regardless of its applicability to maritime and the professional sailor.

Despite the muddled gobbledegook of Curran's report on unemployment pay, he suddenly found clear prose when he dropped on NMU seamen the second part of ers "for the first time be concerned his so-called employment security plan, and that is the compulsory stable work force? The fact of the vacation set-up for NMU men which is tied in with it. Curran is apparently anxious to force NMU ing, with no relationship to sen- members off the ships after one iority. The shipowners' employee year of employment-particularly requirements are laid down for its passenger ships where a great each unit of employment (the ship) number of the members are Proof of this is shown by the by virtue of the manning scales in employed, as a means of creating fact that Reuther's union explained the contract. He will hire no more jobs. Thus when these men get off to its membership in clear, con- and can hire no less. And he will the ships, the NMU will tell them meant to them. Not so with the ty rules the NMU has in their they can get an additional four NMU. Although Curran hailed it contract, no more and no less. If bucks a week in unemployment

Virtually all other maritime unions have submitted the idea of compulsory vacations to their memberships in referendum votes. these fakers whose lust for power companies under contract will be obvious to anyone who knows cause the men have rejected it by makes them willing to play Hitler's concerned money-wise in maintain- anything at all about the maritime referendum vote, following long within the union publications, on the floor of membership meetings asea and ashore.

The matter of compulsory vacations has not only been an issue in the SIU, but in all maritime unions, including the National Maritime Union. But rather than submit the issue to a vote as done in all other maritime unions Curran flatly announced that vacations in the NMU are now compulsory, as per contract. Curran thus slipped a controversial issue over on his membership by wrapping it in a high-sounding package labelled "Employment Security," which in affect pushes a man into unemployment as part of the contract without that man having had a right to vote on the issue.

Controversial Issue

How hot an issue compulsory vacations are in the NMU was shown in an editorial of the June 23 Pilot, the same issue in which Curran announced the "package" deal which included compulsory vacations. The editorial stated:

"As for taking vacations, well, the men on the beach say, 'Take the bums off the ship and let us have some work.' When the men on the beach get on board ship they become very conservative and they tacked for political purposes, rathsay, 'What am I supposed to give him, a cut of my wages?' Well, the companies and the Union can iron out these difficulties with proper negotiations. And, while it ought not take that long, actually the job-seeking Tonsina plan, he there are three years before the next contract, and everybody should be happy in 1958."

Curran obviously does not intend to submit the compulsory vacation issue on its own merits alone to a membership vote-anymore than he submitted the question of opening the NMU membership books to a vote by NMU men. At that time (Nov. 25, 1954) Curran said to NMU members:

"Your president recommended that the books be opened . . . Our members lost nothing by opening the door . . ."

But the NMU Secretary-Treasurer Hedley Stone had a more realistic view of the effect of opening the books on the membership. in view of the fact that the Inter-

(You are saying) "to the hundreds of thousands that have sea- manian, Honduran and Liberian men's papers, that we have 23,000 ships under contract and to raise jobs here, come in boys, stand in their wage and manning scales.

and Company) say, look, you are going to die anyway, so commit suicide . . .

At any rate, NMU members never voted on the issue of open- that payments to beneficiaries ing the books and thereby its resultant effect on their job protec- for the greatest number. It aption. The NMU rank and file view of this development was opposite that of Curran's. They obviously ielt that it would lose them some- the basis for employer contributhing, even if Curran said it wouldn't. When the NMU membership floodgates opened, the men aboard the ships froze onto their the beach if they quit their jobs.

means that, for the first time our stupidity of this statement is the SIU, A & G District, it is be-jous action of flooding the NMU membership, had frozen them. And to wrap it in a salable package months of discussion and debate while at the same time serving his political position in relation with Reuther he succeeded in getting the subsidized shipowners crowd, led by US Lines' John Franklin, to give him something to make the pitch with. And Curran just happened to have the Supplemental Unemployment Insurance idea, which he now calls Employment Security Plan, in his pocket, And that was it!

Problem Different

Supplemental unemployment insurance is not the area, then, where anything is accomplished at this point for the professional seamen with any degree of seniority

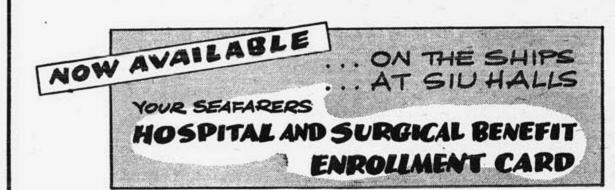

protection. The problem is to increase the number of ships and thereby the number of jobs available to the men. Efforts have been made in that direction, as in the case of the so-called Tonsina experiment. Unfortunately, it was ater than appraised objectively from the standpoint of the economics involved. Oddly enough, it was Joseph Curran who blasted the Tonsina trial. And while he rapped endorsed a phony crimp union, the ILA's United International Seamen's Union, which has been attempting to put seamen on USflag-fleeing Panamanian, Honduran and Liberian ships at \$85 and \$90 a month. Curran's economics, as well as his sincerity, obviously are slightly twisted, for no straightthinking trade unionist could possibly tell his people he is bleeding for them while crimps run around with his blessing trying to put seamen to work aboard these runaway ships which have contributed so greatly to the shrinking job situation for American seamen.

Curran's pitch that he is concerned with making jobs for American seamen is particularly ironical Stone's retort to Curran's line was: national Transportworkers Federation is attempting to bring Panaline . . . these officials (Curran One purpose of the ITF program is to eliminate these registries as a source of unfair competition to the US and other legitimate maritime nations. This offers one realizable and concrete possibility for dealing with the problem of jobs for American seamen-and Curran is sabotaging it.

With respect to the employers' payments into any kind of fund for seamen's benefits, it is obvious should be calculated to do the most pears, therefore, that insofar as the seamen is concerned, the man whose working time aboard ship is tions should be the direct receipient of all such fund payments.

Therefore in bargaining for the seamen's interests, our Union's jobs. This because they did not criterion must still be to accomknow how long they would be on plish the most for the greatest number. An additional few bucks This freezing of the jobs is what thrown onto state unemployment led to Curran's compulsory vaca- insurance payments which most tion set-up—the purpose of which was to chip these NMU men away from the jobs to which his previfor the professional seamen will never receive, is certainly not a "victory"
from the jobs to which his previ-

Protecting SIU Is Job For All

To the Editor:

I have been shipping since 1950 and can proudly say that the SIU is the best there is in the maritime industry.

I think that the seniority shipping rule now in effect is a good set-up, because it means fairness to all, and gives permitmen an even better chance than before to get jobs.

Since I began sailing SIU as permitman, I've had fair

Letters to the Editor

treatment given to me and all permitmen alike. The man who wanted to ship always had his chance, and that is why I can say that the present seniority system is a good one.

At first I was a little confused about it, but after I read it all over a couple of times, I realize that it was a good deal for all of us.

No Fouling Up

Because we have the best today, the least we can do is protect it and defend it at all times. This can be accomplished by not fouling up, or missing ship, and by speaking our piece at ship and port meetings to get rid of what's on our minds.

Performing is more of a hindrance to us than anything else and only makes it tougher for our officials when they have to negotiate with the shipowners.

The things we have in the SIU are worth fighting for, and we can all show our gratitude and appreciation for them by manning our ships in proper fashion, in traditional Seafarers style. This will show the world we are the best, not only because we say it, but because we ean back it up at all times.

If anyone doubts this, let him read our own LOG on how SIU men defied the sea in all kinds of rescue work, of the men who fought so valiantly just a little while back to keep the doomed Steelore afloat, and many others.

Our emblem "SIU" means the best, so let's keep it flying high above all others.

> George Suarez * * *

Clean-Up Time **Needed On Deck**

To the Editor:

One of the supposed dilemmas which a bosun must face is when to knock off the men for coffee and for meals. As for coffeetime, the contract covers this quite adequately.

If a bosun, trying too hard to make a good impression on his men, gives too much coffeetime -more than the 15 minutes stipulated in the contract—he is apt to be sticking out his neck for some observant mate to chop off.

As for knocking off time at noon and in the afternoon when men working on deck are doing exceptionally dirty work. such as in paint, grease, rust, soot, slush, etc., they should be knocked off a few minutes early in order to clean up for chow.

Seafarers do not "dress for dinner" in the sense of tie and tails, but they like to be clean when at the table and they want the brother next to them to be

Especially at noon, if they are knocked off "on the bell" they have only thirty minutes to clean up and order their meals. Of course they have the remainder of the hour to eat.

I believe that ten to fifteen minutes until the hour, at least, should be allowed for a clean-up period.

Thurston Lewis

* * * Thankful For Welfare Help

To the Editor:

My mother and I would like to thank SIU Welfare Services for the help and time spent with us. We appreciated it very much.

The worst is over, and things keep right on moving. We do wonder, however, if mother is entitled to my father's Social Security (he was 64). If she is, would you send us the information on who to see and what to do about this. We don't know how to go about it, and your help would be greatly appreciated.

Mrs. H. Herrmann

(Ed. note: Information on your right regarding Social Security benefits is being sent to you.)

* * * **Vote Of Thanks** For Steward

To the Editor:

I would like to give a vote of thanks to Brother John Tilley who served us so well, in the capacity of steward, during his, stay with us on the Alcoa Pioneer.

It is a pleasure to sail with one who has the well-being of each individual crewmember at heart.

We on the Pioneer wish his smooth sailing on his next

> M. D. Baxter Ship's delegate

1 **Benefits Mean** Peace Of Mind

To the Editor:

SEAFARER IN SIAM

The mysterious East of fact and imagination is probably nowhere better typified than in Siam (or Thailand as it is officially known). Here in the best Oriental tradition are the temples that look like wedding cakes complete with temple dancers and weird music, exotic sculpture and architecture, colorful clothing mixed with Western style business suits, pedicabs and automobiles. And on the other side of the coin there are the opium dens, slums which can only breed in the Orient and the assortment of smells which is present, in countries where plumbing is absent and sanitation is a little known word.

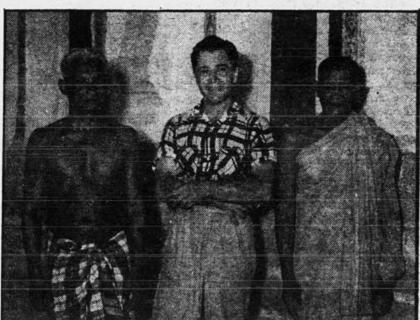

Seafarer Sal Terracina has made Siam a number of times on the Far East run. Here are a few of the many colorful photographs he has taken while in that country.

This back alley market place is pretty much the main drag of Ko-Si-Chang, a riverfront village below Bangkok, which sometimes becomes a major port of call when the Chao Phraya River silts up.

No oriental harbor scene would be complete without bumboats. Some of these at Ko-Si-Chang carry girls who came down from Bangkok in the hope of meeting ship's crews stopping at the river port.

Tibetan lama (left), aged about 70, shows off his healthy physique in front of Siamese temple. On Terracina's right is the temple priest.

A typical Siamese longshoreman takes advantage of a break to grab a smoke. He's seated next to Seafarer Terracina who submitted the photographs appearing on this page.

These three youths are temple dancers posing in the temple garden. Cigarette dangling from lips is pose probably picked up from a Hollywood movie.
