SIU Rescue. Heavy smoke billows from the yacht Sea Saw IV which caught fire and burned to the waterline on her maiden voyage in Chesapeake Bay. Passing Ames Victory (Victory Carriers) crewmembers launched lifeboat and rescued five members of the yacht's party. Small figure off bow of boat is one of the party, abandoning the yacht, a total loss. Value of the new 60-footer was \$150,000. Seafarers said rescue took less than thirty minutes. (See Page 3.)

Story On Page 3

The successful completion of their danger-filled job allowed Norfolk firemen to reach the hatch to the hold where the core of the fire burned. Three of the SIU volunteers (left) played an outstanding part in the unloading operation in which smouldering rolls of Hessian cloth (in background) were hoisted out of the smokefilled area. (See Page 2.)

Stevedores clear out bales of burned fiber from number 3 hold of the Steel Fabricator (Isthmian) following fire which occurred shortly after she docked in Norfolk. The fire burned over the weekend of May 15-17, and destroyed most of the cargo in the hold. A group of 16 Seafarers played a heroic role during the firefighting operation when they volunteered to remove smouldering rolls of cloth from the 'tween decks area above the hold.

### **Steel Fabricator Fire**

# **SIU Crewmen Volunteers Unload Smoke-Filled Hold**

NORFOLK-Sixteen Seafarers were involved recently in a heroic act, when they voluntcered to unload smouldering cargo from the Steel Fabricator (Isthmian) as she lay burning at Lamberts Point Pier here on Saturday, May 16th.

The 16 SIU members were + part of the Steel Fabricator's ter began to collect in the hold, to await removal of the rolls. sian cloth from the tween decks area to allow firemen to uncover a hatch where the core of the fire burned.

Isthmian Line officials, who witnessed the unloading operation, reported they were impressed with both the spirit the Seafarers displayed as well as the teamwork and skill with which they performed the difficult, risky task, one which is normally handled by stevedore crews.

The high value of the SIU training programs was illustrated time and again during the time the volunteer crew performed their dangerous work. Firefighters and other officials on the scene all admired the way the Seafarers caught on to the operation, especially since they were doing work which they were not accustomed to at considerable personal risk.

The fire began Friday night,

forced to deal with the possibility of the vessel capsizing.

Holes were burned with acetylene torches to permit the water in the hold to drain out. Two tugs

Pryor

from the SIU-contracted McAllister Towing Company also stood by in case further assistance was necessary.

The problem of the smouldering cargo continued to plague the fire fighters, and as a preliminary move to unload the rolls and bales, McAllister Brothers tugs moved the Isthmian ship from the north to the south side of Lamberts Point Pier N. This meant that a shore crane could reach the Fabricator's cargo, since the disaster had knocked out the ship's electrically-operated cranes. It was at this point that Isthmian Line officials asked for volunteers from the Seafarers in the crew to empty the tween decks area to allow city firemen clearance into the hold below which still continued to burn. Observers were especially impressed with the role that deck department member Charles E. James played in assembling the volunteer crew. With the help of ship's bosun Alfred Handyvedt, a group of 16 SIU members offered to perform the dangerous job. Making every effort to protect the crewmembers' safety, the volunteers were provided with gas masks and oxygen breathing apparatus, Working in two separate shifts, a party of men would go into the hold and hook two rolls of Hessian cloth to the crane.

crew who courageously vol- an eight-degree list developed After a headcount was made to unteered to unload rolls of Hes- and fire fighting officials were make sure everyone was accounted for, the rolls would be hoisted out and dropped into a gondola car where they would be unhooked by riggers from a stevedore crew.

> When smoke from the smouldering rolls of cloth got too bad, the men would evacuate the hold, and firemen would wet the cargo down until it became safe to work again. At this point, the second shift would take over and work until conditions became impossible again. As the SIU members became more familiar with the operation, they began to remove four rolls at a time, causing the riggers in the gondola car to (Continued on page 16)

A nation can only be completely healthy and thriving if all of its component parts are in sound condition. Weaknesses or deficiencies in any one area jeopardize the health of the entire structure of our society.

In the United States today, despite the fact that our economy is booming in some areas, and many of our citizens are enjoying increasing comforts of life, there is widespread unemployment, large poverty-stricken areas and other disparities that should not be.

In fact, at the recent quarterly meeting of the AFL-CIO Executive Council, the American labor pointed out that the persistent high level of unemployment remains America's No. 1 problem during the current year. And this unemployment threatens to increase as a result of the introduction of automation into all types of occupations.

In dealing with this aspect of the American economy, the Council said that we cannot reach healthy expansion and full empolyment until existing disparities are eliminated, and that balance is required between our ability to produce and our ability to buy the products of the increasingly automated industries.

The Council pointed out that this nation must have four million new job opportunities every year throughout the rest of the 1960s if unemployment is to be reduced to a minimum. This is essential if the American economy is to be sufficiently strong and stable to enable the nation to carry out its domestic and international obligations.

While the problem of unemployment hits a worker first, there are other disparities which have considerable impact on his ability to enjoy a decent way of life. Besides employment, he must have decent housing in which to rear his family, the availability of proper and adequate educational facilities for his children, and he must have the same equal opportunities in all areas of our national life that other citizens enjoy.

There are events and developments abroad which have similar impact and effect on the security of every American worker. For example, the Executive Council pointed to the situation in Brazil, where the recent revolution overthrew the communist and corrupt elements in the government. The Council pledged its full support to revitalize the Brazilian democratic labor movement and enable it to participate in establishing the badly-needed labor and social reforms.

The Council also pointed to the communist actions in the Middle East, Asia, Africa and Latin-America, and to the need for forceful and realistic vigilance in dealing with them.

Without an understanding of the problems, and a positive program for dealing with them, the security of our nation could be jeopardized. This is why the American labor movement speaks out on these issues, just as it does on those domestic issues which are of direct concern to American workers.

Seafarers, because of their contact with peoples throughout the world, by virtue of their calling, can readily understand that in the final analysis their security, their freedoms are linked to those of people everywhere.

May 15 during the start of cargo unloading operations in number 3 hold. The ship's crew took immediate steps to fight the blaze, but the situation grew worse and the Norfolk fire department was called in.

As the fire spread through the hold, it produced thick clouds of smoke which hindered fire-fighting operations. The heat produced was so great that paint on the gangway actually melted off in streams. When Norfolk firemen managed to get the flames under control, they found that the cargo of jute, sisal and Hessian cloth continued to smoulder.

As a precautionary device, water was poured into the hold to saturate the cargo bales. As wa-

recent meeting of the AFL-CIO's Committee on Political Action (COPE) at the Norfolk SIU Hall brought out this gathering of the areas union members who heard the arguments of three independent candidates for the Norfolk City Council. Speaking at the rostrum is one of the candidates Robert D. Robertson. Another candidate is Robert E. Summers, who is seated at the left on the rostrum, and the third candidate is Jack R. Wilkins, right. The three men are all running on a platform to stop a projected sales tax in Norfolk. The AFL-CIO Committee on Political Action was initiated by the Federation to inform union members of important legislative matters and to fight for the passage of legislation beneficial both to the American working man and to the nation at large. COPE represents just one facet of the legislative information program of the AFL-CIO and its member unions.

# **Court Upholds ILA Boycott Of Tulse Hill**

RICHMOND, Va .- A Federal Court ruled here last week that longshoremen may refuse to work on Cuban blacklisted ships without having to face unfair labor practices charges by the National Labor Relations+ refusing to assist a vessel that

### Board.

The 4th Circuit Appeals Court handed down the 2-to-1 decision which denied the NLRB a Baltimore Local 1355 of the In- (NLRB) to require the men to enternational Longshoremen's Association to end their refusal to work the British freighter Tulse Hill. The hearing on the case arose when the State Department lifted a blacklist against the vessel in December, 1963, when the vessel's owners promised to end their trade with Cuba after the existing charters expired.

#### **MTD** Protests

The Government's decision to lift the ban on ships in the Cuban trade brought a strong protest from the Maritime Trades Department, AFL-CIO. The MTD sent a telegram to the State Department saying that the new policies "are among the greatest threats to the security of the Americanseaman and to the future of the American-flag fleet."

In March of this year, Chief Judge Roszel C. Thomsen of the Federal District Court in Baltimore signed a temporary order restraining the ILA and ILA Local 1355 from failing to work or refusing to work on the Tulse Hill. Thomsen however, stayed the injunction for ten days and added that the order did not stop individual members of the ILA from refusing to work the ship. The injunction was finally stayed pending the outcome of the Circuit Court hearing. Hence, the ship has remained at her berth in Baltimore.

the In majority decision, Judge Simon E. Sobeloff of Baltimore wrote that if the union moral revulsion against Castro by working conditions.

trades with him, they are at liberty to do so. Nothing in our lahor laws speaks to the contrary," he wrote, adding, "It is not within cease-and-desist order requiring our province or that of the Board gage in work they find obnoxious because the ship has trafficked

with a political regime they consider loathsome." The majority decision said that the "ILA action pertains to a general political question in which the ILA shares an interest with all citizens." Such boycotts by workers or buyers are not uncommon, it continued. "Similar demonstrations have been made against other Communist governments and against Hitler's Nazi system, but this is a recognized part of the freedom constitutionally guaranteed in our country.

#### **Constitutional Right**

"The First Amendment affords protection not merely to the voicing of abstract opinion upon public issues, it also protects implementing conduct which is in the nature of advocacy."

. The case was originally brought to the NLRB by the Maryland Ship Ceiling Company after the ILA refused to send carpenters to prepare the Tulse Hill for the grain shipment. The vessel's owners, Ocean Shipping Service, Ltd. of Bermuda had been unsuccessful in obtaining an injunction against the union in Baltimore Federal Court

In the only dissenting opinion by the court, Judge Albert V. Bryan of Alexandria, Va., wrote that the case fell "snugly" within the National Labor Relations Act.

The majority decision, however, said the NLRB did not even have jurisdiction in the case, because the finding was not a "labor dismembers wish to "voice their pute" as the case did not concern

# **SIU Insists Marad Enforce 'Ship American' Provision**

NEW YORK-The Seafarers International Union has informed Maritime Administrator Nicholas Johnson of its insistence on strict adherence to the terms of Public Resolution 17, which provides that 100 percent of cargoes financed by a lending agency of the US Government must be shipped in American bottoms.

The SIU communication urged the MA to reject a request from an Italian Government agency which asked that the MA waive the Public Resolution 17

requirement and allow Ital-,\* ian-flag vessels to carry half AFL - CIO President George continued violation. And we do of \$100 million worth of cargoes for which credit to Italy has been extended by the Export-Import Bank.

The Italian request, last month, drew a prompt response from the Joint Maritime Committee, which called upon the Maritime Administrator to reject the waiver bid. The Joint Maritime Committee is composed of the SIU, ILA, NMU, MEBA and MM&P.

The matter was scheduled for discussion at the first meeting of the newly-formed Cargo Preference Grievance Committee, which was held in Washington on May 13, but was not resolved at that time.

On May 15, the Maritime Administrator solicited all segments of the maritime industry for their opinions on the Italian waiver request.

### No Legal Waivers

"We have reexamined the Public Resolution," the SIU answered, "and we find in it no authority by which the Maritime Administration, or any other agency, can legally grant general waivers."

Public Resolution 17 enumerates certain specific instances, regarding the availability of US ships, under which MA can grant statutory waivers of the 100 percent requirement. Since the end of World War II, however, MA has been following a policy of issuing so-called "general waivers" which are not provided for by the to the availability of US ships for disputes plan was delivered. the cargoes involved.

The SIU also asserted that, was not even a subject of proper a result of the agreement reached

Meany during the course of the not think it is the function of the recent dispute over the shipment grievance committee to consider of grain to Russia and other the propriety of continuing a viocommunist nations.

"Like the Maritime Administrator himself, the grievance amend or nullify an act of Congress," the SIU stated.

Taking note of the MA's general waiver policy over the years, ironic that the unions and manthe SIU added: "We do not believe that repeated violation urge that the government agency either repeals a law or justifies carry out the intent of the law.

lation of the law.

"Furthermore," the SIU said, "we are concerned to discover committee has no authority to that the protection of the American merchant marine would become an item of grievance."

The SIU message said it was agement found it necessary to

# **AFL-CIO** Council Sets Union Goals

WASHINGTON-The AFL-CIO Executive Council, meeting here for their quarterly session last week, mapped out labor's position on the major domestic and international issues confronting the United+

States today. The Council called for immediate action in such areas as civil rights, free collective bargaining for better wages, shorter hours, improved working conditions, and a unified free world alliance. They also adopted policy statements on such matters as housing legislation and educational television.

Internal matters within the Council were also discussed and a report on the success of hanlaw and which make no reference dling disputes under the internal

### Gov't Chartering Abuses Discussed

If the Government wants to really help tramp shipowners, it should sweep out its own barn first. This is the blunt, but obvious answer to the Maritime Administration's recent question of how the Federal Government can assist the ship operators. Instead of watching the Maritime Administration waste time by going through the motions of reviewing shipping rates, it's about time Government officials started considering abuses in chartering practices and assignments for foreign ports.

Last month the MA asked for comments from tramp operators on a review it proposed to make of American-flag tramp ship ceiling rates which the operators must contend with when their ships carry Government-financed foreign aid cargo.

The major problem the tramp owners face is that overseas supply missions have been given the authority to establish the terms and conditions for the chartering parties. By employing this power, these missions govern the use of American ships. It is these terms and conditions that have a direct impact upon the income of these ships, rather than the ceiling rates whose significance is mainly theoretical.

The crucial situation faced by American-flag tramps is that they must depend to a great extent on Government aid cargo. This means that the owners must yield when the pressure is put on by foreign supply missions. The owners must follow this unfortunate course of action even when the charter provisions imposed are blatantly unfair and unreasonable.

These rates are actually used to set up a ceiling over which American-flag vessels are considered unavailable at "fair and reasonable rates," even though they are physically present for use. The rates are determined under the Cargo Preference Act, or the law which requires at least 50 percent of Government-generated cargo be shipped in American bottoms, Tramp owners have charged that although the rates were set up to guarantce a fair and reasonable return, owners received the maximum only about four percent of the time during the last seven years. Taking this into consideration, it is obvious that chartering practices must be revised to insure that owners actually get the required rates, since manipulation of these rates would not automatically affect their income.

HONOLULU - A fantastic tale of murder, suicide, unruliness, was unfolded when the Brazilianowned, Liberian-registered vessel Ponoma, described by the ship's Argentinian radioman as "a hell ship," docked at Honolulu recently.

When the ship docked, the Norwegian skipper was dead, a victim of murder on the high seas. Shortly thereafter, a Norwegian crewmember attempted suicide and was removed to Queen's hospital.

Thus far the governments of three countries are displaying 1951 construction subsidies for anything but effective control over the situation. The US, Brazil and Norway are wrangling over who will begin a formal investigation of the events aboard the Ponoma.

With the multi-lingual crew restricted to the ship, the Honolulu police are carrying out a tentative investigation. What they have uncovered so far is a story of unruliness, dissatisfaction and near-mutiny on the vessel during make the wildest events of a grade Z pirate movie seem quiet and law abiding by comparison.

At one time, the story goes, a group of seamen pulled knives on the ship's officers and threatened them. Later the crew refused to work. Then one man climbed the main mast and threatened to jump, but was saved.

"The captain did not show up on the bridge Thursday and by about it. After lunch, I went to check," the mate reported.

"There were never any fights but it was getting so the men would refuse to obey work orders, saying they had worked enough and were tired." The ship had sailed short handed and long hours were the order of the day. "I can't blame them," said the mate. "Under former owners, this ship had 35 men. Now we have 25."

While aboard the ship, the steward was confined to the ship's hospital, "which has only three ment."

# **US Seen Losing Shipping Position**

LOS ANGELES-Representative Herbert C. Bonner warned last week that America is losing a race in the world of maritime economics, and that the US is not in a position

to rise to a situation similar + dissatisfaction and near-mutiny National Defense Reserve Fleet was capable of transporting 85 percent of the needed war material.

> The Democrat from North Carolina, chairman of the House Committee on Merchant Marine and Fisheries, was critical of the Defense and Commerce Departments and the Maritime Administration. He said that although Congress authorized in 1958 the construction of a passenger vessel to replace the America, nothing had been done, and that in shipowners in bulk transportation -which constitutes almost 80 percent of the nation's imports and exports-had been approved by Congress. The Maritime Administration, he said, had so far failed to authorize a single subsidy for such building.

Bonner predicted that the nation "will inevitably be left at the mercy of its competitors in world trading" if present trends conthe last eight months which would tinue. He said that it had taken "cataclysmic events" to force the nation into "crash shipbuilding programs in order to survive."

In referring to the time of the outbreak of the Korean War he said. "Let us pray that we are not confronted with a similar emergency anytime soon. With our privately-owned fleet operating at a median age level of 18 to 19 years. and our existing reserve fleet consisting largely of war built noon Friday we were wondering Libertys and Victorys, 90 percent of which border on 20 years of age, it is extremely unlikely that we could so quickly and effectively rise to a similar occasion today.'

The nation's fleet has increased since then only about two percent in terms of capability to move cargo, the Congressman said. However, he noted, the nation's gross national product has doubled; the nation's dry cargo waterborne trade has increased from 103 million tons to more than 150 million tons annually; the United States' participation in overseas beds and no medicine or equip- commerce has dropped from 42 percent to 10 or 11 percent, and laws.

to the Korean War when the while the world fleet has increased 44 percent, the privately-owned fleet of the US has decreased 22 percent.

He said that although shipping ranked as the nation's third export industry, it was being neglected at a time the Soviet Union was placing heavy stress on its transportation capabilities.

"The Soviet Union is pursuing expansion of its fleet in deadly earnest, in realization of a fact we may have forgotten -- that when trading with the world, market accessibility is reliant in a very large degree upon a nation's merchant marine," he said.

## **Bill Passed To Protect US** Fishing

WASHINGTON - A bill was signed last week which provides for fines up to \$10,000, imprisonment of up to a year and confiscation of offending fishing boats of other nations caught fishing for resources of the United States continental shelf.

President Johnson signed the bill into law May 20, and said at the time that "efforts will be made to work out in advance with foreign countries procedures for enforcement there." Japan had strongly opposed the bill which also provides punishment for foreign fishing boats caught in the US's territorial waters.

Johnson said that "the United States has assured Japan that in such consultations with Japan full consideration will be given to Japan's long-established king crab fishery."

Previous to the signing of the bill, the Federal Government was powerless to prosecute boats entering US waters or fishing off the continental shelf.

Such vessels could only be escorted to the high seas by the Coast Guard, or in some cases, prosecuted under similar state

What actually determines the rate structure is charter party conditions and practices of the recipient nations. It is these that must be revised, stabilized and made more uniform If shipping conditions are to be improved.

If charter party conditions could be corrected, present ceiling rates would be compensatory. Rates which are noncompensatory demand immediate adjustment. Adjustments should be applied to rates to Korea, Taiwan and the east coast of India and Pakistan. The shipping patterns used to set up the original 1957 rates have become outmoded. Complaints by the tramp owners are the ones that require specific adjustment, rather than having the MA start on a complete rate revision.

The Government's policy of keeping rate ceilings of 20 percent or more below the general ceiling for large American-flag ships also must be revised. The industry agreed on this policy as a temporary one, only until the grain shipments to Russia were completed.

Of course, if the Government would implement these wise recommendations, the job picture would undergo a considerable change for the better. The number of tramps on these routes would increase, and, a healthy boost in the number of job possibilities would open up for we Seafarers.

deLesseps Morrison, speaking at the **SIUNA Convention in 1963.** 

leans and US Ambassador to the Organization of American States, deLesseps (Chep) Morrison was killed last week in a tragic crash of a' chartered plane in Mexico.

Morrison was a speaker at the 1963 SIUNA convention in Washington. He was well known personally to many Seafarers and had visited the SIU hall in New Orleans on several occasions.

Killed with Morrison in the crash was his youngest son Randy, 7, and five others. He had chartered the plane in Texas to fly to Mexico on a business trip.

A native of Louisiana and an attorney, Morrison first became Mayor of New Orleans in 1946 and he remained at the post for 15 years.

He was twice an unsuccessful candidate for Governor of the state, and in 1961 was appointed by President Kennedy as the US Ambassador to the Organization of American States. He resigned the post last September.

Funeral services for the former Ambassador and his young son were held in New Orleans on May 26 and were attended by SIU Gulf area vice-president, Lindsay Williams, Morrison's wife, Corinne, died in 1959. Besides Randy, he had two other children, deLesseps, Jr., 20, a student at LSU and Corinne 'Ann, 16.

# **MA Blasted For Changes** In Ship Trade-In Policy

WASHINGTON-Independent shipowners who recently got a jolt when they discovered that a group of 18 C-4 type vessels which the Government is offering for sale would cost them about \$250,000 more than they had anticipated, have blasted Maritime Administrator Nicholas Johnson and +

the Maritime Administration has applied an unsupportable in- ing interpretation and contrary to undermining the law designed terpretation of that act, contrary to the statutory language, contrary to aid non-subsidized lines. "The Maritime Administrator to the Administration's still stand-

### **Blood Bank Operation Is Outlined**

One of the newer benefits the Seafarers International Union has established for its membership is one which is, virtually, free of charge. Not one penny of dues or assessments go directly to the continuance of the Union's blood banks in all ports. But Seafarers in every port are constantly urged to donate a pint of blood to their bank.

Since its inception in the port of New York in January of 1959 the blood bank has taken in a total of 3,910 pints of blood, all given voluntarily by Seafarers. Although the clinic here does not maintain its own bank on the Union premises, the donated pints are "deposited" in the Brooklyn Blood Bank.

The depository at the local Blood Bank is used largely as replacement service for hospitals. This means that when a Seafarer or his dependent needs blood, the hospital where he is confined supplies ship to be traded-in." This, the the necessary blood, then "bills" the Union Bank for a replacement ship owners charge, is subverting of the number of pints actually used.

Sometimes, however, as in the case of an ill Seafarer who needs a continuing supply of blood, or the set-up in advance for something the non-subsidized US fleet, like an open heart operation, the blood goes directly from the Union account at the Brooklyn Blood Bank to the place of need. Blood is often shipped from the SIU account directly to the USPHS Hospital at Staten Island.

In 1961, a dire emergency arose in Houston when little Ralph can replace the depleted balance, Wright, the son of Seafarer Norman R. Wright needed 62 pints of blood to live, The New York bank was able to supply 48 pints of blood, and Seafarer Wright's shipmates came through in true SIU style to supply the remainder. It was decided then that more banks were needed for just such emergencies as the case of the Wright child.

Hence, banks were set up in all ports where the SIU maintained a port agent. As in New York, the out ports use commercial blood banks or setups like the Red Cross to handle the donation of blood by Seafarers, and the drawing on the outports' balance of blood in each area. It has been set up and the machinery oiled to such an extent that any Seafarer or his dependent keep the balance of the bank high the rules for the program after can get the blood necessary in an

ministration has awarded a \$35,000 wasted. physically able to give blood, can MA that some shipowners would At the present time, New York

the full substantiated intent of Congress," the American Mari-time Association charged. Of the 18 C-4's released by the Navy from the reserve fleet last

year, the MA allocated 13 to SIUcontracted companies. Of these, Waterman is slated for 6, Calmar 5. Oceanic Petroleum and Pentrans, 1 each.

After the bids for the vessels were in and the allocations announced, the MA dropped a bombshell by announcing that it had changed the manner in which the value of the C-4s was to be judged. The new system could add an estimated \$250,000 to the cost of each of the ships.

Exchange Called 'Sale'

Under the MA's new interpretation, the ship exchanges under the Ship Exchange Act is considered a "sale" in which the traded out ship must be assigned a value "at least equal to the value of the the entire program which Congress intended as a means to upgrade

What particularly galls the shipping men is the fact that the MA changed its mind in mld-stream, after the bids were in and the ships allocated and with the bidders still believing that the old rules would apply.

Under the old interpretation of the Vessel Exchange Act, a shipowner could receive a ship virtually free if the cost of converting terpretation, the MA has set a Lundkvist, who have given, fixed price ranging from \$400,000 shipowner must pay the difference. Wants Old Policy

The shipowner's association is seeking to make the government rescind the new policy and revert to the older formula which was sibility for Seafarers to give blood used in the past, and should cerif they are physically able, so as to tainly not be permitted to change enough to be able to hold off any bids have been tended on the old

# **SIU Company Seeks Atom Powered Ships**

NEW YORK-The SIU-Pacific District contracted-American Mail Line has expressed to the Maritime Administration and to the Atomic Energy Commission a positive interest in the construction of two and+

powered cargo ships.

The vessels would be employed in the firm's service between the Pacific Coast and ports in India, Pakistan, the Persian Gulf and the Gulf of Aden, the company said,

The ships, if constructed, would be part of the company's fleet replacement program, under which the line is committed under subsidy contract to build two or three cargo ships for its India route by 1965.

Company officials believe the long distances involved would make the service especially suitable for the world's first maritime application of nuclear power, Atomic-powered ships built or under construction are neither for military or government use, while the NS Savannah is part of a government research project.

The project has progressed to emergency. A man, between the policy. emergency and not a second is the point that the Maritime Ad-Countering a statement by the

possibly three nuclear- faced with the problem of negotiating a construction subsidy.

Such subsidies are based on the difference in costs of constructing the same type of ship in the United States and abroad. No nuclearpower foreign commercial ship has ever been built.

## Lakes ILA **Honors Banks**

**BUFFALO** - At a testimonial dinner here last Sunday night, the Great Lakes District of the International Longshoremen's Association presented an award for 'outstanding service to maritime labor" to Hal C. Banks, Vice-President of the Seafarers International Union of North America.

The presentation was made at the seventh annual Owen Kavanaugh Award Dinner, sponsored by the Buffalo Joint Council of

The award was presented by ILA Vice President Dave Connors, of Buffalo. SIU President Paul Hall accepted the award in behalf of Some 300 trade unionists, representing union and alleid crafts, participated in the awards dinner. **Moving?** Notify Seafarers and SIU familles who apply for maternity, hospital or surgical benefits from the Welfare Plan are urged to keep the Union or the Welfare Plan advised of any changes of address while their applications are being processed. Although payments are often made by return mail, changes of address (or illegible return addresses) delay them when checks or "baby bonds" are returned. Those who are moving are advised to notify SIU headquarters or the Welfare Plan, at 17 Battery Place,

(Figures On This Page Cover Deep Sea Shipping Only In the SIU Atlantic, Gulf, Lakes and Inland Waters District.)

### April 9 - May 22

SIU members found an improved shipping situation since the last reporting period as a total of 1,319 jobs were filled as compared to 1,198 during the span covered by the previous report. The increased activity was paced by rises in the number of jobs dispatched in all three departments with the engine and steward categories showing the most significant improvements.

Page Six

The increased activity during the past two weeks was especially reflected in Norfolk and Houston which both registered substantial gains over the previous reporting period.

Although the number of men shipping out of Wilmington and Seattle declined, the job situation picked up in San Francisco, making it the only West Coast port to show an improvement. In addition to Houston, the only other Gulf port to report a sizable increase in the number of men shipping was Mobile. Job activity dropped off in Baltimore for this reporting period, although this was the only East Coast port that experienced an appreciable change in the number of men shipped.

Registration statistics declined slightly during this reporting period, contrasting with a slight rise in the previous two-week period. Total registration figures began to slip behind the total of men shipped since the last report, as the job situation began to improve. The total number of Seafarers registered on the beach dropped to a new low of 3,351 compared to the 3,441 in the period covered by the last report.

Statistics showing the seniority situation show that there has been almost no change since last report appeared. The percentage of class A men shipping remained pegged at 53 percent where it was in the last two-week period. Class B shipping dropped by a single percentage point to 36 percent, while class C climbed a point to the 12 percent mark.

SEAFARERS LOG

### By Earl (Bull) Shepard, Vice-President, Atlantia

### East Coast Shipping On Even Keel

Since the last issue of the LOG, the shipping picture has remained about the same with shipping just as good, if not a little better, in the port of New York. There were three sign-ons, 12 payoffs with 16 ships in transit, and there was one more man shipped in the total of A,B, and total of 29. C men. The total for the period was up from 271 to 272.

Begis McKenzie, recently off the Steel Fabricator is now looking for another. He was cook and baker on the Fabricator, and when he left the crew gave him a rousing vote of thanks for his fine baking. He is now registered for another ship, and ready to satisfy another crew. John Norgaard was in to see us and to make application to study for his harbor- pilots license. Good to see you John and good luck on the test. Another cook and baker, Major Reid, formerly aboard the Robin Gray, stopped in to say hello and to talk about the wonderful trip he had to South Africa. He just returned from there and is ready to get underway again. Also in to say hello, and presently recuperating from a broken wing was Nathan Dixon. Others around the New York beach are Walter Billy Joe, off the Seatrain New York, Raymond Bunce, who got off the Hercules Victory in Oakland, California and flew to New York to be with old buddies and make the scene at the "Big Aquaduct" race track. Frank Fernandez got out of drydock for the weekend and dropped by the Hall, Walter Fitch, off the Robin Gray, was in, J. Hamot just got back from his first trip on his brand new A book, and Richard Green has just shipped as AB on the Steel King after being laid up for seven months. Good luck to you, Dick.

Shipping has been a little slow in Boston recently, but a few more payoffs are expected this month, so we may be seeing an improvement soon up that way. But this period saw only three payoffs in Beantown, with no sign-ons, so it should certainly improve in the coming weeks.

Joseph Wescott, a 20-year man, was last off the Council Grove on a trip to Russia and says he is looking to stay coastwise so he will have more time to spend with the family. Also fresh off the Council Grove is George Blackmore. George is planning to take it easy for awhile and then get a ship running coastwise or to Europe. Raymond Davis, whose last ship was the Achilles, says he was really sorry to see that ship laid up. He is up on his farm in New Hampshire, getting some work taken care of, and says he is about just ready for another ship. Gilbert (Bubber) Edwards has signed off the Mount Washington, but was sorry to see it go. Bubber says the ship is like a hotel. He is in the Marine Hospital in Boston getting a checkup right now, but he says he is going to try to make this ship back when he gets out of drydock.

#### **Baltimore Outlook Good**

Shipping down in Baltimore is off a little from a good last period. However, the outlook is good, and it seems as though Baltimore should pick up again very soon. That port shipped a total of 71 men in the last period. There were four sign-ons, four pay-offs and 11 ships were in transit.

While sailing aboard the Raphael L. Semmes, Charles E. Shaw found her to be about the best ship he has sailed in quite some time. He rates the deck department as tops, and hopes they all get a chance to ship out together again real soon.

After sailing for over 20 years from Atlantic ports, Thomas (Red) Clough is back after a sojourn in the Gulf. Red says that shipping from the Gulf was okay, but he is glad to get back to his old home port. Red was the bosun on the Jian his last two trips.

Shipping in Philadelphia fell off a little last period, but the shipping picture is still all right with some 56 shipped out of that port. Bernardo Tapla reports that he really had a great time re-visiting the country from which he comes, Mexico. His last ship was the Alcoa Pilgrim, and, on the trip, he was affored the opportunity to visit Veracruz. Bernardo says that everyone had a wonderful time there. He says the crew was very lucky because there was a rodeo in nearby Orizaba, where they saw several Mexican movie stars. He is looking for a chance to get back. Last off the Hastings, Carl Biscup, enjoyed the trip to Europe and hopes to sail there more often in the future. He says the girls are especially pretty on the Continent.

On the beach in Philly is Manuel G. Madargang, a real old-timer. He's looking for a stewards department slot, either as a chief steward, chief cook or baker.

Lewis Hertzog, who last signed off the Alcoa Explorer, is just out

# **Six Seafarer Oldtimers Draw Lifetime Pensions**

NEW YORK-Trustees of the SIU pension plan have added the names of six Seafarers to the growing list of Union members who can count on spending their retirement years supported by a regular monthly pension check. The action of the trustees brings the num-

ber of Seafarers who have retired on \$150 pensions to a sixth pensioner is Melvin L.

Five of the six SIU oldtimers who were approved by the joint Union - shipowner trustee panel are receiving disability pensions, while one is retiring on a normal pension. The pensioners are Julian S. Mineses, 65; Lloyd Short, 58; Elon Bruce, 73; Ralph Subat, 60; Hubert R. Cantwell, 62, all of whom shipped deep-sea. The

Sen. Urges **Boost To US Fleet** 

WASHINGTON - The broadening of the ship exchange program has helped shipping companies to "offers no long term solution" for the plight of US shipping, according to Sen. E. L. Bartlett (D-Ala.). In a speech to a large Propeller Club audience here last week, Bartlett made a plea for a stronger US flag merchant marine, particularly for the tramps, coastwise and intercoastal segments of the fleet. Domestic operators have been "largely ignored," he said, and left to function mainly with obsolete ships. He mentioned the ship exchange program, but declared that "this can offer no longterm solution and even for the short run will not encourage the use of the most modern vessel design advantages."

#### Must Have Service

Bartlett, who, since the illness of Sen. Clair Engle of California, has become the virtual chairman of the Senate Merchant Marine Subcommittee, said that apart from any national defense argument for beefing up the domestic operators, he had a strong conviction that the American shipper needs to have available the most efficient type of water service to offer effective competition with other modes of transportation.

Wheeler, 66. who sailed as a mem- member, Subat first took out ber of the SIU-Great Lakes District.

Mineses has been a member of only oldtimer receiving a regular \$150 pension. Joining in Baltimore, he sailed as a member of in New Orleans. the steward department. A native of the Philippine Islands, Mineses makes his home in Philadelphia, although he has a brother who lives in Manila. His last ship was the Columbia (US Steel),

Sailing with long years of experience in the engine department, Short has been an SIU member since 1941 when he joined up in Baltimore. He ended his sailing days with a voyage on the Globe Carrier (Overseas Carrier). Short is a resident of Baltimore where he lives with his wife, Alma,

A veteran member of the SIU since 1947, Bruce took out his first Union card in New York. Sailing in the steward department, his last ship was the Del Rio (Delta). A native of Jamaica, British West Indies, Bruce now makes his home in New Orleans with his wife, Sarah.

Cantwell, who joined the Union in New York in 1942, has piled up years of experience In the steward department. A native

of Trenton, NJ, he plans to spend his retirement there, close to his obtain better C-4 type vessels, but family. Cantwell ended his shipping career with a trip on the Robin Hood (Robin Lines).

# **ICC OKs Rail Rate Cuts On Wheat to Gulf Ports**

WASHINGTON-The Interstate Commerce Commission has approved a series of rate reductions proposed by the Gulf rail lines in 1963 to apply to carload export wheat traffic drawn Colorado, \*

from Arkansas, Iowa, Oklahoma, Missourl, and East railroads serving Pacific ports St. Louis, Ill.

The reductions, initially suspended by ICC and subsequently held from operation by the rallroads pending the decision, amount to a uniform 10 percent decrease from rates in operation in June, 1962.

The ICC's action marks for the

Kansas, Nebraska, has entered into the picture as have embarked on rate-making programs intended to generate more traffic in that direction.

Exemplary of the carload wheat rates approved by the ICC was one of 58 cents from Greeley. Colo., to the Gulf ports, compared to an existing rate of 78 cents. No comparison was provided with the present rate from that point to Lakes ports.

of the hospital up in Staten Island, and says the Welfare Department up there is really on the ball. They do a great job for the boys there, Lewis said.

Shipping has been fair down in Norfolk, and the outlook for the future looks to be about the same. A fire broke out in the number three hold of the Steel Fabricator down there a few weeks ago, and the SIU crew aboard her has drawn high praise from the Coast Guard and the ship's officers for the fine job they did in assisting to put out the fire. The vessel burned for two-and-one-half days before the fire was finally extinguished, and she is expected to be laid up for approximately six days for repairs before proceeding to the Gulf.

Horace Willshire signed off the Hurricane recently to check on a boat of which he is a part owner. And Julian Sawyer, who broke his hand on his last ship, the Morning Star, is now fit-for-duty and looking for a ship.

On the beach down in Puerto Rico is Harold McVay, who, after a few weeks of leisure is all set to fire or oil some good ship that will bring him back to the area. Jose (Pepe) Garcia is working aboard one of the local tugs. Pepe was aboard the Detroit for about six months and was content with everything except the quick turn around.

Bo Karlson is in town for a little fun, sport and enjoyment. Bo says he had a fine stay aboard his last ship, the Thetis. And, although Ramon Ayala has picked up his tugboat Jicense, he is still interested in a fireman's job heading for New York. Frank Mateo is at home in Ponce taking it easy for a while after spending about five months on the Florida State. And Jose Jacheco is back in town after about four months at the Marine Hospital in Staten Island. We all hope Jose requires a fully supported public will be all right and ready to ship in the very near future.

#### 'Special' Aid Needed

Unless something "special and fairly immediate" is done for the

tramp fleet-which is basically equipped with World War II ships - it "may not survive another decade," he added. A possible area of such help, he indicated, may lie in the various cargo preference statutes and "even more significant" in their "administration" by various government agencies. However, he was not more specific.

In conclusion, Bartlett also warned of the Russian maritime huildup, in contrast to the US downgrade. To meet the threat and be certain that US interests are served in "any contingency" policy.

Gulf ports and railroads a winning round in their running competitive fight with Great Lakes ports and carriers for the export wheat business.

It gives the Gulf ports a substantial advantage over their Lakes competitors in terms of rail freight charges for the muchcontested wheat trade.

While the ICC sanctioned the wheat rate cuts, it refused to permit similar reductions on export flour and bulgur from the same origins to the Gulf outlets, with one exception. That was a Burlington Railroad tariff which offered the flour reductions to Chicago, the only Lakes port city served by Burlington.

The ICC ruling was the latest of a long list of rail rate changes considered in the past few years as an outgrowth of sharpened competition between the Lakes and Gulf ports for export agricultural business. More recently the West Coast ment on the traffic.

**Rejects Lakes' Arguments** 

The commission rejected arguments by the Lakes ports and railroads that the proposed Gulf reductions would create "noncompensatory" rates or would prejudice the Lakes and prefer the Gulf.

The chief support for approval for the Gulf rates was a finding that substantial truck and water competition faces railroads moving wheat to the Gulf but that little such competition exists for Lakes-bound traffic.

A variation on this finding prompted the commission to reject the flour reductions other than for Burlington. ICC ruled that as only minimal competition by other modes is available on flour traffic to both the Lakes and the Gulf ports, each port group should be given equal rate treat-

# **RR** Rate Cut **Hits Seatrain**

NEW ORLEANS-SIU-contracted Seatrain Lines has announced it will discontinue sailings between New Orleans and New York in mid-June. A company spokesman cited recent heavy losses suffered +

from discriminatory rate-cut- ice, and we can no longer support ting by the railroads as the primary reason for dropping the service.

east weath

Page Eight

Interstate Commerce "The Commission has been disinclined to enforce the provisions of the law prohibiting discrimination in rail rates against coastwise water carriers," he said. "In recent months particularly, the commission majority almost seems to be embarked on a deliberate campaign to bring about the end of coastwise service."

The action by Seatrain in dropping the New Orleans service parallels similar action taken several years ago by SIU-contracted Sea Land Service, which was then the only other general cargo coastwise steamship line.

Seatrain, which operates six specially designed ships to carry railroad freight cars and highway containers, came to its decision In spite of protests by New Orleans port and shipping groups. The company pointed out that as a result of rail rate discrimination by the railroads, Seatrain's revenue per ton on freight car traffic between New Orleans and its Edgewater, NJ terminal declined an average of 28.8 percent between 1958 and 1964.

"Seatrain is unable to continue the financial drains involved in the (Interstate Commerce) commission's unwillingness to act," a company representative said. "In May of last year we were forced to terminate our Savannah serv-

## **IBU Veteran Gets Pension**

Union - shipowner trustee panel of the SIU Pension Plan. Jonathan W.

Grizzel, an IBU oldtimer who has been sailing out of this port since 1929, is the latest addition to the New Orleans. For the year 1963 Seatrain suffered a net loss of \$1,-735,279. Approximately \$745,000 was incurred at New Orleans."

Discriminatory rate cutting by railroads involves reducing tariffs on those items which are the backbone of steamship traffic. Such reductions are possible because the railroads make up the difference by applying higher rates to other commodities on which they have no competition from water carriers. The usual outcome is that after shipping competition is eliminated by the discriminatory rates, all rates go up sharply.

The major traffic affected by the shutdown of New Orleans service by Seatrain will be the movement of rice, rock salt, plastics, chemicals and petrochemicals northbound and iron and steel products and miscellaneous manufactured products southbound.

Seatrain service between Edgewater and Texas City and Puerto Rico will continue as usual.

tial "E" award for excellence in export promotion has been awarded to SIU-contracted Delta Steamship Lines by Under Secretary of Commerce Franklin D. Roosevelt, Jr., at ceremonies here recently.

The presentation was made at a banquet of the Mississippi Valley World Trade Council. According to the citation, Delta, "Through an aggressive program of trade deeran has been added to the grow- velopment, has increased its export ing list of SIU-Inland Boatmen's shipments to more than 50 percent

In a separate announcement, Delta was lauded for successfully promoting American products and tourism in Latin America and Africa, aiding US manufacturers to sell abroad and developing the first floating exhibition in the Mobile Trade Fairs program.

The floating exhibition mentioned in the announcement is the SIU-manned Delta Line vessel Del Sud, which is now on a tour of key number of tug veterans who can Uruguay carrying exhibits of

### MA Chief Visits New Orleans Hall

Federal Maritime Administrator Nicholas Johnson paid a visit to the New Orleans Hall last week. He was accompanied by Captain Thomas A. King, Gulf Coast Director of the Federal Maritime Administration. They were visibly impressed by the beautiful New Orleans Hall and the comfortable facilities provided for the membership. They also were given a firsthand look at the training program and the Seafarers Clinic in the New Orleans building.

Earlier in the week, we attended a testimonial dinner in Lake Charles for Congressman T. A. Thompson, U.S. representative from the Louisiana 7th District. Congressman Thompson is the fourth ranking member of the House Committee on Merchant Marine and Fisheries and he is the ranking member of the sub-committee on the Merchant Marine and is one of the most influential members of Congress on legislative matters affecting Seafarers and their jobs. This meeting was addressed by Secretary of theInterior Stewart Udall, who praised the Congressman for his active and constructive interest in the conservation of U.S. Wildlife and Water resources. Veteran Congressman Jimmy Morrison, of the Sixth Louisiana District, was master of ceremonies for the occasion.

Organizationally, the Union is moving ahead along the Gulf Coast. Favorable new contracts have+

been negotiated with two towing companies, D. M. Picton in Port Arthur and Mobil Towing and Wrecking. As soon as the IBU is certified as the collective bargaining representative for the employees of Slade and Southern Towing Company (formerly known as Higman Towing), company representatives will be asked to meet with the Union to begin negotiating a contract to cover the nearly 150 employees involved.

## **Gulf IBU Signs Two New Pacts**

NORFOLK-The SIU Inland Boatmen's Union has successfully negotiated new three-year contracts here with the Gulf Atlantic Towing Company (GATCO) and the Marine Oil Service Company.

The new agreement with GATCO covers approximately 75 men and went into effect on May 1. The new pact calls for a wage increase, an additional paid holiday, improvements in working conditions, and an increase in welfare contributions by the company to the SIU-IBU Welfare Plan, SIU-IBU members at Gatco ratified the new pact by a 50-8 count.

The new three-year contract signed by the SIU-IBU at the Marine Oll Service Company will go into effect on July 1. The new pact calls for an immediate wage increase, an improvement in working conditions and an increase in employer contributions to the SIU-IBU Welfare Plan. The Union members at Marine Oil Service voted unanimously to accept the new contract. The Company operates a fleet of small harbor tankers and ship supply vessels in the Hampton Roads area.

# **Action Taken On Bloomfield Subsidy Bid**

WASHINGTON - A notice concerning the application of the SIUcontracted Bloomfield Steamship Company for a 20-year operating differential subsidy on trade route 21 is being published in the Federal Register by the Maritime Reg-Ister, it was announced recently by Maritime Administrator Nicholas Johnson.

Johnson said that the publication of the notice would give an opportunity for interested persons to comment on the application in conformity with a decision of the Maritime Subsidy Board, affirmed by the Secretary of Commerce, that all applications for operating differential subsidies should be subject to public notice.

Bloomfield had requested the Secretary of Commerce to review

### Laying Groundwork For Biggest Union Label Show Ever

Right in the thick of the planning for this year's AFL-CIO Union Industries Show was Maritime Trades Department executive secretary - treasurer Pete McGavin (second from left). The Seafarers International Union had three booths at the six-day show which ended yesterday in Louisville, Kentucky, displaying many of its consumer items, such as Cal-Pack products and Breast-O-Chicken tuna, both from the West Coast. The MTD set up its display in a fourth booth. With McGavin in the picture are (I-r) John S. Lutz, the show's assistant director: McGavin; Harold A. Schneider of the American

SEAFARERS LOG

Federation of Grain Millers and show director Joseph Lewis. The title of this year's show was "Americans At Work." Sponsored and produced by the Union Label and Service Trades Department of the AFL-CIO and offered to the general public admission free, the multi-million dollar exhibition portrayed the "Americans At Work" theme to thousands of visitors during the show's run.

# **Poverty Too Expensive To Ignore, US Warned**

WASHINGTON-"The most expensive thing we can do is do nothing" about the poor, because "the number of persons who are potential members of the poverty group is increasing," Sargent Shriver, director of the President's task force in the anti-poverty program warned on a nation-wide radio +

AFL-CIO. Speaking on the AFL-CIO pub-

lic service program Washington Reports To The People, Shriver pointed out that "public welfare payments have increased over the last five years at three times the rate of national productivity." The 9 million on assistance, he said, "are a drag, like a weight on the back of the American economy."

#### Increase Productivity

"Every person we can take off the negative side, every person we can make productive who has been unproductive, makes It just that much easier for the whole econ-omy to progress." he said. "We turn a person who is a consumer only into one who is a better consumer, one who is productive, who pays taxes instead of costing them -a full-fledged citizen in our economic life."

Shriver said first concentration in the Administration program is on youth, because "to save a person who is 16, 17 or 18 is to take that person out of poverty for the rest of his life." A proposed job corps, he said, is planned for these young persons "to make the illiterate literate, to make the unhealthy healthful, to teach skills, to show young people the importance of punctuality and reliability in holding a job."

hookup sponsored by the the Selective Service program to | tary service, but to determine call up young men at 18 or those who need educational or younger, not for immediate mili- health assistance.

# Seek More Gov't Work **For Private Shipyards**

WASHINGTON-This country's private shipyard industry could employ an additional 100,000 persons at a savings to the government of millions of dollars, if sufficient work were available, according to Edwin+

America.

The council, which has been fighting to have the Navy curtail hand." work at its own yards and channel it to private yards, claims that there would be no mass unemployment from the closing of Navy yards.

In a letter to Secretary of Deense Robert S McNamara, Mr. Hood said the additional workers that could be employed by private yards were more than the total employed by all Navy yards combined. Private shipyard facilities last year were 58 percent idle, he sajd. -"Two separate and independent cost studies have shown that costs in private yards are lower than costs in the naval yards." Mr. Hood declared. Figures which he used in his letter showed that work in private yards is up to 33 per cent cheaper than the comparable work in Navy yards. "Availability of more shipwork for private yards would undoubtedly lead to more stability and provide operating efficiencies that may reduce the cost of doing shipwork below present levels which are lower than those in naval shipyards," he continued.

M. Hood, president of the yards," he said, whereas "private Shipbuilders Council of yards shrink or expand employment immediately and in a much more direct ratio to the work in

This is facilitated, he said, by the pool of workers in various crafts in each port area who shift their employment frequently from yard to yard, depending upon the location of available work.

Mr. Hood asserted that employ-

Serigue, Michael Feldstein and instructor Arni Bjornsson.

#### **Special Programs**

"Some would be given part-time work," he continued, "to prepare for holding a job or advancing within a certain type of employment or even to eollege. "We also plan to have a special program for those who are now in college, but who would otherwise have to leave for financial reasons. We propose to give them part-time work so they can pay their own way. We hope to reach about 400,000 young men and women with these programs."

He said that if approved by Congress, the jobs corps would be tied in with the proposal by Sec.

"Personal excess to requirements, in large measure, account workload of naval shipwork justiof Labor W. Willard Wirtz to use for the higher cost in naval ship- fied the investment.

ment levels in private yards last year "ranged from 30 per cent above to 30 per cent below the annual average," while the levels in Navy yards were thought to be more than 5 per cent from the annual average.

"The range of employment in private yards also is greater than normally expected in private industry," he said.

Noting that private shipyards absorb the cost of extensive facilities on a limited volume of business, Mr. Hood told the Defense Secretary that "higher activity levels would provide lower unit costs as fixed shipyard costs would be absorbed by a greater number of units of production."

He also said that private shipyards "coming within the scope" of the study "indicated a willingness to provide all the messing and berthing facilities desired by the Navy, provided a constant

A Look At Educational Loans With college costs soaring, borrowing has become the fastest-growing

method of financing post-high school education. Some finance companies and insurance firms especially are pushing the idea of borrowing to go to college. Deveraux Josephs, Chairman of the New York Life Insurance Company and recently chairman of a Government committee on higher education, even recommended that colleges should raise fees to charge the student "the full cost of his education, and what the student or parents cannot pay from past savings and current savings and current earnings, they should borrow."

YOUR DOLLAR'S WORTH

Seafarer's Guide to Better Buying

By Sidney Margolius

But President Eldon Johnson of the University of New Hampshire, has warned that over-reliance on borrowing may create a new form of "indentured service, in which the poor pay for twenty years while the better-off start life debt-free."

One of the most shocking practices this writer has encountered is the large number of well-known colleges that recommend high-cost loan companies to students in their catalogs, either in ignorance or disregard of the true costs of such loans. Ironically, some colleges who may also give the same students part scholarships, unwittingly may be using some of their limited scholarship funds to subsidize interest payments to commercial loan companies.

Recently Senator Vance Hartke (D-Ind.) has been criticizing education loans offered by finance companies which charge parents the equivalent of true per-annum interest of 26 per cent and more, and in two cases, 54-60 per cent. These examples were based on a survey by the magazine of the Credit Union National Association.

First of all, parents and students need to understand that a socalled "\$4,000 plan" offered by a bank or finance company operating a "tuition" or "education plan" is not really a \$4,000 loan. As this department previously has pointed out, the money is advanced only for \$500 at a time on a "\$4,000 plan." This is a \$500 loan, not a \$4,000 loan.

In the case of the very high rates cited by the credit union researchers and Senate Hartke, the true per-annum cost is especially steep because the borrower really prepays part of the loan. For example, for a \$1,000s-year tuition plan for four years, on which the lender really advances \$500 at a time, the borrower repays \$106 a month for 40 months. The \$240 of finance charge is only somewhat higher than the typical \$150 to \$200 charged for similar four-year plans by banks and other lenders. But in this case, the payments are completed in 40 months, instead of the usual 48 months. Thus, during the last few months, the borrower has prepaid some of the money he supposedly is borrowing.

In the finance-company plans we ourselves have studied, the true per-annum rates, after allowing for the value of the life insurance provided, often do run from 13 to 37 percent. For example, an \$800 one-year "plan" offered by one company advances \$400 a semester, re-paid in eight installments of \$104. The borrower pays back in four monthly payments at a finance charge of \$16. This is the equivalent of a per-annum interest rate of a proximately 37 per cent, after allowing for the insurance, since the average debt during those four months is only \$125, and you have the use of the money for only one-third of a year.

There is no need to pay such rates. The AFL-CIO Education Department points out that the National Defense Education Act provides student loans at a true interest rate of 3 per cent. Nor does the interest charge begin until after the student graduates. You have ten years to repay (actually eleven years since you don't have to begin repayments until a year after graduation). Moreover, if you go into teaching, you will have ten percent of your loan cancelled for each year you teach, up to 50 per cent. For students interested in teaching, Defense Act loans actually can serve as a kind of partial scholarship.

The Defense Act gives preference to students intending to teach, and to students of the sciences, engineering, foreign languages and math,

If you can't get a Defense Act loan, or other loan directly from your college, here are other sources in order of inceasing cost;

State-sponsored college loans: Among states that now have their own or semi-official programs of college loans, are Florida, Illinois, Louisiana, Maine, Massachusetts, Michigan, New Hampshire, New Jersey, New York, North Dakota, Ohio, Pennsylvania, Rhode Island, Virginia, Wisconsin and Wyoming. Usually these loans are guaranteed by a state or semi-public agency but made by local banks. Your state education department, student-aid office or high school guidance counselor can tell is being made by Alaskan canyou which banks participate. In some cases, students attending post-neries, some of which were vir-

WASHINGTON-A tentative agreement has been reached between the Federal Maritime Commission and 11 foreign nations over demands by the FMC that foreign shipping lines which belong to steamship conferences serving the US make their contracts with their shippers comply with FMC re-

gulations; a right granted to much language which stresses the nies and shipowners may not acthe commission under the 1916 Shipping Act.

Unfortunately however, from what information was released concerning the recent discussions held here at the State Department, it appears that any agreement reached, however tentative, was basically on the terms of the foreign nations involved.

The FMC is seeking documents from the foreign shippers concerning freight rates in trade with the US. The documents are needed to enable Federal shipping agencies to review and pass on freight rates in US trade.

#### **Outcry** Raised

The requests for this information by the FMC created an immediate outcry from 10 leading European maritime nations and Japan, which accused the US of trying to regulate and control what was not its business, interfering with international affairs, and brought threats of retaliation against US ships calling at their ports.

The nations involved are Belgium, Holland, the United Kingdom, Italy Sweden, Norway, Denmark, West Germany, France, Greece and Japan.

A July 4 deadline was set by the FMC for filling new contracts between the steamship conferences and the shippers moving cargoes through US ports. These contracts cover shippers agreeing to use only steamship lines belonging to conferences, which are given a reduction in ocean freight rates as part of the agreement. A steamship conference is a voluntary association made up of American and foreign lines serving on the same trade route and interested in maintaining the same rates and practices.

Because not all shippers are conference members, a dual system of rates exists and it is these dual rates on which the FMC is attempting to fix its regulatory eye.

With the FMC still seeking "voluntary compliance" with its regulatory orders, the foreign shippers continue to drive a hard bargain. Consequently, under the recently reached "tentative agreement" many of the suggestions into effect. step being taken to prevent it."

shipping, is to be eliminated comtracts.

### **Cite Alarming Cost Increase**

# **NY Labor Urges Blue Cross Probe**

NEW YORK-The New York State AFL-CIO here has called on Gov. Nelson A. Rockefeller of New York to name a Moreland Commission to probe the operations of the Blue **Cross Hospital Insurance set-**

up, because of the "alarming rate of increase in the cost to subscribers of medical care benefits under health insurance plans." Union Protest

In a telegram to the Governor, Raymond R. Corbett, head of the 2 million member union federation. said such a study is needed and would possibly point the way to legislation to assure continued availability of adequate hospital insurance at reasonable cost to persons with low fixed incomes.

The recent decision of State Insurance Superintendent Henry Root Stern, Jr. to grant Blue Cross Rate increases ranging from 24.6 to 40 percent placed this protection beyond the means of many subscribers.

The AFL-CIO chief added that suggestions to cut Blue Cross costs and improve its operation, made by many witnesses at the recent public hearings on the rate increase application, were all rejected as not being within the scope of the inquiry.

At the hearings, Corbett continued, Stern repeatedly told witnesses that he was limited by law at the hearing to consider only testimony on the subject matter of and that only legislation could put situation will get worse with no

Corbett noted that in its own presentation, the state AFL-CIO has raised a number of points aimed at cutting or holding down Blue Cross costs which were ruled out of consideration. They included:

#### **Cost Cutting Ideas**

New York's Blue Cross reserve requirement is far greater than that considered adequate for Blue Cross plans elsewhere.

· The formula under which hospitals are paid needs restudy and recasting to prevent overpayment.

 Stricter controls are needed in policing bills submitted by hospitals.

 Expensive hospital facilities are needlessly used because Blue Cross policies here do not provide out-patient diagnostic care and treatment.

Blue Cross is controlled by a Board of Directors overloaded with members with direct or indirect hospital connections with the result that the same people occupy both sides of the negotiating table.

Corbett said that "many other areas of operation of New York's Blue Cross need inquiry and short of an all-out probe by a Moreland the rate application before him Commission, it appears that a bad

### SIU Alaska Fish Canneries Make Comeback

SEATTLE-A strong comeback

high school vocational or nursing schools also are eligible.

Some states which do not have general loans for students, do provide for teacher education, nursing and other medical-service students. Often these are service loans, and can become, in effect, scholarships. In West Virginia, for example, for each \$500 a student receives, he is expected to teach one year. Each year of teaching cancels \$500 of notes.

United States Aid Fund loans now are available through more than 400 colleges in some 41 slates, usually those that do not have their own state programs. The interest rate is a reasonable true 6 per cent per annum, including credit life insurance. No payments are required until after graduation. Unlike the National Defense Act loans, these loans do accrue interest while the student is still in school. The actual loans are made by cooperating hime-town banks. Your college can give you additional information.

Heme-town, Religious, Nationality Organizations have a larger number of student loan funds at low cost. These organizations include PTA's, high schools, women's clubs, churches, civic organizations as Rotarians and E'ks, The Grange, fraternal organizations as Knights Templar, and many others. In some cases, loans are limited to members; in other cases, any applicant is slig be. Your high school can tell you about local loan funds.

Preduction Credit Associations may be a source of low-cost college loans for rural dwelle.s, ine ating farmers and part-time farmers, advises L. Theodore Schoon, Coneral Manager of the Hastings, Minnescia FCA. The PCA's are cooperative organizations providing credit for farmers.

tually leveled by the March 27 earthquake which struck the Alaskan coastline.

Shipments of the first food to be exported from the state since the disaster, an air shipment of 220 cases of canned salmon and reindeer sausage, destined for the World's Fair, has already arrived in New York. Now with the advent of the salmon canning season, some of the sea-food canneries are beginning to hum again.

During the quake, at least 27 members of SIUNA affiliates were confirmed as dead. The Cal-Pak Company of San Francisco, which is under contract to SIU-affiliated Cannery Workers of Union of the Pacific, estimated its losses at the time of the quake at between \$400,000 and \$500,000.

Other SIU-affiliated companies,

tained heavy plant losses. The Alaska Ice and Storage Company, Quizinke Packing Company, fish packers near Kodlak, was a total loss. In Kodiak, the Alaska Packers Association also reported a although reporting no deaths, sus partially destroyed as was the inland.

The tremendous destruction wrought by the earthquake and tidal waves which hit the coast of Alaska is evident in the picture total loss, as did Alaska King above showing fishing boats left Crab. Pan-American Fisheries was scattered high and dry and far-

REPUBLICAN PUSH. Ten major industrial areas have been pinpointed by the Republican party for an all-out drive to harvest votes among minority and low income groups. Together, the 10 big cities represent states which control 220 of the 270 electoral votes needed to elect a president. The cities are New York, Los Angeles, Detroit, Chicago, Baltimore, St. Louis, Philadelphia, Milwaukee, Newark, and Minneapolis-St. Paul. The drive will eat up a big portion of the \$12 million campaign kitty Republicans figure they will need to finance National Committee activities for the 1964 campaign. According to a memorandum circulated by the GOP, about \$9.5 million will be poured into the presidential contest; \$2 million to help GOP candadates for the House, and \$500,000 for senatorial candidates.

#### \$

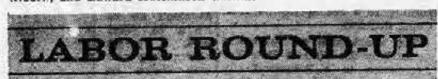

MEDICAL CARE COSTS. Since the third quarter of 1962, daily service charge in hospitals has soared 6.6 percent and the cost of hospital insurance by three percent, according to the Department of Health, Education and Welfare. Overall medical care prices have hit a record high of 117.2 (1957-1959 is base period of 100 percent), and hospital costs alone are 139.6, up nearly 40 percent from the base period. These orbiting costs hit America's millions of elderly hardest, but the American Medical Association continues to insist there is no need for President Johnson's proposed health care program under social security.

### 1 1 1

CONSUMER PROTECTION. Perhaps this year, perhaps next year -but surely someday-the American consumer will be protected against interest-gouging on loans or on goods purchased on time. When this happens, it could be that just one vote made it possible. The one vote decision came recently in a Senate Banking Committee subcommittee which had been sitting on Sen. Paul Douglas' (D-Ill.) truth-inlending bill for two years. By a 5-4 margin the subcommittee sent the bill to the full Banking Committee. Voting for the consumer were five Democrats-Douglas, Clark (Pa.), Proxmire (Wisc.), Williams (N.J.), and Muskie (Me.). Against the bill were Dixiecrat A. Willis Robertson (Va.), and Republicans Bennet (Utah), Simpson (Wyo.) and Dominick (Colo.). The proposal would require all lenders to disclose the full cost of loans in dollars and cents as well as in terms of annual interest charges.

#### \$ \$

FOOD STAMPS BURIED. A solid phalanx of Republicans, abetted by five Democrats, recently killed President Johnson's proposed extension of the late President Kennedy's food stamp program in a 19-14 vote in the House Agriculture Committee. Pilot projects of the program in the past few years have helped feed thounsands of povetryridden families. President Johnson had proposed a \$100 million increase to make the program nationwide in his assault on poverty. But all 14 Republicans committee members, plus five Democrats, burled the proposal. Voting against it were: Democrats-Thomas G. Abernethy (Miss.), E. C. Gathings (Ark.), George M. Grant (Ala.), Watkins M. Abbitt (Va.), Paul C. Jones (Mo.), Republicans-Charles B. Hoeven (Iowa), Paul B. Dague (Pa.), Page Belcher (Okla.), Clifford McIntire (Me.), Charles M. Teague (Calif.), Albert H. Quie (Minn.), Don L. Short (N.D.), Cathrine May (Wash.), Delbert Latta (Ohio), Ralph Harvey (Ind.), Paul Findley (Ill.), Bob Dole (Kansas), Ralph Beermann (Nebr.), and Edward Hutchinson (Mich.).

Orangeburg County, SC., has, settlement seemed in sight when the first union in its history now, thanks to a group of workers who instate any of the strikers. Rerefused to yield a second time to intimidating tactics by the county's "most important" people union appealed to central labor Workers at the Kelsey-Hayes bodies in 13 Pennsylvania cities Co.'s Utica-Herbrand Tool Div., and launched a consumer boycott repudiating a powerful anti-union campaign, in addition to the campaign by top management and strike. community leaders, voted for the Machinists by an emphatic majority in an NLRB election. The score was 356 for the IAM, with 85 against. The union victory wiped out an earlier 171-245 loss, in a February election. That vote was set aside by the NLRB because massive community pressure "created an atmosphere of fear of reprisal and loss of job opportunity," the board found. \* \* \* Forty members of the Meat Cutters are continuing their strike against Weis Markets, an independent chain of supermarkets scattered from the Pennsylvania Dutch territory to the coal regions. Meat department employees in six stores voted overwheimingly last year for representation by Local 195 of the Meat Cutters, began talks were resumed and a major city in the state.

Weis announced it would not replacement employees had been hired as strikebreakers, so the

During all of the ceremonies heralding the annual bow to American merchant shipping last Friday-Maritime Day-all the typical speeches were heard proclaiming the importance of the US fleet.

At ceremonies throughout the nation, the participants got in their say, throwing verbal bouquets right and left to the merchant marine and its great importance to the US's economic and defense welfare.

All the talk, however, has a hollow ring when real-life figures are scrutinized.

It is hard fact that the US was in 10th place among the world's ship builders last year, and that our ships are reaching the end of their effective economic life.

Although the US has something more than twice the tonnage of the Soviet Union in actual service, our tonnage is gradually drifting downwards. The Soviets will double their fleet by 1965 and by 1970, it will

sible to contribute to its decline. For example, right now the SIU, along with the other segments of the shipping industry, is fighting to have the laws which were designed to help shipping-such as the Cargo Preference Act-rigidly enforced.

Page Eleven

It is rather ironic that the Union finds itself in the position of insisting to the Government agencies involved that they follow the strict intent of the law.

When, and only when, the Government agencies decide to give American shipping an even break, instead of showing preference to foreign shipping, will the US fleet again take on a healthy growth picture.

It is interesting to note that the apathy shown by America for the status of her active shipping fleet is not shared by all. A columnist for the Chicago Daily News, Norman Ross, wrote last week-with tongue in cheek-of the utter silliness of celebrating

\$ 3 Unionism scored an impressive victory in Detroit recently when the Detroit Federation of Teachers became the sole negotiating agent for the public school system's teachers. The Teachers defeated the unaffiliated Detroit Education Association by a decisive vote of 5,739 to 3,848. The representation election wiped out the Detroit Board of Education's proposal for proportional represenation by the rival organizations, a plan en-

dorsed by the DEA.

\* \* \*

Some 50 members of the Fire Fighters Local 77, St. Joseph, Mo., staged a march on City Hall to protest low wages and poor working conditions. They distributed leaflets showing firemen here average \$75 to \$145 a month less. but talks on a first contract broke than their counterparts in Kansas down over union security and the City, Springfield and Independemployces walked out on August ence, and that they work longer 13. Two months after the strike hours than firemen in any other

have tripled.

At the rate the Russians are going, they expect to have 1,746 ships totaling 9,900,000 deadweight tons by next year. If the US keeps its present snail's pace, it will have 843 ships afloat, totaling 12,800,000 tons.

And, by 1975, the USSR should have 2,619 ships at 14,800,000 tons while the total US fleet will have shrunk to 644 ships-12,200,000 tons.

Over the last 10 years, the US active merchant fleet has been shrinking at the rate of 43 ships a year.

The answer is not in speechmaking, nor holidays and ceremonies, nor is it to be found in lip service to the fleet's importance.

A case in point is that on this Maritime Day, while Government agencies are among those professing their recognition of the importance of the American merchant marine, they are in actual fact doing everything pos-

such things as National Pickle Week and Have a Bacon Ball Month.

Writer Ross said that "Despite all the festivities and hoopla that are bound to surround these observances, we should at least note in passing that tomorrow is Maritime Day."

Then Ross went into detail about the real dangers facing US shipping-the same dangers of which every Seafarer is acutely aware.

In closing, Ross said that ship construction should be doubled, and subsidies more freely given, as just two ways to narrow the gap between the US and other seafaring countries. He added:

"Maritime Day is a good one on which to begin. It's even more important that we do so than having a bacon ball or saluting the pickle."

We could not agree more with Mr. Ross.

Vice-President, Contracts, & Bill Hall, Headquarters Rep.

### **0.T. For Painting Engineers Foc'sle**

A couple of interesting questions were received recently from Edward E. Lyle, engine delegate abroad the Trans Orleans. One question has to do with which department is responsible for the painting out of the Engineer's quarters; the other concerns itself with whether or not the chief pumpman receives overtime for transferring fuel oil.

Question No. 1: Whose job is it to paint out the Engineers' Quarters? The Chief Engineer and Chief Mate say that it is the Deck Department's job. I've always had the impression that the Wipers were supposed to paint the Engineers' Quarters, and the Deck Department took care of the Mates and Stewards Department Quarters.

Answer: This work is considered the customary duties of the Deck Department. When members of the Deck Department perform this work, they are entitled to overtime either on or off watch.

Reference: Standard Tanker Agreement, Article III, Section 17. Using Paint Spray Guns. The licensed officers' quarters, washrooms, galley, Steward Department storerooms, hospital, slop chest and all enclosed passageways on the Captain's Deck when brush painted, shall be overtime for Deck Department Unlicensed Personnel whether on or off watch.

Question: Is it overtime for the duties of his particular rating." Chief Pumpman to transfer fuel oil? The Chief Engineer says it is Deck Department are working not, for the simple reason that the overtime. They knock off at 5:00 transfer pump is in the forward PM to eat and then return to pumproom.

Answer: This is not considered the duties of the Pumpman. This work is performed by the Engineers. In the event the Pumpman is required to perform this work, he shall receive overtime.

Reference: Standard Tanker Agreement II. Section 10: CUS-TOMARY DUTIES. Members of all departments shall perform the necessary and customary duties of that department. Each member of all departments shall perform only the recognized and customary duties of his particular rating."

The Contract Department also received a series of questions on gangway watches for the carpenter, meal hour while working OT. and the equalization of overtime, all from J. A. Da Silva of the Steel Age.

Question No. 1: Does the Ship's Carpenter stand gangway watch?

Answer: No. This is not considered part of the customary duties of the Carpenter.

Reference: Standard Freightship Agreement, Article II, Section 10.

Customary Duties. Members of all departments shall perform the necessary and customary duties of that department. Each member of all departments shall perform only the recognized and customary

Chip Ahoy

Question No. 2: Members of the work. They receive a penalty meal hour as they were not allowed a full hour for their meal. We would like to know if there is any specific amount of time allowed for the crewmembers involved to eat their meal and get back out to Deck.

Answer: The contract does not provide a specific amount of time in the case you have outlined. The crewmembers would, of course, be allowed a reasonable length of time to eat their meal. The purpose of the penalty meal hour is to compensate for their loss of their full meal hour.

**Order Of Watches** 

ment joined the ship in 1963. fits for its workers. Seven replacements were shipped March of 1964. When the ship signed on for a new foreign voyage in New York March 22nd, four more replacements joined the Deck Department shall stand city's economic well-being. gangway watches?

Answer: Regardless of the number of Deck Department members who stayed aboard the ship from the previous voyage, the customary practice throughout the years has been for the Deck Department to draw numbers in order to determine the order in which ing at the 1963 Lucky Internationthey shall stand gangway watches. In the event a crewmember should turn down a gangway watch, then, of course, he would not be entitled to make this up.

Who Is Responsible?

Question No. 4: The day worktime far ahead of the watch standers in overtime. The contract says that overtime shall be equalized. Who is responsible for sceing to it that the overtime is equalized? Answer: Equalization of overtime refers to maintenance overtime such as painting, chipping, etc. It is the company's responsibility to see that the overtime is equalized as much as possible provided, of course, that crewmembers do not turn down overtime. In which case they would not be entitled to equalization. Reference: Standard Freightship Agreement, Article III, Section 2. Division of Overtime. All overtime shall be divided as equally as possible among the members of the deck crew.

## 50,000 Pickets **Shopping Bags Are New Strike Weapon**

NEW YORK-The cat's out of the bag because the message is right on the bag-on about 3 million bags in fact-telling shoppers about the International Ladies Garment Workers beef with Judy Bond Blouses+

bold print "Don't Buy Judy Bond."

The Garment Workers dispute with Judy Bond began in 1961 when the company moved most of its manufacturing operations from New York and the Northeast area to the South. The union charges that Judy Bond is operating runaway plants to take advantage of low-wage employes.

The union hit on the shopping bag idea as the perfect way to get their message across to shoppers in the big stores in New York and other cities where Judy Bond products are sold. Most shoppers knew nothing about the beef until they were either given one of the free bags or saw the message bobbing

# **Coast Labor Raps Low Pay** Yacht Club

SAN FRANCISCO - The San Francisco Labor Council has made it known to the city that it will oppose extension of a private yacht club's lease at the Marina Municipal Yacht Harbor unless the city insists that the club pay Question No. 3: The Deck De- prevailing union wages and bene-

Substandard wages and benefits are now being paid by the St. Francis Yacht Harbor, the Labor Council charged, which are undermining those of workers under ship. What system is to be used union contract with other employin determining in what order the ers and are detrimental to the

### Supports Employes

By extension, the Labor Council's warning gives support to all employes of private concerns using city facilities.

The Council noted that San Francisco labor had halted picketal golf tournament after a plea by the city that a non-union concessionaire had already been given a lease, with a promise that strong efforts would be made to prevent granting future leases without protection of employes.

ers aboard ship are at the present Culinary Workers, which brought The Joint Executive Board of the matter before the Council, cited a ruling by the city attorney that such prevailing wages and benefits clauses were entirely legal and the city could insist on them

and advising them in big, along the aisle of a department store at the end of a fellow shopper's arm.

> "On any given weekday in New York City," said a union spokesman, "we probably have about 50,000 people helping us picket Judy Bond. They take our picket signs into the stores. You can't do much better than that." The shopping bag picket signs represent the widest campaign of its kind ever carried out, the union feels.

### Survey Made

With the campaign in full swing a reporter for a New York newspaper carried out a random sampling of persons carrying the shopping bags to determine just how successful the operation was turning out. His questioning established that some people were simply making use of the free shopping bags with no thoughts about Judy Bond or the dispute. Others, however, said now that they knew about the dispute they would definitely not buy the company's products.

A Bronx lady carrying one of the shopping bags through a store said that the bags had first drawn her attention to the dispute and that she would definitely not buy Judy Bond products as a result.

WASHINGTON - Unions have the right to recommend laywers to represent individual members in work-connected litigation, according to a recent US Supreme Court decision.

The court said an injunction secured by the Virginia State Bar Association in a Richmond city court-later upheld by the State Court of Appeals-denied to members of the Railroad Trainmen rights guaranteed by the First and Fourteenth Amendments.

The right of workers to advice on the need for legal counsel "and, importantly, what lawyer a member could confidently rely on," is an inseparable part of the constitutional right of the members to old enough to be drafted, he is

Question: Do you feel that eighteen - year - olds are old enough to have the vote in this country?

Arne Boekman: No, I don't think they should. I don't think they

have enough political experience by the time they are 18. They should be at least 21, and maybe even 25 before they should be allowed to vote in

national elections. When a man is able to get a drink, he should be able to vote, not before.

### t t t

John Murray: I feel that if a man is old enough to get drafted

and shot for his country, he should be considered old enough to have a say in the Government, I think the age for voters should be moved down to 18. If you're

old enough to fight, you're old enough to vote.

> \$ 1 1

William Gibbons: I think a man should be 21. It is important that

he should be able to make up his own mind by the time he is given the opportunity to vote in important elections. I am a retired serviceman, but I do feel that a man should be 21 or over to vote.

1 1 1

Clifford Herring: If a man has the responsibility to be out on

his own, why shouldn't he be able to vote? And, I have known many men who were on their own and doing well before they were 21. Anyway, I feel

that if he is old enough to be shot down in the Army, he is old enough to vote.

Walter Guftavson: If a man is

The man behind the chipping hammer in the photo above is Charlie Shalos, mate aboard the SIU Inland Boatmen's Union-contracted tug Theresa.

### **Money Due**

The Contract Department has settled a long standing dispute on the Niagara, Voyage No. 4. The Department is holding checks for the following crewmembers of that ship and the checks can be had by dropping a letter to the Contract Department:

Christo T. Anastasiou, Richard Anderson, Robert C. Bujan, John W. Gigson, James L. Grant, Francis M. Greenwell, Richard Heckman, Herbert Mills, Jose A. Paz, Albin Samoska and John J. Wynne.

assist and advise each other, the court said.

#### **Ruling Removes Threat**

The court's finding, a union attorney said, removes the threat that unions have faced for years of bar association action charging unions with unauthorized practice of law for recommending counsel in workmen's compensation cases. It does not, another attorney observed, dispose of the question of union counselors retained by city or state central bodies to represent injured and unemployed union members without fee before state agencies,

At issue in the Trainmen's case was the legal aid program of the BRT, under which the union's Department of Legal Counsel selected a lawyer or firm in each of the union's 16 regions who was, in its opinion, competent to represent injured rail workers or their survivors,

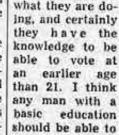

old enough to have a voice in his Government. I feel that most kids of that age have enough political knowledge, and they do have to be ready to fight for the

country, so they should be able to vote.

> \$ 本 1

Louis Perez: The kids of today are educated enough to know

vote in national elections by the time he is 18.

# Marriage At Sea—Is It Legal?

Weddings performed on the high seas under the direction of the ship's captain made some pretty good footage in those pot-boiler Hollywood epics of yore, but for those of us who do our marrying off-screen, the ocean-bound wedding may be more romantic than binding to the couple involved.

Lovestruck couples involved in such an at-sea idyll would do well to check the laws of the nation whose flag the ship flies and also take a look at the laws of the state of the vessel's port of registry before they decide to ask the ship's captain to tie the knot.

Contrary to popular belief, the captain of a ship has no special authority to merge ocean-bound lovers who prefer the spray of salt to the spray of rice.

If you happen to be married on a ship that belongs to a company incorporated in the State of New York, then state law might well consider the marriage to be null and void and either party would be free to go their own ways without the threat of criminal punishment hanging over their heads.

However, if the prevailing state law empowers the ship's captain with the right to perform marriages, then the merger is on a firm foundation, and the marriage is solid.

Now another legal entanglement called "common law marriage" enters the picture. A common law marriage, where recognized, is consummated when a man and woman mutually consent to enter a relationship as man and wife and agree to assume the responsibilities entailed in such a relationship, which includes living under the same roof.

Let's assume that Joe and Jane succumb to the romantic allures of a moonlit sea and decide to be married by the captain of a ship that was registered in a state that did not recognize the captain's authority to perform such a ceremony. Now the question arises: does the marriage have a legal foundation.

Well, if the captain is not authorized, but the country or the state in question recognizes common law marriages, then a legal marriage has taken place.

ceremony is required to consummate a common law marriage, as long as the participants share the elements of mutual consent.

However, each state has a different judicial disposition toward common law marriage with some recognizing them as binding and others, void.

The State of New York, for instance, has abolished common law marriages and considers such as having no legal basis. The laws of other states direct that marriages be performed by certified officials, but they do not necessarily invalidate those that are not so performed.

New York State Law specifically excludes the ship's captain as a legal matchmaker,

The marriage of Harry and Aedita Fisher by a ship's captain during the 1920's drew the attention of many legal pundits because of the jurisdictional issues involved.

The Fisher's, bound for Southhampton on the steamship Leviathan, were married by the ship's captain when the vessel was out-bound some 40 miles from the port of New York.

As NY State Law recognized common law marriages at the time, the New York Court of Appeals declared that the marriage was valid. However, since the Leviathan was registered in the District of Columbia, the New York Court state of New York, which not see fit to be married again after looked to the District of Columbia to see whether any of their laws barred the marriage. It found none. The New York Court in render-

ing its final decision found that

No special ceremony, or any concerning the validity of the marriages that occur while the vessel is at sea. marriage.

The court grudgingly admitted that in this case Federal Law overruled state law, when it pointed to a provision of the US code covering Log Book entries which requires every master of a vessel making voyages between US and foreign ports to make an entry in the official log of "every marriage taking place on board, with the names and the ages of the parties." However this point of law has been refuted by US Coast Guard Captain Frederick Arzt, the author of "Marine Laws" and a man who

SEAFARERS LOG

is considered to be an authority on marine legislation.

Arzt states in his book that the US code proclamation on at-sea marriages has "resulted in an and that Mary's marriage to John tions laws of the states for defierroneous widespread belief that it did not constitute a "putative authorizes the masters of vessels to perform marriage ceremonies. Supporting Arzt's point of view that such a provision carries no authorization, is the fact that the emphatically prohibits ship's captains from performing ceremonies. nevertheless also requires by law that the master, or certain other crewmembers connected with a

Now having explored the vagaries of weddings performed by the ship's captain, we turn to another area in question: whether an alleged common law wife of a sea- | validate Mary's illegal marriage to man can recover damages under John. the Jones Act as his widow.

The case in point involves John Ware Bell, a seaman who died in 1959. A claim filed by one Mary Virginia Bell, who asserted that she was the widow of the deceased, and therefore entitled to damages under the Jones Act, held up settlement of his estate.

A year after John's marriage to in 1959.

Mary's plea that she was ignorant marriage," one which is defined in law as a marriage contracted in good faith and in ignorance on one or both sides.

The fact that Mary and John did he was legally free from Catherine, also served as a detriment that she was the only widow to Mary's plea for benefits. The Court ruled that the fact that a divorce decree was eventually gible group and so, in the end, she NY State Law had no application 'vessel, report to the city clerk all granted does not relate back as to lost her case.

However, the principal weight in Mary's case lay in her contention that there was no rival claimant widow; that admiralty law seeks uniformity in application and that it was unconstitutional for Congress to allow Virginia statutes the power to declare and control the rights and liabilites of parties arising out of negligently caused deaths on navigable waters.

Although Mary's point was well taken, a ruling in her favor would mean a reversal of many cases decided to the contrary by the

The Virginia Court, in summing up, stated that "Federal courts making a determination of the requisite legal status necessary to effect recovery under a number of federal statutes have consist-The Court in Virginia rejected ently considered a valid marriage under state law essential, and of John's marriage to Catherine, have turned to the domestic relanition of such familial status."

Relating this point of law to Mary's argument, the Court maintained that since she was not within the class of persons whom Congress intended should be entitled to benefits for the negligently caused death of a seaman, the fact claiming benefits did not mean that she became a member of the eli-

## SIU Ship To Aid Alaska

The SIU Pacific District-manned freighter Coastal Monarch has been named as the mercy ship to carry a gift of lumber and other building materials to the earthquake devastated area of Southwestern Alaska. This ship was recently broken out of moorings on Lake Washington and readied for the voyage. The Monarch sailed first to Grays Harbor to load 300,000 feet of lumber and plywood, then to Coos Bay for 450,000 feet more and then on to Portland, where she sailed after loading more lumber and general building materials.

Warning that thousands of jobs were at stake, the AFL-CIO Southern California Ports Council urged the US Department of Agriculture to adhere to established raw cane sugar import policies here in San Francisco recently. The resolution was adopted by delegates of 34 unions affiliated with the Council, which is a division of the AFL-CIO Maritime Trades Department. The Council noted that Congressional law required the DA to "import millions of tons of raw cane sugar from foreign countries. This raw sugar is processed by US refineries where automation has already cut deeply into jobs of American working people." But, the Council pointed out that "the Department of Agriculture has been deviating from this policy, thus adding unemployment both among sugar cane refinery and maritime workers."

San Francisco celebrated National Maritime Day in a big way this year, just as it has in the past. At the ceremonies' high point, forty of the city's civic leaders and maritime officials gathered on the mid-span of the Golden Gate Bridge for the traditional tossing of wreaths in memory of men killed in maritime disasters. The wreaths were thrown as the mournful notes of taps were sounded by a California Maritime Academy bugler.

Later, at a Propeller Club luncheon, Undersecretary of Commerce Clarence D. Martin told guests that "our maritime resources have not kept pace with our national industries growth, or with the growth in our foreign trade." However, he noted one bright spot when he said that "American President Lines, in cooperation with the Maritime Administration, will issue invitations next month for bids on the construction of four advanced design replacement ships."

We got the chance to visit with Pierre Salinger at a local SF restaurant recently. He gave a very interesting talk on what he would do for the voters if elected as US Senator from the state of California. Although the State Federation of Labor is backing his opponent, Allen Cranston for the Democratic nomination, Salinger is picking up a lot of strength throughout the state, and now has quite a following. In any event, it looks like it will be a hot race

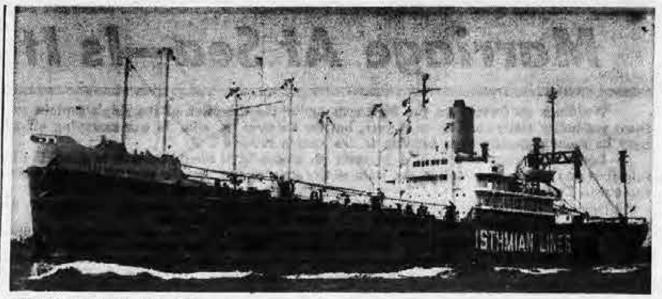

by Mayor Samuel E. Yorty of LA recently. The city's chief executive was referring to the harbor's "last frontier," available for full-scale development on the southern side of Terminal Island.

"Our harbor now operates 80 shipping berths for world trade, berths, increasing the cargo handling capacity of the port by 150 per cent.'

Yorty pointed out that the shipping activity for both import and export items at the LA Port is up 25 percent over the same period last year.

Shipping remains fairly good in the Port by the Golden Gate. We are paying off the Orion Comet and the Orion Clipper as the LOG goes to press. Joe Goude just returned home after a year on the Steel Vendor as carpenter and has now been ordered to do some real work on his 'south forty,' mowing crab grass and taking care of the walnut trees. Although Joe originally hails from Charleston, SC, he has made his home in California for the past several years.

Mike Olenchik, an old timer from the East Coast who continually drops by a place in Nevada known as Reno is on the beach. His advice is "to slay away from Reno and a game called keno." The gambling took him so bad that he is now looking "for anything smoking and headed anywhere to make some loot." Horace Carmichael finally decided to take a few months off after having been steward on the Iberville since November, 1959. He says the SIU means it when they talk about job security. Horace has been around for many Diego shipyard, representing the years and is very proud of the achievements that the Union has made in the past years especially in the direction of welfare and pension for its members.

That lettering on the side of the Isthmian freighter Steel Executive is nine feet high and was freshly painted when the ship arrived recently at Norfolk after a direct voyage from Honolulu. Four Isthmian ships have been assigned exclusively to service between the Hawaiian Islands and East and Gulf Coast ports. They are the Steel Executive. Steel King, Steel Advocate and the Steel Chemist. The SIU-contracted company took over exclusive operation of the service in May following many years of joint operation with Matson Navigation.

# **Sea Land Service Enters** West Coast-Hawaii Trade

SAN FRANCISCO-The SIU-contracted Sea-Land Service, has announced plans to enter the West Coast-Hawaii containership trade later this year or early next year.

The Sea-Land announce-

ment said that sailings will ended earlier this year with the probably be on a bi-weekly basic at first.

In entering the Hawailan trade, Sea-Land will be competing with SIU Pacific District - contracted Matson Navigation, which has been steadily expanding its West Coast-Hawaii containership operation in recent years.

A joint service by Matson and SIU-contracted Isthmian Steamship from the East Coast to Hawail

withdrawal of Matson from the arrangement. Matson now maintains a new container service from the East Coast to Hawaii in conjunction with a forwarding company which ships Matson containers from the East Coast to the West Coast by rail, from where they are loaded aboard Matson ships for the final leg to Hawaii.

### Assigns Ships

Isthmian, on the other hand, has assigned four ships exclusively to the East Coast-Hawali route to make up the loss of the Matson tonnage.

Sea-Land's entry into the trade follows its recently inaugurated route from Seattle to Alaska, in which it employs two vessels with a capacity of 166 containers eachinterlinked with the company's intercoastal service by a barge service it maintains based at the Sea-Land terminal at Oakland.

Bookings on the new Alaskan service are very heavy according to the company and are expected to increase as a result of the vast reconstruction program going on in Alaska as an outgrowth of the recent disastrous earthquake damage suffered by that state.

As a result of the changing patterns of Sea-Land trade routes, the company has also announced that it has applied for permission to change the name of the vessels now assigned to the Alaska route. The New Orleans would be renamed the Anchorage and the Mobile would be called the Seattle.

The actual date of Sea-Land entry into the West Coast-Hawall trade is dependent on when company vessels can be spared from who have the time to travel and other routes, a spokesman said.

# **APL To Replace** for the nomination, scheduled for June 2. A Port of Los Angeles with double its present capacity and an additional value of nearly \$250 million by 1985, was envisioned Liners Polk, Monroe

SAN FRANCISCO-The SIU Pacific District-contracted American President Lines, has announced plans to replace Yorty said. "The new area will provide an additional 75 modern two combination cargo-passenger liners, the President Polk and President Monroe. The +

> company said that it plans to start of an 11-ship replacement give more weight to cargo program for APL. operations

The Polk and Monroe will be replaced by new "super-mariner" class freighters with only 12 passengers and more cargo space and speeds of 20 knots. The keel for a new marine President Polk has already been laid at a San Diego shipyard and two more of the newer type vessels are planned to replace the President Monroe and the President Harrison, a freighter still in service.

Contracts amounting to \$27

Beginning in 1965, APL plans to provide round-the-world service only with the 12 passengermariner type freighters. The company reportedly reached this decision because cargo operations of the combination liners Polk and Monroe had been making money but only two-thirds of the passenger facilities were booked. By contrast, APL's six 12-passenger freighters plying the same route are solidly booked with passengers for months in advance. The million have been let with the San company attributes this to the fact that most round-the-world 0.950 ngers retired couples prefer the more informal life aboard the small freighters.

In Wilmington, shipping has been fairly active over the last two week period. A total of 22 men to eight ships in transit was recorded. The Iberville had a port payoff, having come down from Seattle and San Francisco. She is now headed back to Japan and Korea. They expect shipping to remain pretty fair down there with eight or nine in transits expected.

Pensioner Oskar Osmundsen stopped by the hall recently to say hello to his old shipmates and to keep up on Union activity. Oskar thinks we have the finest pension plan not only in maritime, but for any industry. Its the only plan that takes care completely of all medical, hospital, surgery, etc. in the country for pensioners. "We've come a long way," says Oskar. Richard Kohls has been a full book member now for 12 years and has been riding Waterman C-2's off and on for the past eight. He just shipped as FWT to the Antinous and is looking forward to finding the living quarters changed to watch foc'sle for the engine department, "Thanks to Headquarters and all officials for making this much needed change on this type vessel," he says. Anders Ellingsen just got his fit-for-duty after having been on the beach for several months. Instead of taking a ship, however, he flew to Oslo for a few months needed vacation with his family.

Up in Seattle the New Orleans, Iberville, Fairport, Longview Victory, Robin Kirk, Mobile and Choctaw have paid off so far this month. In the coming weeks, the Trustco, National Seafarer and Young America are expected to pay off.

## SIU West Coast Ships Modified

Three new ships have been modified for the SIU-Pacific District-contracted American Mail Lines, and the changes have been approved by the Maritime Subsidy Board, it was recently announced in Washington, D.C. The modifications, completed by Todd Shipyard, Inc. of San Pedro, result in an increase in the contract price of \$493,990. Out of this total, \$239,495 is for the Government account. and \$254,495 is for American Mail Lines account. The modifications relate to reducing stations, modification of interior design, ton booms and rigging, scantling plans, time extension and penalties for late delivery.

A STATE OF A

The company will continue to operate the passenger vessels President Cleveland, President Wilson and President Roosevelt between California and the Far East.

The President Hoover is presently in layup in San Francisco pending completion of negotiations between APL and a newly formed company, Hawaiian Monarch Line, headed by Canadian businessman Arnold J. Swanson,

Negotiations for the sale are being held up by government restrictions on sales of merchant ships to aliens and the operation of a foreign-owned vessel in a US domestic trade. Hawaiian Monarch plans to convert the Hoover into an inter-Hawaiian Island cruise ship, catering to the carriage trade in the Islands.

### **Mail Crew Lists To Union Office**

1

In order to keep Union records up to date and to fully protect Scafarers' rights to welfare and other benefits, it is important that all ships' delegates mail a complete SIU crew list in to headquarters after the sign-on. The crew lists are particularly valuable in an emergency when it's necessary to establish seatime eligibility for benefits on the part of a Seafarer, or a member of his family, particularly if he should be away at sea at the time. The crew list forms are being mailed to all ships with each issue of the LOG and can be obtained from Union patrolmen in any port.

and Fred Farnen, Secretary-Treasurer, Great Lakes

### Heavy Shipping For Lakes In 1964

No doubt about it, 1964 looks like a record year for shipping. The ports of Frankfort, Chicago and Buffalo have reported extremely good shipping for engine department men, especially firemen. Alpena and Cleveland reports indicate that shipping remains good in their areas. Duluth is having a fine year with many old-timers shipping to permanent berths right from fit-out. Detroit continues to lead all ports in registration and shipping; and with the recent pay-off of the A & J Faith, this port is now facing a critical shortage of rated men in all departments. We expect three more deep sea SIU vessels within the next 30 days.

Servicing the membership and its needs has always been the policy of the SIU, and we intend to keep it that way. Algonac, the home of the Speedy Mariene, is just about ready to operate. The Speedy Marlene has had its annual overhaul and the SIU Service Center has had a new paint job.

In addition to the Speedy Marlene, we will put into operation another speedboat to better service crews and vessels in the St. Clair River.

When Westcott closed its operation in Port Huron last year, we could no longer ride vessels upbound Algonac to Port Huron. With another speedboat (which will operate just below Port Huron), we will be able to service many more vessels than we have in the past.

The United States Coast Guard issued orders to the Mackinac Transportation Company to repair the boilers on the carferry Chief Wawatan or cease running it. The Wawatan is an SIU-manned carferry operating between the Straits of Mackinac and serves as a railroad link between Upper and Lower Michigan. At the request of Attorney General Frank J. Kelley, Judge Noel Fox issued a temporary injunction blocking the abandonment of the carferry.

The Coast Guard has given the company until the end of May to repair the boilers, and Judge Fox told the railroad that it was up to them to find the answer of how to keep operating with the condemned boilers. The Chief Wawatan is the only carferry in the United States that is equipped both as a railferry and icebreaker, which is necessary to operate 12 months a year at the Straits.

Local 10, Transportation Services and Allied Workers, has finally after a two-year struggle, been awarded an election date by the NLRB, Detroit Regional Director, Jerome Brooks. The election is scheduled for June 8 and 9. Voting hours at three polling sites will be from 2 PM to 8 PM. The NLRB officers estimate that 1800 people will be eligible to vote. This group includes regular, lease and parttime taxi cab drivers.

As previously reported, the petition involving 1200 pledge cards was filed with the NLRB Detroit two years ago almost to the day. The election has been the subject of much litigation involving the NLRB, the lower federal courts and the U.S. Supreme Court.

Local 10, TS&AW, has carried the ball throughout these lengthy hearings and court procedures in order to assure Checker Cab drivers of their right to have their own election sponsored and conducted under the supervision of a government agency. Checker Cab drivers have been waiting for union representation for more than 14 years. Local 10 has had the assistance of SIUNA throughout its battle to gain this election.

Shipping from Alpena has been picking up very rapidly, and should be a tremendous year.

Old-timer Edward Ryan is drawing his disability pension and comes into the Alpena hall just about every day to sit around and chat with members on the beach.

Leslie Cook just returned from the V.A. Hospital in Saginaw, Michigan. Cook says he is to return to the hospital in two weeks for an operation. We wish him a speedy recovery.

Cleveland reports there are not too many book men on the beach. Mike Resenak gets in regularly every day for his game of Hearts. James Kissick just got off the Joe Morrow and is going to wait around for the North American to start. George Mitchell, all-around man, just came into town and after a few days off, is ready for the first ship that requires his service.

Harold Hurlburt returned recently from four months on a "Salty." Made a round-the-world trip with Isthmian and had a fine time. runs ahead and astern, crash stops, "Ole" Oloffson shipped last week as permanent watertender on the a series of figure-eight turns at Clipper. When he left the hall with his shipping card, "Ole" said full speed and full rudder to test that he was going home. Willie Bond just left the Highway 16 as chief cook. According to the captain and the crew, Willie did a real swell job and the boys thruster.

Mrs. Eric C. Hallgren, widow of veteran Great Lakes Tug and Dredge Region member Eric C. Hallgren, receives her death benefit check from Chicago port agent Robert Affleck. Hallgren, who died on February 9, 1964, was a member of the Un-Ion since 1961.

# Lakes SIU Ship Goes To Diesel

**DETROIT**-Successful trial runs were recently completed in Lake Superior of the self-unloading Great Lakes Freighter Diamond Alkali (American Steamship), after having undergone a power conversion from gasoline to diesel engines. The Diamond Alkali is manned by SIU Great Lakes District seamen.

Shipyard workers of the Fraser-Nelson Shipbuilding & Drydock Company replaced the ship's old 1,900 horsepower steam engine and boilers with the 4,000 horsepower diesel. A controllable pitch propeller operated by a single lever in the pilot house permits bridge control of the ship's movements, making it the most automated on the Lakes.

The automation changes on the ship also include an entirely new eletrical system, with diesel-driven generators replacing the steampowered dynamos.

#### **Test Runs**

The trials included runs at normal cruising speed, full power the new Superior-Dulit steering gear and the newly installed bow The SIU District also added another ship to its jurisdiction recently when the old American Steamship's Amoco was sold to SIU-Great Lakes District - contracted Huron Portland Cement Company, and renamed the H. R. Schemm. The Schemm will become the sixth specialized cement carrier in the Huron fleet. Just as the others in the Huron fleet, the Schemm will be converted from a conventional bulk carrier to one with special interior equipment for handling cement. At the same time new deckhouses and other equipment will be installed. The vessel had been inactive for four years before being sold to the Portland Company.

## Low Water Alarms US-Canada

# **Plan Joint Talks On** Lakes Water Levels

TORONTO-International discussions between the US and Canada are being planned in an attempt to find a solution to the problem of steadily dropping water levels in the Great Lakes. Speaking before the

already been held to organize a joint conference on this problem.

Low water levels on the Lakes are threatening a slowdown of shipping and other industry in the area. Levels are already down one to three feet below normal with no relief in sight.

Any conference dealing with the problem will almost certainly include representatives from the US states bordering the Great Lakes as well as their counterparts from the Canadian provinces. In addition, representatives from the federal governments of both countries would be included.

Low water levels on the Great Lakes are only one part of Canada's problem. Dropping water tables and drought in the province of Ontario are an associated issue. Unusually low rain and snow

falls have been plaguing the 100,-000 square-mile basin of the Lakes in recent years. As previously reported in the LOG, large carriers in the Lakes are already shipping light every trip because of difficulty getting into ports like Toronto. Hydroelectric officials in Ontario report that lack of enough water to feed the network of power stations on the Great Lakes and the Niagara River is forcing the use of more costly coal-burning stations to generate electricity. Many industries closely geared to the water levels, such as shipyards, are also encountering extreme difficulties.

Because the task which must be

### **Delta Line Gets** Shipbuilding Delay

NEW YORK-The SIU-Contracted Delta Steamship Lines has been awarded a delay of about three-and-one-half years to build two of the vessels in its current replacement program. The delay was given by the Maritime Subsidy Board. Delta had planned originally to let contracts on five ships April 1 for its subsidized service between the US Gulf and the East Coast of South America, with two more to be put under contract April 1, 1965. The action by the MSB

Canadian Legislature recent- undertaken to rectify the problem ly, Premier John Roberts an- Is such a vast one, it is expected nounced that some meetings have that ultimate responsibility will eventually fall to the two federal governments, with the provinces and states co-operating.

One possible solution which Canada has been considering is channeling James Bay water into the Great Lakes. Negotiations on the feasibility of such a move are presently under way.

# **Latins Move To Coordinate** Labor Policy

SAN SALVADOR - A Labor Council of Central America has been set up at a conference of the Labor Ministers of the five Central American republics, which include Guatemala, El Salvador, Honduras, Nicaragua and Costa Rica. The purpose of the new body is to organize and coordinate the "labor and social" policy of the members. The five countries are attempting to integrate their labor forces to aid the development of a Central American common market, while at the same time speeding economic integration and bringing about some sort of social security. The heads of the countries' social security agencies will serve as advisers to the Labor Council, which is scheduled to meet at least once a year.

#### **OAS** Will Advise

The conference at which the Labor Council was established was called by the Organization of American States, which will also have an advisory role in the new council.

A policy of free mobility of labor between the five countries was proposed by San Salvador, which has already decided to permit free transit of all Central American nationals in its territory and has called for the others to do the same.

A Costa Rican resolution on planning was adopted by the group, stating:

"The Central American States should promote and carry forward a social policy that guarantees to all the sectors of their population an effective and just participation in the benefits of economic development, and oriented especially toward bettering the labor sector and of other human groups that are economically weak.

are sorry to see him leave. George Stevenson. Chicago's professional porter, is also waiting on the beach for "an easy porter's job." We can't figure out what an easy porter's job is-he had 13 permanent jobs last year.

Robert Erickson is on the beach in Duluth. He just donated a pint of blood to our SIU blood bank there. Francis Sheehan just returned from a trip around the world on the A & J Faith. He liked the trip very much, but is anxious to get back on the Lakes ships where he is able to see his family a little more often.

.Old-timer Tommy Dunne is a familiar figure around the Duluth hall. He has been very helpful in maintaining the hall and instructing the younger members.

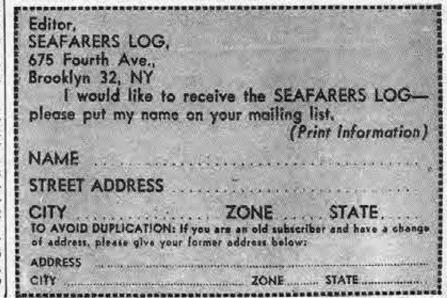

The C. C. West of Reiss Steamship Company arrived in the port of Duluth last week with a load of coal. According to residents, this Is the first time in this port for a self-unloading vessel.

While enthusiastically participating in the Frankfort area's favorite April activity, smelt-dipping, Charles Ritchards tripped and fractured his arm. Ritchards is resting and recuperating on the beach.

Among those checking in this hall cach day to inquire, "how's shipping?" is Lester Sturtevant, who recently returned here from USPHS hospital in Staten Island. "Stu," as his friends call him, recounts many, many stories of how shipping used to be. There have been very few members on the beach in Frankfort for the last month. A full crew has been on the Ann Arbor No. 5, while the MV Arthur K. Atkinson has been in the shipyard.

The Portland Cement Company announced that the conversion, to take place at Sturgeon Bay, Wis., will take all summer and fall to complete.

permits Delta to put off until Jan. 1, 1969, the award of contract for the sixth and seventh replacement ships for this service.

#### SEAFARERS LOG

# Waterman Gets **Safety Citation**

NEW YORK-The SIU-contracted Waterman Steamship Corporation was honored along with several other steamship lines by the National Safety Council at a luncheon here re-

cently. Waterman won and award in the Safety Council's is a participant in the joint SIU-Annual Safety Contest for 1963, cargo and passenger vessel division.

Twelve of the 29 ships operated by Waterman during 1963 completed the year without a single lost-time accident, it was announced by the Waterman Safety Director. The shipping company

# **Court OKs Ship Charter** Cancellation

NEW YORK-A Federal District Court judge here has ruled that the Federal Government had the right to cancel a tanker's charter after the vessel was unable to load oil in the Persian Gulf because of the Arab boycott against ships trading with Israel.

The decision came in a four-year old legal battle in which the Pan up with the volunteers in the Cargo Steamship Corp., owner of smoke-filled hold. the T-2 tanker National Peace, had gone to court seeking \$160,110 in damages claiming the Navy had unlawfully cancelled a charter for the 16,704-ton vessel.

The judge ruled that the Navy was within its rights in cancelling at 1:15 AM Sunday when the first the charter under the provisions of the "Haifa Clause," which was the smoky cargo area. Work on written into the charter. Under removal of the Hessian cloth rolls this clause the Navy could cancel the charter, require substitution of another ship of similar size, or nominate another loading port in ficient space had been cleared to case a vessel was prevented from allow entry into the lower hold. loading by local authorities because of previous trade with Israel.

Although the clause was later discontinued on the ground that it tended to support the Arab boycott of Israel, it was still in effect when the National Peace was refused pleted to serve breakfast. Jimmie

was really at fault in the matter because "the loss was occasioned dinating the work of one of the by the refusal of Saudi Arabia to shifts. The entire operation was permit the cargo to be loaded," the judge decided that the loss should Riddle, chief officer. be carried by the owners of the vessel because they "knew the facts of the voyage of Memory I to Israel." Memory I was the tanker's Charles E. Johnson, Lysle W; previous name.

management Safety Program conducted under the Maritime Advancement Programs. "Prior to 1959 we did not have

any vessel complete a year without a lost-time accident," Smith said. "However, since 1959 we have had a steady increase in the number of vessels completing the year without a lost-time acci-dent."

Seafarers who make up the unlicensed crews of the Waterman ships were highly commended for their spirit of cooperation and safety minded attitude which has contributed so much to the steady improvement of Waterman's safety record. "Safety is everybody's business and SIU members certainly have done their part to develop this attitude," the safety director added.

> Other Seafarers who were part of the volunteer crew were John L. Ohannasian, Clarence Pryor.

Seafarer Robert Smith is shown here registering at the SIU hall in Philadelphia. SIU Rep. Charlie Stansbury is handling the typewriter. Smith sails in the engine department and was hoping to hit the high seas again very soon.

By Joseph B. Logue, MD, Medical Director

### 'Splint 'Em Where They Float

In recent years the medical profession has been increasingly successful in educating the general public to the dangers of moving the acutely injured patient, and it would be rare indeed at the scene of an automobile accident not to hear some one in the crowd say, "Don't move the patient." This basic principle of "splint 'em where they lie" has been widely disseminated by the medical profession and accepted by the public.

However, in the case of water or diving accidents, the exact converse seems to be the rule, the primary thought being to "get them out of the water." This is understandable since drowning is the danger uppermost in the public mind. However, in this type of injury, the danger of aggravating the injury is even more probable than that in an automobile or other accident.

In injuries resulting from diving or other water accidents, the injured should be either floated until trained help arrives or removed with a rigid spine support, because of the frequent occurrence of cervical fractures, according to Dr. Richard W. Rado writing in the Bulletin-"American College of Surgeons."

The association of cervical spine fractures with diving accidents is an accepted fact. That this is a frequent injury is indicated when 34 cases of cervical spine fractures as+

the result of water accidents were reported from 49 hospitals in New Jersey alone in 1962 and 1963. It is well known that cervical spine injury is more prone to result in severance of spinal cord than in any other vertebra fracture.

### Stay in Water

With these facts in mind, the removal of a patient from the water following a diving injury by untrained persons is a frightening thought, since removal of this Fuertado, Emmanouil I. Halkias, patient from the water makes fur-The Government "did not know Andrew Kinney, Henry C. Moffett, ther injury almost inevitable. The

# Engineers Hit FAA **Crew Cutback**

WASHINGTON-The AFL-CIO affiliated Flight Engineers International Association has thrown up resistance to a new Federal Aviation Association proposal to change its rule governing minimum flight crews on large aircraft.

William A. Gill, Jr., the President of the Flight Engineers, fired off a telegram to Najeeb Halaby. FAA Administrator, protesting the proposal to change the law requiring at least three crew-memberstwo pilots and a flight engineeron all planes with a takeoff weight exceeding 80,000 pounds to a crew of at least two. The present rule applies to nearly all four-engined planes.

The FAA called for comments by July 1 on its proposal to drop the standard and substitute a more flexible approach based on study of the individual type of aircraft: its performance, its cockpit design and equipment, and resulting crew workload.

The change, if it becomes effective, would apply to planes gaining FAA certification after Jan. 1 of this year. At the outset, it would involve the new Douglas DC-9 and the British BAC 111, neither of which has, as yet, been cleared by the Agency. Certification means an aircraft meets Government standards of airworthiness.

In his telegram, Gill said he was "shocked" at the FAA statement that flight engineers among others agreed to the change. "Nothing could be further from the truth." Gill said. He said the Civil Aeronautics Board is at present conducting a study of cockpit operations and he asked Halaby to withdraw the proposal "at least until the findings of the CAB in this and other related areas are made known."

A CAB official said the study is expected to be completed about mid summer.

The Air Line Pilots Association, AFL-CIO, which had insisted on the 80,000-pound standard originally, had no immediate comment on the FAA proposal, but has contended in the past that the short range jet BAC III does require a three man crew.

The Flight Engineers are still on strike against Eastern Air Lines because of that airlines' move to cut flight engineers from their cockpit crews.

# **Charge US Oldsters Victimized By Fine Print In Health Plans**

WASHINGTON-The president of a Florida senior citizens club told a Senate subcommittee that "high pressure salesmen" have victimized the elderly with "fine print" health insurance policies which bring disillusionment when illness strikes.

Loren Hicks, 73-year-old in Pompano Beach, Fla., said insurance firms and agents have engaged in both verbal misrepresentation and "legal but misleading" advertising in selling insurance to those over 65. Hicks told a panel of the Senate's Special Committee that the field of health insurance apparently was so lucrative that he had been "offered the sum of \$200 for the mailing list of our members by an insurance agent." He stressed that misleading so-

licitations was not the only prob-

lem faced by older persons in pur-

chasing health insurance. His own

policy, Hicks told the subcommit-

tee headed by Sen. Harrison A.

ited benefits," but "is all I can

afford."

only solution is financing of health care for the sged through social security, he said. Williams said his subcommittee,

which has been conducting a broadranging inquiry into frauds effecting the elderly, had decided to probe deception in health insurance because of numerous complaints from persons who discover that their policies "failed them when they most needed help."

### Law Has Gaps

The "language of the law" may not cover all cases of deception, Williams noted, "particularly when slippery pitch men deliberately set out to find gaps in that language ... One thing that is certain, how-Williams (D-NJ), pays "very lim- ever, is that the sale . an insurance policy is too serious a matter to become a battle of wits between

buyer and seller," he added. of the National Council of Senior | The Federal Trade Commission

head of a 700-member club Citizens, are "convinced" that the announced, as the hearing opened, that it has drafted new guides for the mail order insurance business aimed at clarifying the laws on deception. Assistant Attorney General Charles A. James of California and Sherwood Colburn, former Michigan State insurance commissioner, agreed that both federal and state regulation are necessary. Rep. Ronald B. Cameron (D-Calif.) testified that California's efforts to tighten controls over health plans have been stymied by insurance, hospital and medical lobbies.

The one-day hearing complemented hearings which have been held by another subcommittee, under Senator Pat McNamara (D-Mich.) on the high cost of health insurance for those over 65.

### A Voyage is Just What You Make it

Once you go aboard ship it's up to you and your shipmates to make the voyage as pleasant and as profitable as possible. The first thing to remember is that whether you are an oldtimer or a new member, you all have a common bond. You are going aboard a ship under contract to your Union. It is up to you to protect that contract and in so doing, protect both yourself and your Union.

A good SIU man is a good seaman. He does his job well and never imposes on his shipmates. One of the principle jobs of the oldtimer is to acquaint the new members and first-trippers with the ins and outs of his shipboard duties as well as educating him in the principles of unionism.

A good seaman is clean, neat and orderly. It takes only a few minutes each watch to keep your gear in shape and your foc'sle orderly. The man assigned to clean your quarters isn't your valet. Clean your seaboots and oilskins. When possible hang your oily, dirty gear in some place outside of the foc'sle.

Messmen are just as much a part of the crew as firemen or ABs. A good steward department can improve any ship and any voyage. The messroom on most ships is your club room. It's only a matter of seconds to drop your dirty cups in the sink after coffee time or night lunch. Use ash trays for your butts and ashes, don't throw junk and food on deck. Put uneaten lunch back in the refrigerator. It's bad on the cockroaches and flies but good for the crew. The department delegates should always work together to see that things are kept that way.

When you come aboard look the ship over good. Don't wait until the last minute to make a beef. Pay attention to the condition of the ship, and if things are not made right notify the union hall and a Patrolman will be sent aboard. Don't rely on promises that things will be straightened out "after the ship sails." A lot of beefs can be saved if you remember these points.

Ascertain before sailing if proper requisitions have been made.

Inquire as to the contents of the slop chest.

Check the riders appended to the articles and the conditions of the foc'sles, beds, mattresses, linens, etc.

• Where possible see that a patrolman comes aboard and gets things in as good shape as possible before signing on.

Fe sure to study your agreement throughly. Remember that overtime pay is designed to protect you against being over-worked and not to make you rich. An overtime hog on any ship is a pain to the entire crew. It is up to the crew and the delegates to see that the overtime is prorated so that all hands share the extra work and the resultant pay as equally as possible.

Keep an accurate record of your own overtime with the date, exact hours worked, nature of work and by whom ordered. Keep separate sheets for "OK" and "disputed" time. Turn your sheets over to your delegate, who will check them for discrepancies in time and present them to the department heads to have them signed. Your individual record is your own property and protection, hang onto these sheets until the payoff.

The union is the interpreter of your union contract. Put down whatever you think is overtime and if the ship's officers think differently, the whole matter can be taken up at the pay-off. Don't refuse to do anything because some engineer, steward or mate says that it isn't overtime. Do what you are ordered to do, put down the hours worked and settle at the pay-off,

When ship's officers do work that should normally be done by the crew, notify your department delegate. In certain cases overtime is collectable by the crew for this work. The final decision will be made at the conclusion of the voyage when the patrolmen and company representatives check the ship's log and overtime sheets. Remember, don't try to settle all your beefs aboard ship if the officers are buckos. Your shore officials will settle things for you.

Don't take unauthorized time off or perform aboard ship. Taking time off is a bad habit, for if you are logged nothing can be done about It; the Coast Guard starts a record on you and the burden of doing your work falls on your shipmates. If extra time ashore cannot be arranged between you and your shipmates with the consent of the master and department heads, then limit yourself to your actual liberty hours. This will save you money and protect the reputation of your Union.

# **Udall Appoints Coal Export Committees**

WASHINGTON-In line with the Government's new policy to step up the export of the United States' hard coal, Secretary of the Interior Stewart L. Udall named a coal export coordinator and +

three special committees re-|would be worth a great effort, a cently to help carry out a joint Government-industry pro- ciation group in Pennsylvania has gram to stimulate the trade.

The coal export coodinator is T. Reed Scollon, who also will continue in his regular position as would contribute toward improvehead of the Division of Bituminous ment in the US balance of pay-Coal in the department's Bureau of Mines. In his newly announced there was adequate skilled labor capacity, Scollon will coordinate activities of federal agencies under the coal export program and provide liaison between Government and industry on program developments

Udall also designated an indus-Lakes Iron try advisory committee and two inter-agency committees. One of the committees will work with the Cargoes Up industry advisory group and the department in developing detailed plans for carrying out the coal **DETROIT** - Great Lakes shipexport program. The other comments of Lake Superior iron ore, mittee, comprising top officials coal and grain through April this from several Federal agencies, will year totaled 11,988,663 net tons, aid in the department coordinating the highest figure for the period the program from the standpoint since 1960, and far above the 5,of domestic and foreign policy. 605.830 tons moved for the same Although the anthracite export period during 1963, according to drive is not formally tied to the the Lake Carriers' Association. administration's anti-poverty drive, Shipments during April alone it is considered definitely related amounted to 10,978,042 net tons, because the hard coal region of which is more than double the the US is one of the worst of the volume moved in April last year, depressed areas of the country the Association said. and has a high priority for federal Grain shipments in April help. To increase exports of hard coal reached the highest level attained two immediate problems must be in 11 years, the Association said, overcome, among others. These are volume reaching 2,173,957 net the frequent insistence by foreign tons. Of the 185 grain cargoes, buyers of precise size and quality however, only 30 were moved in specifications and the need to co-US ships. ordinate rail and ship movements In addition, a four-week peak of large volumes of hard coal to was attained in iron ore shipachieve maximum economy. ments, with 3,959,719 gross tons Stimulating hard coal exports moved, while coal cargoes surged to 4,369,200 net tons, up from 3,-223,485 tons carried in April, 1963. vrite your The larger tonnage is attributed TO SUPPORT to the earlier start of navigation on the Great Lakes this spring and to industry's continually expanding demands for raw materials.

combined union and trade assoagreed, because not only would it aid the economically depressed hard coal mining regions, but ments. The group agreed that and enormous reserves of anthracite, and that production and transport problems should be eliminated by a strong cooperative effort.

for decent wages and better conditions. Seafarers and their families are urged to support a consumer boycott by trade unionists against various companies whose products are produced under non-union conditions, or which are "unfair to labor." (This listing carries the name of the AFL-CIO unions involved, and will be amended from time to time.)

What you do ashore is strictly between you, your conscience and the shoreside authorities.

Homeward bound is the time to get all your affairs in order. All overtime should be rechecked and written up so that it can be easily understood, explained and argued if necessary at the pay-off. All Union books in all departments should be checked and a list made of the first trippers so that the patrolmen boarding the ship at the payoff will be able to get the collections through in a hurry and attend the beefs. A list of the beefs, complaints, logs, Coast Guard cases and other controversial items should be made so these matters can be attended to more promptly.

Your ship may be in port several days after arrival before paying off. Remember that during this period you are still on the articles and payroll. This means that you are still under the orders of the Masters and ship's officers and must continue to carry out your dulies until you are paid off and given your discharge. For failure to do this you can be logged and treated the same as if you were on the high seas.

Everyone growls when he comes aboard a dirty, disorderly ship. Remember this and turn over the ship to your relieving crew in a good condition. Be sober at the pay-off and don't be in too much of a hurry to get ashore. Get the beefs settled as far as possible before the payoff so that there won't be any holdup. If all your beefs cannot be settled on the spot, make it a point to stay over for a day or two so that the shoreside union apparatus can get things lined up right.

Always carry your Union book with you and have it available for the boarding patrolman. Pay up all current dues and assessments in port of pay-off. Remember that the Seafarers is an International Union and that every port is your home port.

## **Executive Body Tackles Key U.S. Problems**

# **MAJOR AFL-CIO COUNCIL ACTIONS**

### National Economy

Unemployment has remained about five-and-a-half percent of the labor force in the last five months, despite the continuing expansion of economic activities and booming profits. In the face of rapid increases in both productivity and the labor force, the rise of sales and production has not been great enough to create the employment opportunities needed to reduce joblessness. Moreover, the anticipated expansion during the rest of this year, under the impetus of the tax cut, is not expected to reduce unemployment appreciably.

Automation is continuing to spread—reducing manpower requirements in many white collar occupations, as well as in production and maintenance types of employment. And the labor force is growing rapidly, with the influx of young people seeking their first jobs. The persistent high level of unemployment remains America's number one problem in 1964 ...

Idle manpower and productive capacity should be put to work, through increased public works programs, to improve America's public services — our schools, health facilities, housing urban areas and mass transit systems. The job-creating accelerated public works program, which is now being phased out, should be extended, with a \$2 billion federal appropriation, to increase employment in the creation of public improvements of lasting worth . . .

### **Housing and Community Development**

The AFL-CIO calls on Congress to enact the Housing and Community Development Act of 1964, proposed by President Johnson in his special message on January 27 and embodied in the Senate bill S. 2468 and the House bill H.R. 9751, with improvements recommended by the AFL-CIO.

The need for this vital measure grows daily more urgent. Already authorization for the low-rent public housing program has been exhausted and a backlog of 40,000 unit applications is on hand which cannot be processed until the new bill is passed. The urban renewal program is rapidly approaching the limit of its authorization and communities undertaking slum clearance efforts need assurance that federal assistance will be available when needed ...

### Civil Rights

The Senate of the United States today began its 58th day of debate on the civil rights bill.

We say to the Senate of the United States: Stop talking, start voting.

The Senate prides itself on being "the greatest deliberative body in the world." But by now every meaningful point has been made; every objection, whether as to principle or procedure, has been aired at length. Now the Senate is disgracing the democratic practice of deliberation.

The position of the AFL-CIO is abundantly clear. We believe that the Civil Rights Act of 1964, is substantially the form by which it passed the House of Representatives, must be enacted into law.

Therefore, the Executive Council of the AFL-CIO calls upon the Senate to shun crippling compromise; to reject weakening and delaying amendments; to invoke cloture and to pass the bill now.

We remind the Senate that there are many other measures dammed up by the civil rights obstructionists, which must also be enacted. They, too, bear upon civil rights; for they have to do with prosperity of the nation, with the war against poverty—the war which must be won before The AFL-CIO Executive Council held its guarterly meeting in Washington on May 18-20. SIUNA President Paul Hall, an AFL-CIO vice president and an Executive Council member, participated in the three-day meeting. As a result of its deliberations, the Council took actions and presented positions on the major problems facing the nation and the free world. On this page are excerpts from the Council's major actions.

the territorial integrity and national sovereignty of every country—Arab and Israel—in this pivotal area; (2) pursue policies which will prevent aggressive action by any power in this vital region; and (3) make new efforts to encourage and assist the countries of the Middle East to cooperate in developing their natural resources for the purpose of improving the standard of living among their people and promoting their social and economic progress in peace and freedom.

### Report on Cases Filed Under Article XXI

From the effective date of Article XXI to May 15, 1964, a total of 300 new complaints, or claims of "justification" for action that would otherwise violate Article XXI, were filed with the President's office.

Of these 300 cases, 168 have been resolved through the process of mediation, by mutual agreement, without the necessity of a determination by an Impartial Umpire. Mediation is still in progress in 28 cases and there is every reason to believe that a number of these will be settled voluntarily . . .

Action on Internal Disputes Cases (as of May 15, 1964)

| Settled by mediation                            | 168 |
|-------------------------------------------------|-----|
| Mediation still in progress                     | 28  |
| Determinations by Impartial Umpires             | 91  |
| Fast-finding reports by Umpires                 | 7   |
| Pending determinations or reports<br>by Umpires | 6   |

### Total 300

Of the 91 determinations by the Impartial Umpires, violations of Article XXI were found in 67 cases. In 24 cases, the Umpires found that the action involved in the complaint did not violate Article XXI.

The Subcommittee of the Executive Council has received 30 appeals from determinations of the ImpartIal Umpires. The results were as follows:

#### Action of Subcommittee on Appeals

| • | Appeal   | denied               | 25 |
|---|----------|----------------------|----|
|   | Appeal   | withdrawn            | 1  |

|   | Pending  |                      | 3  |
|   |          |                      |    |

#### Total 30

Sixteen complaints of non-compliance with determinations of the Impartial Umpire were received by the Subcommittee. Action on these complaints was as follows: Action of Subcommittee on Non-compliance Complaints forward for better wages, shorter hours and improved working conditions.

### Brazil

The recent events in Brazil which culminated in the successful civil-military revolution of April first demonstrated the great determination of the freedom-loving people to end the grave threat to their Constitution and the democratic processes . . .

The AFL-CIO Executive Council emphasizes that the Goulart labor law had made the trade unions subservient to the government. Control of the unions by the government weakened labor and made its organizations vulnerable to Communist penetration. We strongly urge that no time be lost in making Brazilian labor completely free of government domination ....

.... The rights of the working people must be unequivocally recognized in Brazil. Organized labor must have the right to participate fully in the nation's program for social and economic development.

... The AFL-CIO joins with ORIT and the International Trade Secretariats in pledging its all-out effort and resources to help revitalize the Brazilian democratic labor movement and assure its progress on the path of freedom and independence as a truly representative organization of the interests of the workers.

### Alaska

The disastrous earthquake and tidal wave which spread death and destruction across large parts of Alaska was one of the greatest natural catasrophies in the history of our country. Five cities were destroyed and hundreds of homes were lost. To the victims of that catastrophe, we express our sympathy. To those who are rebuilding their lives, to those who are working to restore the economic and social life of Alaska, we pledge our support.

Already the American labor movement has responded promptly and generously to help victims of the earthquake. Aid has been given by the AFL-CIO and affiliated organizations. Trade union members in Alaska have given their services in a wide variety of volunteer work to help restore normal community life ...

... Specifically, we urge that the Small Business Administration make available disaster loans at the lowest possible interest rate to Alaskan businessmen. We support requests made by Senator Gruening of Alaska to the Small Business Administration that loans at an interest rate of three-fourths of one percent should be made available to qualified applicants in Alaska. Under the Disaster Loan Act, the Small Business Administration can make loans at any interest up to three percent with any appropriate delayed repayment terms.

It is inconceivable to us that overseas loans to foreign countries under the United States foreign aid program should be made at an interest rate lower than the interest rate charged to American victims of a natural disaster within the United States. We strongly urge that interest rates on Small Business Administration disaster loans to Alaskan businessmen immediately be cut to three-fourths of one percent, the charge imposed on loans to foreign countries under the U.S. foreign aid program.

### **Defense of Free World**

... The Executive Council of the AFL-CIO rejects as a monstrous myth the notion that our country and its allies can promote world peace, human well-being and

equal opportunity can be achieved.

### Middle East

The Executive Council of the AFL-CIO notes with dismay that the hopes of the peoples of the world for peace and the efforts of our country and its allies for a genuine detente have been severely jarred by Premier Khrushchev's tour of Egypt. In language more abusive than he has used in many months, the Soviet ruler has branded U.S. policy in the Middle East as "aircraft carrier diplomacy." This and other unfounded denunciations made by Khrushchev have not only disturbed the situation in the Middle East but have aggravated international tension.

Premier Khrushchev has deliberately sought to whet Nasser's appetite for aggression against Israel and encourage his maneuvers for dominating the entire Arab world. Towards these ends, Khrushchev promised Nasser additional shipments of the most modern Soviet weapons of war and gave him the green light to do what he wants in the Middle East.

In view of this hate-breeding tour by the Soviet Premier and particularly his hostile denunciation of our country's peaceful and humane role in the Middle East, we strongly urge our government to: (1) reaffirm forcefully its determination to oppose all aggression against

### National Wage Formula

There can be no single national wage formula. In a pluralistic economy, with thousands of diverse markets and industries, there must be determination by the employer and the union as to the proper wage level. Free collective bargaining in a free economy is the best method of determining wage levels . . .

. . . Despite cries of alarm from some, inflation is not today's threat. Today's threat is idle men, idle plants and idle machines.

To the AFL-CIO the answer is simple: We must put America back to work. We must provide the consumer purchasing power which is the base of our entire economic strength.

Therefore, on a union-by-union, company-by-company, and industry-by-industry basis—in light of the needs of the workers involved and the economic ability of the companies and the industry involved—we intend to press freedom by helping the Communist dictatorships overcome the severe hardships and difficulties which their policies and practices have brought about. Expanded western trade with and the extension of long-term credits to to Communist regimes will not help them "evolve towards democracy" or remove the sources of world tension. On the contrary, such help by the United States and Western Europe might well enable the Communist regimes to emerge from their present difficulties strengthened for their next round of offensive actions against the free world, This would only aggravate the cold war...

... The difficulties now afflicting the Communist economies and the conflicts plaguing the international Communist movement provide a propitious moment for our country and its allies to initiate diplomatic, economic, and political moves to eliminate the causes of world tension and to promote just and lasting peace ...

... Neither the difficulties confronting the Communist world nor the tactical changes these have imposed on Moscow should serve as an excuse for our country and its allies relaxing their vigilance or reducing their strength. We dare not tire in the struggle to prevent a Communist takeover of the world. The hour calls for greater unity and strength of the Atlantic community to promote freedom, social justice, and lasting peace.

Letter was written to headquarters about replacements that have not been ob-tainable in the Far East. The cap-tain agreed that all lines should and would be stowed upon leaving dis-charge port. for safety and con-venience of crew. Ship is short five men. ment.

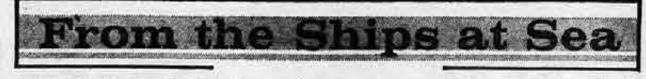

SEATRAIN LOUISIANA (Seatrain), April 20—Chairman, Joe B. Block: Secretary, Herbert C. Justice. Ship's delegate reported ship is running smoothly. No beefs have been re-ported by department delegates. One man missed ship at Edgewater, New Jersey, \$12.72 in ship's fund. All members are urged to please keep the laundry in sanitary order.

GLOBE CARRIER (Marilime Over-seas), April 12-Chairman, T. Drze-wieki; Secretary, C. McDaniel, Five men missed ship in Philadelphia, Delegates asked to make up repair list early. list early.

YAKA (Waterman), April 18-Chain-YAKA (Waterman), April 13-Cf alr-man, L. Fargran; Secretary, Nane. Ship's dolegate stated that draw will be put out upon arrival in goal of payoff, which will be New York. S10.13 in ship's fund. Winers have some disputed OT. Request that pa-traiman check stores on ship. There was a shortage of a few items this filp. Discussion on moving some of the black gang midship. Mail service was poor this trip.

TRANSBAY (Hudson), March 8 --Chairman, E. W. Lambe; Secretary, J. M. Sammen, Brother W. F. Leonard was elected to serve as ship's dele-gate. To see captain about getting more cigarets. No beefs reported,

SAN FRANCISCO (Sea-Land), April 5-Chairman, R. A. Edin, Secretary, S. M. Simos, Ship's delegate said there wasn't much to report except that one man was fired in Puerto Rico. Discussion about ship's fund. Anyone who wants to contribute to same can do so at the payoff \$10.85 in fund who wants to contribute to same can do so at the payoff, \$10.85 in fund at present. Everything is running smoothly with no beefs. Vote of thanks to the steward department. especially the steward, for a wender-ful job and good food and service this trin. this trip.

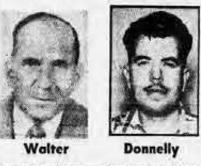

April 15, the date which Seafarers and every wage earner in the country regards with dread as they make their last minute hunt for deductions to beat the income tax filing deadline, has come and gone. However, even before the deadline came into sight, SIU men

were all smiles as they contemplated the larger pay checks they would receive, thanks to the tax cut passed by Congress earlier this year, crewmembers on the Panoceanic Faith (Pan Oceanic Tankers), however, wish they could share in this bounty enjoyed by their Union brothers, but they're fast beginning to believe the whole thing is a hoax. Andrew Lenansky, ship's delegate, reports the crew has seen its third payoff without the slightest boost from a taxcut showing up in its pay.

\* \* \*

After making one of the first voyages in an SIU ship carrying grain to Russia, George W. Alexander, ship's delegate on the

Transerie (Hudson Waterways), reports a smooth, log-free trip. One crewmember had to be hospitalized in Odessa, while another paid off in the same city after being informed of a death in his family. The Transerie's crew gave a special vote of thanks to retiring ship's delegate John J. Quinter.

### \$ \$ \$

If steward department members on the Thetis (Rye Marine) don't know much about tropical fruit, they're going to learn the hard way in coming weeks. A resolution passed at a recent ship's meeting asked that the steward inspect all oranges taken aboard since the crew has found that too many are

### LOG-A-RHYTHM:

## Mirrors

### By I. MULLER

The story of a man's life Is reflected in a mirror, The firmness of youth And the wrinkling of age. If only mirrors could talk, Remarks the old sage.

There is no need for talk; It reflects his age.

And then the young beauty,

rotten inside, writes C. Collins, | for good menus and fine chow, reports P. Muccia, meeting chairman. meeting secretary,-

### ままま

Mere praise for the efforts of the steward department on the Erna Elizabeth (Overseas Navigation) just won't do the job as far as Seafarers in the crew are concerned. S. Doyle, meeting reporter, says that the crew has officially requested that the word be passed that the ship is one of the best feeders in the Union. The crew's resolution went on to state that the high quality of the chow turned out by the galley staff reflects credit on the entire SIU steward department.

### 1 1 1

The Erna Elizabeth's crew is not the only one which appreciates that extra bit of effort put out by an expert steward department. Other ships whose crews have voted thanks for chow turned out in traditional SIU style are The Cabins (Texas City Refining), Alcoa Runner (Alcoa), Ocean Dinuy (Maritime Overseas), Madaket (Waterman), Penn Trader (Penn Shipping), Northwestern Victory (Victory Carriers), San Juan (Sea-Land), Transglobe (Hudson Waterways), Kent (American Bulk Carriers), Penn Vanguard (Penn Ship-

ping), La Salle (Waterman), New Yorker (Container Ships) and Jian (Pacific Waterways).

### ホホホ

Nobody on the Steel Maker (Isthmian) can complain that there isn't anything to read these days. Several cartons of books from the Seafarers Log Library Plan plus another load of reading material has just about over-flowed the ship's library.

### ままま

The crew of the Puerto Rico (Motor Ships of Puerto Rice) have extended their deepest sympathies to steward Abroham Aragones, after learning of the death of his youngest son. Aragones, in turn, thanked his fellow crewmembers and the ship's officers for their moral support while he was in mourning. Despite bis personal loss, everyone on board was impressed with efforts of Aragone's

1 1 1 Keeping clean on the Globe Explorer (Maritime Overseaa) is getting to be quite a problem. When a crewmember turns on the hot water faucet in the shower room, he's usually greeted by a blast of live steam. Since cold showers seem to be the only alternative to getting scalded, the crew is demand-

water heater, reports Joseph Woolford, meeting chairman.

ing a new thermostat for the hot

t t t Not only are Seafarers aboard the Del Norte (Delta) getting to see the latest movies, but they all feel more secure now that they've heard their movie fund is solvent again.

### **Clean Linen**

A new change of linen is laid out for crewmembers of the Hudson (Victory Transport) by steward F. Degedt, who poses after he has just completed putting out sheets, seap suds and everything else a Sea-

most all repairs have been taken care of, \$19 in ship's fund. Brother Wal-ter A. Johnson was elected to zerve as ship's delegate.

GLOBE EXPLORER (Maritime Over-seas), April 13-Chairmen, J. Wool-ford) Secretary, L. White. Ship's del-egate reported that the repairs were

The mirror arched in her hand Trying to turn back The time and sands. Oh! It has broken. The pieces scatter Over the floor. They no longer Tell their story Of ten and three score.

the object of considerable discussion at a recent ship's meeting. Not only did crewmembers have plenty to say about the mattresses and bad springs in their quarters, but one disenchanted seaman charged that ship's linen was like cheeseclothand a poor grade at that, writes department and voted their thanks | John McLemore, meeting chairman,

Crewembers on the Inger (Waterman) want their Union brothers to know that when it comes to fine chow, there isn't a ship afloat whose steward department can compare with their's. Members of the rave-inspiring department are (front row, I-r) Eugene Ray, chief steward; John B. Harris, John Thomas, Salvador Malhabour, Jackson Fong and Edward Van Wynck. Standing in the rear are Norman Sawyer, Harry Jones and Sovandus Sessoms.

# Fine Chow Inspires Raves, **Adding Inches To Waistlines**

Seafarers usually express their gratitude for fine chow and excellent service by a ship's steward department with a traditional vote of thanks "for a job well done." This month, however, crews on two SIU ships have written the LOG raving about the culinary excellence of their respective stew-+

ards.

Seafarers aboard the Hurricane (Waterman) recently decided that the usual vote of thanks just wouldn't do as a means of letting their steward department know of the crew's appreciation for the fabulous chow they get. A special committee was set up by a resolution made at a regular ship's meeting to formally show the gratitude and high respect the crew holds for the Hurricane's galley staff.

In a letter from the committee signed by J. C. Thompson, John E. Thomas and Michael Ray, a full sufficient quantity served. The description was given of the chief steward made every effort mouth-watering chow that would to procure fresh vegetables and make any Union member drool in envy.

The committee's letter singled out John Thomas, crew messman, and Sovandus Sessoms, pantryman, for their cheerful, excellent day trip to North Africa and service. Eugene Ray, chief steward, and John B. Harris, chief cook, both came in for high praise board who had a complaint about for the excellent preparation of food and its great variety.

The committee went on to show that the Hurrican's galley crew's meals. Their letter of commendaattention to the extras is often the difference between an average steward department and one that weight." gets the wild praise of every last | The second ship whose steward

Hughes Prestwood

Seafarer on board a ship. "Never a coffee break passed without some well prepared pastry being served with the coffee. Night lunches were always good and a fruit in foreign ports," the letter said.

The Hurricane's glowing citation for its steward department was made during a recent 30southern Europe, Although the committee couldn't find anyone on the steward department, the three members did have one reservation about the high quality of their tion concludes, "Sorry to say all hands have been putting on

department has caused an appreciative crew to let out their belts a few more notches is the Inger (Reynolds Metals), A letter from deck delegate Frank E. Hughes carries a description of the delicacies prepared by the ship's galley staff that would make a passenger traveling first class who is being fed on continental cuisine envious.

Typical items on the Inger's menu bearing steward James R. Prestwood's excellent culinary touch include fresh stuffed jumbo shrimp, turkey pullette, mixed fried seafood platters, stuffed pork chops, won ton and egg drop soups. As far as Hughes is concerned, dishes like these are rarely seen on luxury passenger liners, let alone bulk carriers and cargo ships.

As an added extra, Seafarers on the Inger have the added treat of stuffing themselves on the deluxe pastry creations of Olie Esquivel, the ship's baker. "We also think we have one of the best bakers out of the Gulf district. His doughnuts melt in your mouth. His apple turnover, star pastry, jelly rolls, strawberry and fresh peach shortcakes as well as his cakes are put out in fine SIU fashion. What makes all his pastries a real joy to sink your teeth into is that they come in so many different varities," Hughes says

## Notify Union On LOG Mail

As Seafarers know, copies of each issue of the SEAFARERS LOG are mailed every two weeks to all SIU ships as well as to numerous clubs, bars and other overseas spots where Seafarers congregate ashore. The procedure for mailing the LOG involves calling all SIU steamship companies for the itineraries of their ships. On the basis of the information supplied by the ship operator, four copies of the LOG, the headquarters report and minutes forms are then airmailed to the agent in the next port.

Similarly, the seamen's clubs get various quantities of LOGs at every mailing. The LOG is sent to any club when a Scafarer requests it by notifying the LOG office that Seafarers congregate there.

As always the Union would like to hear promptly from SIU ships whenever the LOG and ship's mail is not delivered so that the Union can maintain a day-to-day check on the accuracy of its mailing lists.

### **Gives Thanks For Benefits** To the Editor:

I wish to express my heartfelt thanks for the check from the Seafarers Welfare Plan Fund and the kind letter that accompanied it which I recently received. Since my hus-band, Glenn A. Masterson, passed away, the Union death benefit has really turned out

to be a financial godsend. I can only tell you of my deep feeling of admiration and gratitude toward the SIU. I am filled with pride when I realize that my husband was the member of such a fine organization.

Mrs. Eva Masterson

\* \* Welfare Plan **Brings** Praise

much.

still is waiting to be introduced in the Senate. The Elliot NSLI Act would

amend the legislation governing the National Service Life Insurance program to permit the granting of the insurance to veterans who were previously eligible for it for a perlod of one year.

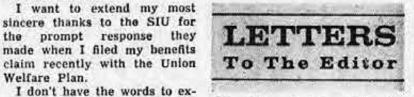

If this amendment becomes law, at least 7,000,000 men and women would benefit. I strongly urge SIU members who live in New York State to write their Senators to get the bill introduced.

Druid W. Beavers \$ \$ \$

## LOG Praised **By Pensioner**

To the Editor:

I am sending you this short letter just to let you know how much I appreciate receiving the LOG every two weeks.

All letters to the editor for publication in the SEAFARERS LOG must be signed by the writer. Names will be withheld upon request.

Now that I am retired and don't get much of a chance to get around as much as I did before, I find that the paper really fills me in on what is going on in the SIU and elsewhere in the shipping world.

I first joined the Union in 1938 and sailed in the steward department for about 22 years. My last ship was the Ines, and I retired my book in 1962 when I went on pension.

Henry H. Williams

Mrs. Jose M. Melendez

Guy Debaere. No beefs reported. Brother Kenneth E. Gainey was hos-pitalized in Bremerhaven. Germany, to undergo operation. After a couple of weeks he will marry a beautiful French girl, and the crew of the SS TRANSGLOBE wish Brother Galney the best of luck in his new venture.

TRANSGLOBE (Hudson), April 10

Discussion in contacting patrolman or Company about roaches aboard ship, or have bosun do the spraying as he has the equipment.

ALCOA MARINER (Alcoa), April 4 Chairman, V. L. Barfield: Secretary. E. Bishop. Ship's delegate reported that two men were left in hospital in Bermuda. No beefs were reported by department delegates. Vote of thanks extended to the steward department for service and good food.

April 18 Chairman, Elvyn Bussell, Secretary, Nicholas Hatgimisios. One man missed ship in Rotterdam. Holland. Some disputed OT in deck department. Request that patrolman see chief engineer and asking him to mind his own department and to keep out of the other departments, New ship's delegate to be elected for next trip. Vote of thanks to the steward department,

GLOBE PROGRESS (Marilime Over-

KENT (American Bulk Carriers), March 7—Chairman, Bo Anderson; Secretary, John R. Mina, No beefs reported by department delegates. Vote of thanks extended to the steward department.

ARTHUR M. HUDDELL (Isthmian), March 22—Chairman, J. Snyder; Secre-tary, H. Karpowicz, Ship's delegate Tary, H. Karpowicz. Ship's delegate reported that there were some beefs and quite a bit of disputed OT. Letter was sent to agent and patrolman in Baltimore to help payoff upon arrival. Vote of thanks to the steward depart-ment for fine service and job well dune. done.

ST. CHRISTOPHER (Destiny Car-riers), April 19-Chairman, R. K. Holty Secretary, F. Pasaluk, Washing ma-chine and cooler needed for the engine department. Crewmembers requested to keep messhalls clean. beefs reported by department delegates.

in his rave report.

Speaking of Prestwood's fine work as steward, Hughes says, "The steward also gives a hand wherever it's needed, and can be found in the galley or the crew messhall during every meal to see that our chow is served just right. He also takes care of the slop chest day and night and no one has any problem about getting the things he needs. In short, we have the best doggone steward department in the SIU.

Hughes declares that one of the main reasons for his letter of high praise is that the Inger's crew finds it pretty monotonous giving votes of thanks to the steward department every time there is a ship's meeting.

Hughes evidently isn't worried about the impact of the Inger's fine chow on his walst line. Finishing his letter, he says, "Will close now and raid the ice box."

Their galley duties completed for the moment, three members of the steward department of the San Francisco (Sea-Land) are caught by the camera as they pause to enjoy the breeze off San Francisco bay. Standing (I-r) are S. M. Simos, steward; E. Henderson, chief cook, and Henry Milton, baker.

May 29, 1964

# Getting Ready To Sail On The Topa Topa

On a recent visit to the Topa Topa (Waterman) in Baltimore, the LOG photographer found crewmembers making last minute preparations as the ship got ready to sail. In the photo at the left, deck department member Carl Pierce hauls on a chain, while in a scene in the engine room, second left, oiler Paul Cavan (left) checks a dial setting with J. S. Skidmore, third engineer. James Dodd, messman, is seen clearing off a table, second right, and deckhand James Corcoran is caught going below (right.) The Topa Topa sailed for Barcelona, Spain; Pyreas, Greece; Karachi, Pakistan, and Bombay, India with general cargo.

CHOCTAW (Waterman), March 23-Chairman, R. Dean: Secretary, D. Ruddy, Vessel is paying off in Cali-fornia. Nó disputed OT or beefs re-ported by department delegates.

STEEL ADVOCATE (isthmian), March 22—Chairman, Tommy Self; Secretery, Jim Morgan. Ship's dele-gate advised the crewmembers to keep from being logged. No beefs or disputed OT reported by department delegates.

ALAMAR (Calmar), April 5—Chair-man, Tom Cromand; Secretary, Fred Sullins. Ship's delegate reported that everything was running smoothly. \$17,50 in ship's fund. Vote of thanks extended to the steward. Fred Sullins. and the entire steward department for a job well done.

OUR LADY OF PEACE (Liberly Navigation), April 26—Chairman, H. Arlinghauar Secretary, W. E. Casey. Brother H. Arlinghaus was elected to serve as ship's delegate. Discussion on cleanliness of heads, and using of ash trays. Voie of thanks to the stew-ard department for fine food and service. It was suggested that this ship be fumigated.

# **Close War Escapes Marked** Seaman's First Year In SIU

Twenty years ago in 1944 events in Europe were beginning to move with breakneck Speed as the Allies unleashed a multi-front attack which spelled the beginning of the end for the Axis powers. John Chiorra, who joined the SIU during this period, vividly recalls the danger-filled trips he made+

the US Merchant Marine.

Chiorra, who sails in the steward department, remembers the tension wracked period when his ship lay off the Anzio beachhead under constant shellfire, strafing and

bombing attacks for six days. He also has thrilling memories of an anxious 12 hours spent on the Anton Dvorak trying to outrun a German Raider in the Indian Ocean. Several

career by almost being shot as a

during 1944 as a member of gunners and pilots. A further typical wartime situation. No agent complication was that cargo was moved from the ships to the beach knew what to do with the cargo by "ducks" and LCM's. Faced with After a thirty-day wait, the Dvorak these difficulties, it took the Peter V. Daniels six days to be unloaded.

During this time the ship was the victim of continuous artillery attacks from the shore and bombing runs by the German Luftwaffe which was determined to stop the invasion at any cost. Chiorra remembers diving into a nearby potato bin time after time every time the German aircraft came over to strafe and bomb his ship. The Deadly 'Big Bertha'

The Peter V. Daniel's greatest worry during those treacherous days spent waiting off Anzio was the German Army's "Big Bertha" which was set up back in the mountains overlooking the beachhead. The largest artillery piece were German spies. During the merchant seaman when he signed in the Wehrmacht arsenal, "Big following six days, the police tried on the Peter V. Daniels in Phila- Bertha" was used with deadly skill to force the unlucky pair to condelphia. Her holds loaded with a against the invasion fleet anchored fess, threatening to shoot them

could be found and no one ashore sailed to Piraeus where the coal was unloaded.

It was at this point where Chiorra underwent his most spinetingling experience of the entire World War II period. Looking for some entertainment, he and the ship's bosun went ashore dressed in civilian clothes, only to find that they were the only English-speaking seamen in the streets. When their presence became known to the local police, they were immediately picked up and jailed as suspicious characters.

After suffering several years under the occupation of the Nazis, the Greeks were all too willing to believe that the two Americans

Chiorra admits that he was be ginning to think that his number

According to the ship's minutes, a Del Norte crewmember called upon his fellow shipmates during the good and welfare portion of the ship's meeting to make safety aboard ship a

Crewcase, the Seafarer thought that members on the Steel Admiral lethal cargo of blockbusters, the off the beach. To escape this time and again. ship was convoyed across the Atand Steel Architect were all elated to learn that their ships had lantic toward its destination in been presented safety awards by Naples. **U-Boat** Action the shipping company.

24 hour around-the-clock job.+

Chiorra weeks later he climaxed his wartime shipping

safety was an important enough topic for discussion even in a regular membership meeting.

It seems that a certain Seafarer had developed a beef with his fellow crewmembers over their praetice of tossing garbage, boxes, papers and anything else they didn't want out of the nearest port hole or window. During the last trip, he charged, while he was putting a new coat of paint on the hull, he almost took a sudden drop into the drink when a bottle hurled out of an open pantry porthole missed him by inches.

Instead of using their portholes for a handy trash can, the nettled Scafarer contended that his shipmates would be doing themselves and their shipmates a favor if they used them for the purposes for which they were designed; looking through and ventilation. While the crew on the Del safe from breakage.

Some important safety hints whose importance is obvious to every Seafarer were made at a recent safety meeting held on the LaSalle (Waterman). Faced with an outbreak of colds in his department, bosun W. C. Sellers lectured on the importance of wearing the proper clothing, such as rain gear or heavy clothing, whenever weather conditions warrant it.

The LaSalle's steward, F. Bartlett, had some timely advice for the galley staff in case the ship ran into heavy weather. He reported on the care he had taken to insure that all his supplies were well secured. He emphasized that special attention had been given to glasswear where extra pains had been taken to make sure that it was well stowed and

When the convey reached Gibralter, it was discovered that a German submarine wolf pack was turned to the US where he signed lurking on its heels. At this point, security reasons dictated that the ship, in Baltimore on what eventuconvoy attempt to shake off the ally turned out to be a six-and-a-U-boat pack, and the Peter V. half-month trip. Originally headed Daniels was left to scurry into for Russia, the vessel was diverted Naples on her own.

Reaching Naples without injury, a load of coal for Greece. Heading across the Indian Ocean the Liberty ship exchanged her cargo of bombs for ammunition by itself, the Dvorak was sighted and troops bound for the Anzio by a swift German Raider which quickly gave chase to the Robin invasion site 12 to 14 hours away. On reaching Anzio, she found her-Line vessel whose top speed was self in a situation similar to that 12 knots. In an effort to keep of many a merchant ship that clear of the raider's guns, the suddenly found itself in the middle ship's master ordered a zig-zag of actual combat during the war, course which the Dvorak followed Since all shipping supporting until darkness allowed her to slip the Anzio invasion was the target away.

When the ship dropped anchor of continuous shell fire, strafing off the coast of Salonika, Greece, and bomb attacks, unloading could only take place at night to avoid the Scafarers aboard found thembecoming clay pigeons for German selves confronted with another

deadly threat, ships in the harbor were forced to change their position every thirty minutes in an had finally come up, when he sudeffort to confuse "Bertha's" forward observation crews.

After leaving Anzio, Chiorra reon the Anton Dvorak, a Robin Line to East Africa where it picked up

denly ran across an Englishman at police headquarters. After outlining their sorry plight, the sympathetic Englishman got word to Captain Watgae on the Dvorak who quickly obtained their release. Describing this incident as his closest shave, Chiorra concludes, "The Germans were supposed to

be bad, but those Greek police were worse than the Gestapo!"

### Union Has Cable Address

Seafarers overseas who want to get in touch with headquarters in a hurry can do so by cabling the Union at its cable address, SEAFARERS NEW YORK. Use of this address assures speedy transmission on all messages and faster service for the men involved.

# Widening Work In NY Harbor **Gets Approval**

NEW YORK - The staff of the Army Corps of Engineers has approved a proposal to spend \$44.8 million to deepen three harbor anchorage areas here.

The proposal first resulted from a study made by the Army Corps of the harbor needs of the New York area. The projects must be approved by the chief engineer of the Corps, and authorizing legislation must be adopted by Congress before the projects can be secured.

Stephen J. Leslie, president of Local 25 of the International Union of Operating Engineers, River Rouge 18, Mich. Vinewood 3-4741 and an international representative of the Union, said that he would act as a watchdog on the proceedings so that they would not become pigeonholed.

The three improvements provided for under the proposal are the southern section of Red Hook Flats: for a width of 2,000 feet and a depth of 40 feet; expansion area of Red Hook Flats north of the fairway to 2,700 feet with a depth of 35 feet from its present 14 feet; and the entire Gravesend Bay from its depth of 30 feet

FINANCIAL REPORTS. The constitution of the SIU Atlantic. Gulf. Lakes and Iuland Waters District makes specific provision for safeguarding the membership's money and Union finances. The constitution requires a detailed CPA audit every three months by a rank and file auditing committee elected by the membership. All Union records are available at SIU headquarters in Brooklyn PAYMENT OF MONIES. No monies are to be paid to anyone in any official capacity in the SIU unless an official Union receipt is given for same. Under no circumstance should any member pay any money for any reason unless he is given such receipt. In the event anyone attempts to require any such payment be made without supplying a receipt, or if a member is required to make a payment and is given an official receipt, but feels that he should not have been required to make such payment, this should immediately be reported to headquarters.

(Continued from page 3) vigilance or reduce its strength. • The Council called on the new administration in Brazil to free the trade union movement in that country from the domination imposed on it by the ousted Communist-dominated Goulart regime.

• The Council charged that Khrushchev's tour of Egypt has sought deliberately to whet Nasser's "appetite for aggression against Israel and encourage his maneuvers for dominating the entire Arab world."

The Council also received a report from President Meany who said that mediation efforts have brought about settlements of 61 percent of the cases filed under the internal disputes plan since its inception in January 1962.

The next meeting of the AFL-CIO Executive Council is set for August 3 in Chicago.

TRUST FUNDS. All trust funds of the SIU Atlantic, Gulf, Lakes and Inland TRUST FUNDS. All trust funds of the SIU Atlantic, Guir, Lakes and Hushu Waters District are administered in accordance with the provisions of various trust fund agreements. All these agreements specify that the trustees in charge of these funds shall consist equally of union and management representatives and their alternates. All expenditures and disbursements of trust funds are made only upon approval by a majority of the trustees. All trust fund financial records are available at the headquarters of the various trust funds. trus! funds.

SHIPPING RIGHTS. Your shipping rights and seniority are protected exclusively by the contracts between the Union and the shipowners. Get to know your shipping rights. Copies of these contracts are posted and available in all Union halls. If you feel there has been any violation of your shipping or seniority rights as contained in the contracts between the Union and the shipowners, notify the Scafarers Appeals Board by certified mall, return receipt requested. The proper address for this is: Earl Shepard. Chairman, Scafarers Appeals Board 17 Battery Place. Suite 1930, New York 4, N.Y.
 Full copies of contracts as referred to are available to you at all times, either by writing directly to the Union or to the Scafarers Appeals Board.

CONTRACTS. Copies of all SIU contracts are available in all SIU halls. These contracts specify the wages and conditions under which you work and live aboard ship. Know your contract rights, as well as your obligations, such as filing for OT on the proper sheets and in the proper manner. If, al any time, any SIU patrolman or other Union official, in your opinion, fails to protect your contract rights properly, contact the nearest SIU port avent agent

EDITORIAL POLICY-SEAFARERS LOG. The LOG has traditionally refrained from publishing any article serving the political purposes of any individual in the Union, officer or member. It has also refrained from pub-lishing articles deemed harmful to the Union or its collective membership. This established policy has been reaffirmed by membership action at the September, 1960, meetings in all constitutional ports. The responsibility for LOG policy is vested in an editorial board which consists of the Executive Board of the Union. The Executive Board may delegate, from smong its ranks, one individual to carry out this responsibility.

Paral and the second second

constitutional Rights and obligations. The SiU publishes every six months in the SEAFARERS LOG a verbatim copy of its constitu-tion. In addition, copies are available in all Union halls. All members should obtain copies of this constitution so as to familiarize themselves with its contents. Any time you feel any member or officer is attempting to deprive you of any constitutional right or obligation by any methods such as dealing with charges, trials, etc., as well as all other details, then the member so affected should immediately notify headquarters

**RETIRED SEAFARERS.** Old-time SIU members drawing disability-pension benefits have always been encouraged to continue (beir union activities, including attendance at membership meetings. And like all other SIU mem-bers at these Union meetings, they are encouraged to take an active role in all rank and file functions, including service on rank and file committees, Because these oldtimers cannot take shipboard employment, the membership has reaffirmed the long standing Union policy of allowing them to retain their good standing through the waiving of their dues.

EQUAL RIGHTS. All Scafarers are guaranteed equal rights in employment and as members of the SIU. These rights are clearly set forth in the SIU constitution and in the contracts which the Union has negotiated with the employers. Consequently, no Scafarer may be discriminated against because of race, creed, color, national or geographic origin. If any member feels that he is denied the equal rights to which he is entitled, he should notify headourters. headquarters

SEAFARERS POLITICAL ACTIVITY DONATIONS. One of the basic rights of Seafarers is the right to pursue legislative and political objectives which will serve the best interests of themselves, their families and their Union. To achieve these objectives, the Seafarers Political Activity Donation was established. Donations to SPAD are entirely voluntary and constitute the funds through which legislative and political activities are conducted for the benefit of the membership and the Union. If af any time a Seafarer feels that any of the above rights have been violated, or that he has been denied his constitutional right of access to Union records or Information, he should immediately notify SIU President Paul Hall at headquarters by certified mail, return receipt requested. SEAFARERS POLITICAL ACTIVITY DONATIONS. One of the basic rights

WHAT'S THE NOISE

SEAFARERS--LOG

As Seafarers must know, from their reading of the LOG, the SIU is continuously active in Washington. Why must the SIU engage in this activity?

ALL ABOUT?

The Union must engage in this activity because things are going on in the nation's capital which require constant vigilance if the interests of Seafarers and their families are to be adequately safeguarded. Take Public Resolution 17, for instance.

Public Resolution 17 was passed by the 73rd Congress in 1934 specifically to protect the American merchant marine by requiring that all cargoes financed by a US Government lending agency move 100% in US-flag ships, except in certain instances which the Resolution specifically enumerates.

Despite the clear language of this Resolution, the Maritime Administration has been pursuing a policy of issuing "general waivers" which permit countries receiving these cargoes, financed through our Government, to carry a substantial share of the cargoes in their own vessels.

This policy deprives American ships of cargoes which are rightfully theirs, and deprives American seamen of jobs. It is also harmful to the security of the nation because it contributes to the decline of our vital shipping fleet.

et Stat. 33, Pelate frequer, embesalement, and use of words "frequerication Finance Corporation". faigert, em PUBLIC RESOLUTION § 616a. Shipment of exports financed by Government in It is the sense of Congress that in any loans made by the Reconstruction Finance Corporation or any other instrumentality of the Government to foster the exporting of agricultural or other products. provision shall be made that such products shall be carried excluprovision analy be made that such products and the control of such sively in vessels of the United States, unless, as to any or all of such products, the United States Maritime Commission, after investigation, shall certify to the Reconstruction Finance Corporation or any other instrumentality of the Government that yeasols of the United States are not available in sufficient numbers, or in sufficient tonnage capacity, or on necessary sailing achedule, or at reasonable rates. Mar. 26, 1934, c. 90, 48 Stat. 500; June 29, 1936, c. 858, Title II, § 204, 49 Stat. 1987. adianation. Section was not enacted ferred part of its functions and

It is because of actions and situations like these, by a Government agency, acting contrary to the clear intent of the law, that your Union-the SIU-must be active in Washington, working to safeguard the welfare of Seafarers and those who depend upon them.
