Macauley Whips Up Strike Scare In Smearing SIU-SUP

USS Is Picketed By Angry Merchantmen

The United Seamen's Service, | Moore took over.

that super-dooper, stream-lined, guilt-edged charity outfit, was picketed this week in New York by a group of seamen who were fed up with the anti-union moves of this reformer outfit. Picket lines appeared on Monday evening before the Andrew Furuseth Club and on Tuesday before the USS headquarters at 39 Broadway. The signs carried by the upon Mr. James Moore, a unionbaiting character who is now New York Port Director for the USS.

picket line was the firing by Moore of Jerry McGlade, a seamen employed at the Andrew Furuseth Club. Ever since Moore has been in charge of the club he has been house-cleaning the organization in an effort to eliminate all those who fail to lick his boots or who show any real sympathy for the seamen and their problems. McGlade is a disabled seaman, having lost an arm and a leg abroad, and was employed at the club before mock's Relatives."

"The very fact that I was a seaman seemed to iritate Moore," McGlade said, "and I could see that he was determined to ease me out and put in some boys' club reformer."

Moore's way of easing McGlade out of his job was to demand that he run for the cops each time one of the boys in the bar got gassed up a bit. McGlade pickets centered their attacks naturally objected to calling the cops just because the boys had was fired.

Mr. Marshall Dimock's mother-The immediate cause of the in-law also came in for some blasting on the picket cards. She is the one who demanded that a seaman be arrested when he absent-mindedly walked off with her fountain pen a few weeks ago. This was reported in Dushane's column week before last. The picket signs labeled Moore a "Little Ceasar" and demanded that the "USS Be Staffed With Seamen-Not With Di-

Captain Edward Macauley called reporters into his office early this week and issued hysterical charges that the SIU-SUP was planning to strike and announced that the WSA was laying plans to use the Army, the Navy and the RMO trainees to break the strike. This deliberate smear of the SIU-SUP was immediately given a big play by the nation's press-all the major papers in New York devoting scare headlines to the

OAKLAND, Calif., Nov. 29 -The latest "luxury" raft which will carry torpedoed soldiers and seamen away from their transports and merchant vessels in enously wounded men aboard.

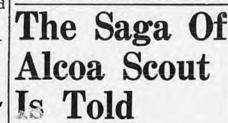

cards, a carton of cigarettes and lie in comparative comfort, are with his hysterical threats. standard equipment on every raft. And when the new arcwelded steel life-saving apparatus underwent its final inspection test at the L. A. Young Spring and Wire Corporation's plant in Oakland, a stove and

(Continued on Page 4)

story. This was, of course, just as Macauley planned. His deliberate slander against our union was couched in language designed to make it appear that the union was sabotaging the war effort, thus assuring that the employer press would give it a big play.

Actually no strike threat had been made by the union. What an excuse to threaten the unions raised Macauley's ire was Harry Lundeberg's letter of protest heaved a few too many-and he emy-infested waters is designed against the Stalinist inspired to help meet the recreational move to eliminate many oldneeds of the survivors as well as time seamen from their trade by to make life easier for any seri- establishing rigid physical requirements. Macauley, with a A Bible, a deck of playing long record of supporting the Stalinists in maritime, took the two canvas berth beds, on which Lundeberg letter as a personal men in a critical condition may affront and rushed to the press

> What is significant in Macauley's performance is not so much that his snottyness is due to the weakness of his arguments, but that for the first time the unions are threatened by a government

The heroic story of the S.S. issues between us. lcoa Scout and its SIU crew This move to eliminate the old was released this week, almost a timers from the industry arises year to the day after it occured. from a need on the part of both It is a story of a small, slow ship the Stalinists and the shipowners of World War I vintage, facing to pick off the old and tested one of the most vicious North militants in the unions. Both the Atlantic storms in recent years, Stalinists and the shipowners and because of the seamanship find themselves in irreconcilable of the crew, coming through with opposition to the old-timers and flying colors. The Alcoa Scout steamed into an east coast port at the end of her tussle with the elements last winter with only six inches of free-board aft and four feet forward. Examination of the ship revealed that she was twisted completely out of alignment, the holds carried a large quantity of water, all lifeboats had been swept away, one anchor was gone and several ventilators were severely battered. The report of the master, Capt. Charles B. Dunn, said that enemy action could not have hurt his ship any more than the wild, winter storms he had encountered in carrying vital supplies to remote northern air bases established by the Army.

bureau with the use of the RMO trainees as strike-breakers. The SIU-SUP has predicted from the very beginning that the WSA would attempt to use the thousands of government trained kids as finks once the war ended and the shipowners and the unions come to grips. Now, even before the war ends, the WSA whips up a fake strike scare just to give it with its trainees.

Macauley told reporters that the government has 28,000 seamen available to break strikes. That's a lot of bunk. What he didn't tell the reporters is that the great majority of the trainees have joined the various maritime unions and are not the docile finks he considers them, and that the men he proposes to man the ships with have had no actual sea experience and are practically all unrated men. When the real test of strength comes. between the unions and the shipowners (and their controlled government boards), we can promise Mr. Macauley that the great majority of his trainees will wind up on the side of the unions. He shouldn't be too cocky about how many strikebreakers he can throw into the waterfront.

So much for Macauley's diversionary tactic-now for the real

hope to supplant them with the more tractable kids now coming out of the government schools. They have seized upon the scheme of physical examinations as the easiest and cleanest method of eliminating the militant union men. This plan was approved by Joe Curran last month. It was immediately picked up by the fellow travelers in the WSA and a directive order was drawn which would become operative on December 1, 1943. Immediately a wave of protest swept the waterfront. not only in the SIU-SUP, but within the NMU itself. It was to counter this protest that Macauley and the fellow travelers charged

The NY Times And **Crocodile Tears**

The New York Times has suddenly developed a crying jag over the plight of some fifteen million "white collar" workers who, because they are not organized, have failed to obtain wage increases permitted under the "Little Steel" formula.

When a conservative newspaper like the New York Times sheds walrus tears over the misfortune of any group of workers, we begin suspecting that someone is spreading something on too thick.

The strategy of the newspaper is obvious. It isn't even faintly interested in the welfare of these workers. Otherwise it would advise them to join a union which could get them all the rights they are entitled to under the law and the regulations of the

collar workers belong to the various AFL unions in the Federal Government service and in the State, County and Municipal Employes Union. Government employes, of course, must depend on legislation to receive wage adjustments and their unions have succeeded in obtaining such legislation for them in most instances.

If the unorganized white collar workers have failed to make similar gains, they have no one to blame but themselves. That bally by the sawbones why he does not mean to say that we was rejected, a full report on his

THE SEAFARERS LOG

WHAT'S DOING Around the Ports

NEW ORLEANS

Tomorrow is Thanksgiving Day. We have to be thankful for the fact that in this land of ours all kinds can live and breath and carry on in the manner to which they are accustomed.

We are honored by having in our fair city a ship which is operated by our old friend Mr. Squires. After being in port for five days they got around to paying off, at this time it was suddenly brought to the attention of the above named gentleman that there were some men aboard the scow who had not made the trip. These men were ordered by the First Engineer after the Master had made the statement that he was paying off (this was Friday) even though the men reported and worked. The deck engineer "worked forty-four straight hours. Mr. Squires stated that he would not pay these men. The whole question came down to whether or not we should take orders from anyone but the office. This mind you, after the run around we got here from the Firmore ·last summer.

The men that were shipped to sign on. from this hall were then informcourse he did not agree.

ready to leave, Mr. Squires in- men. formed us that he wanted a

white Stewards department aboard this ship, even though she had come in with a colored department and there had been a colored department shipped. I informed him that I would put from the union hall. the jobs on the board.

The colored crew went to the ship the next day and turned to. Later this evening Mr. Squires called and stated that he had ordered a white department and how come that we had sent a colored one. When I asked the gent if he would order me to pull off these guys he hedged and stated that he would not be put on the spot. The next move in the game is the gentleman trying to sign the ship on while she lays in drydock, even though she will be here some time. Have already several calls from members of the ship's crew who think that this is a lot of old-fashioned bunk and that they are not going slow the last 10 days. I had a fellows standing around. If I re-

Editor's Mail Bag

Editor Dear Sir:

Perhaps you could help me. Is there some sort of pin I could wear for my husband who died in the merchant marine in March? Isn't there something that I could wear to show that

my husband did his part? I noticed in your paper of April 30, 1943, that my husband's name was listed "In Memoriam." Any information you could give me would help.

Mrs. Herbert Zumpft

(Relatives of merchant seamen wear and display the regular gold service star.-Editor).

> . . Traffic Det. Hangar 6 National Airport Washington, D. C.

Editor,

Dear Brother:

This is just to tell you (in case you don't already know) that in the current issue of Fortune Magazine there is an article on unions-and a full page picture of the "Hall" with Paul reading Shipping in this port has been off the jobs and a gang of the

Again, as usual unfortunately, there isn't any credit given to our union. But I got quite a kick seeing Paul (some of the boys tell me that he's been going to sea again) and that now famous ship-

I quit the sea in March for a special assignment with Air Transport Command (from cargo

to cargo) and the work here is as exciting (and as secret) as hell. Every General and every bigshot comes through here and we get to see them all.

But every so often I miss the water and the ships and the steady clanging of the engine room from below deck. And some how flying is a sleepy business.

Incidentally, in the next issue (probably hits the newstands on January 1st) of World At War Magazine, there is the story of my voyage to Murmansk in the days when it was still something to talk about. I mention it because I deliberately mentioned the SIU in it twice; I'll get a personal kick seeing our name in print after getting sick of all the hot air the Curranumist were throwing out.

Then there's another magazine story coming out soon in which I quoted Paul and again mentioned the Union. (This time they would only allow one mention.)

Got a note from Brother Joe Whelen the other day. Joe followed in my footsteps (and our advice is don't anybody else do it) and joined the Army to "get away from the sea for awhile." So they stuck him in the Rescue Boat Squadron of the Air Corps. He was just born for salt water!

Writing this because he mentioned getting his retirement card -and I remember that in the excitement I forgot to put in for mine. I'd like to now.

> Best regards to all the Brothers, Pvt. LIONEL SIMON

to a better share than they are (Continued from Page 2) now receiving.

land operators do not want fish-The New England fish dealers ermen from up north to go south are cleaning up and do not want Admiral E. S. Land.

SIU And Tanker Members On West Coast

Central Registering and Dispatching Office Open in SUP Headquarters at San Francisco

For SIU Members and T. C.'s in Deck, Engine and Steward Departments

Increased shipping on West Coast by SIU members has made it necessary to open a separate and complete business office to be devoted solely to registering and caring for the needs of SIU members in all departments.

All SIU members in San Francisco are required to immediately register in SIU office at 59 Clay St. SIU members in SUP Branches on the West Coast are to register in the respective SUP Office and receive an SIU shipping card. SIU shipping cards will have preference on SIU ships and will be recognized by all SUP Dispatchers. SIU Deck members will have second preference when SUP members are available.

For Further Information:

Call your union offices and tanker organizers at the addresses listed below. You will always finds somebody at these numbers excepting at night.

Macauley Whips Up Strike Scare In Smearing SIU-SUP

(Continued from Page 1) that the SIU-SUP was in favor of have been incorporated wherever has been very carefully set up so letting men go to sea with venereal diseases and other contageous ailments.

To set the record straight once more-we are in favor of venereal inspection. We are in favor of eliminating from the crews any man who has a disease that constitutes a health menace to his shipmates.

We are opposed to the rigid physical standards proposed by Macauley and the Stalinists which would eliminate the oldtimers suffering from minor incapacities which do not effect their efficiency on the job. The proposed physical requirements could be construed to eliminate from the industry many men who receive "battle shock", impaired hearing, etc., caused from bombings while delivering the goods to the war fronts. Fine gratitude to show these men who have risk their very lives in this war. No provisions are being made to rehabilitate them in shore jobsbut they would become victims of the government's war upon the unions.

There is no question in anyone's mind about how the rank and file seamen stand on this issue. The NMU leadership know that there is a near-revolt in the NMU. Macauley knows how the other unions feel because a flood of telegrams has been descending upon his office. Almost every port on both coasts has been heard from, and in no uncertain terms.

If Macauley can twist this into a strike threat-let him do so. * * *

Following is the text of Lundeberg's letter which sent Macauley's blood-pressure to such dizzy heights:

San Francisco, Calif., November 23, 1943 Captain Edward Macauley, Deputy War Shipping Administrator c/o War Shipping Administration,

al Order." This statement is un- case of discrimination.

true, insofar as we are concerned, because we are definitely and absolutely opposed to this proposed program dealing with medical examinations for seamen, beyond what already exists and has been functioning so well for many years past.

Mr. Dimock further states: "I believe that this program of medical examinations is an important step in safeguarding the health of sea-going personnel and in avoiding ship delays which are caused by illness of crew members while vessels are on a voyage."

NO SHIPS DELAYED

We do not know of a cheaper way of trying to put over a program such as this Proposed General Order has in view, than by stating it will "avoid delaying ships caused by illness of crew members." To our knowledge, (and we thing it is pretty extensive covering 40,000 Merchant Seamen, covering some 900 ships on the West Coast, not counting those on the East Coast) at no time has any vessel been delayed due to illness of the crew since the war started!

We challenge you to refute this statement!

This Proposed General Order for merchant seamen will mean nothing but the elimination of old-time seamen from the industhere are thousands of men between the ages of 40 and 60-and over-who still go to sea. Excepting when someone is after their scalps, they are called "Old Sea Dogs." You know too that these men are not all 100 per cent physical specimens. How could they be, after spending 30 to 40 years of their life in some of the rotten, vermin-ridden, leaky and unsanitary fo'cstles, which were so prevalent until the Unions were able to adjust these conditions?

PLEA FOR OLD-TIMERS

of all unions several months ago, It looks like this Proposed Order possible, in this proposed Gener-there can be no come-back in

EXISTING PROVISIONS AMPLE SAFEGUARDS

You are well aware of the fact that every merchant seaman who goes to sea today must pass a Public Health examination before he is issued his certificate of scamanship. You are also aware that if a man gets sick aboard ship, he is entitled to go to the Marine Hospital. You should give the merchant seamen a little credit to this extent that no man who is really ill will go aboard a ship and take a chance on his own health! We realize the Washington Bureaucrats who spend their time and the taxpayers' money drafting these Proposed General Orders do not have too much respect for a merchant seamen's intelligence, but a seaman has that much sense, I can assure you. What is wrong with the pres-

sent et-up? Today some steamship companies have physical examinations. Others have not. But, as stated before, and as you well know, every merchant seaman must pass a Public Health ship has not interfered in the examination before he is issued slightest degree with our indehis certificate of seamanship.

For years the shipowners have seamen through company doctors, and seamen have been able to appeal to the Public Health officers if they felt they were betry. You know, of course, that ing discriminated against, and in many cases company doctor's de-

cisions have been repudiated by

Public Health Service. Now, the shipowners will be in a -different position. The shipowners through this Proposed General Order, will set War Shipping Administration, (managed and controlled by themselves, up to do the dirty work for the shipowners, and thru this procedure, eliminate old-timers from the industry.

MAKE WAY FOR YOUR TRAINEES

The NY Times And **Crocodile Tears**

(Continued from Page 2) rugged individualist. They should see the futility of bargaining as individuals in an industrial economy which is highly organized.

Isn't it just a silly manifestation of false pride for an office worker to consider himself above his fellow workers? Isn't he cut- frying pan with fifteen pounds of ting off his nose to spite his face fuel also took the forty-five-foot if he fails to join with other office workers in a union to protect the interest of all white collar workers?

It seems shameful to us that office workers, who have the benefits of better education, should be so far behind workers in overalls when it comes to advancement of their economic status through organization.

Potentially, the office workers could have one of the largest and strongest unions in the country if they would only throw off the ridiculous mental hazards against joining a union which have been cleverly set up by employer propaganda.

As a member of an AFL Office Workers Union ourself, we can testify that such union memberpendence of thought or action.

We can also testify from our attempted to discriminate against personal observation that union office workers are better paid and work under better conditions than non-union office workers.

So we say to the unorganized office workers of the countrydon't envy union members who are better paid. Get wise and join an AFL union yourselves! -Philip Pearl

stonewall.

In our frank opinion, this is part of a long range program adopted by the bureaucrats of the WSA, in conjunction with certain shipowners, to move in and eliminate old-time union seamen. This is directly in line with your training program, and with your Recruitment and Manning Organization - and how There is a reason for it. The comes your "medical program."

New 'Luxury' Life Rafts Tested

(Continued from Page 1) drop required by USCG regulations, into San Francisco Bay. The stove and fuel are available as extra equipment if the armed forces or Maritime Commission want them.

Like other standard rafts developed during the war, it carries signaling and safety equipment required by the Coast Guard, including distress signals, signal pistols, signaling mirrors, illuminating oil, drinking cups, matches, fishing tackle, blankets; compass and electric waterlight.

Measuring 8 by 16 feet by 41 inches, the reversible raft is designed for twenty persons, but thirty-six have been aboard at one time. There are the usual ten quarts of water per person, fourteen ounces of pemmican and the same amounts of malted milk tablets, chocolate and "C" Army ration biscuit. Protective curtains, sails and canopy are all painted orange to make them visible long distances from sea or air.

The Young company expects to hit top production for its new raft at its Oakland assemply line about Jan. 1, holding contracts to furnish various Liberty ships, other types of cargo vessels, tankers and transports.

AUGUST DAUM: Your wife has been injured. and would like to hear from you. She is at the Huntington Valley Country Club, Abington, Pa.
